For more details see how the One Step Checkout Pro for Magento 2 extension works.

Guide for One Step Checkout Pro for Magento 2

Display all checkout steps on one page to let visitors instantly modify necessary information and complete purchases as fast as possible. See how to create a one step checkout in Magento 2.

- Place checkout steps on one page;
- · Let customers edit product options on the checkout;
- Manage checkout fields display;
- Use automatic geolocation detection and Google Address suggestions;
- Enable order comments and newsletter subscription;
- Let customers select the day and the time for order delivery;
- Choose from 2 layout types (2-column and 3-column);
- Customize checkout page design;
- Add custom CMS blocks to the order success page;
- Hyva-ready storefront;
- WCAG compliant (Pro and Premium versions for Luma and Hyva Themes)
- Compatibility with Netresearch Shipping UI (for Luma Theme)

The extension is compatible with **Hyvä themes**. **One Step Checkout** <u>(standard version)</u> is compatible with Hyva Theme by default. For **One Step Checkout** <u>Pro</u> we provide additional packages. You can find the *amasty/module-checkout-gift-wrap-hyva-compatibility*, *amasty/module-checkout-delivery-date-hyva-compatibility*, and *amasty/module-checkout-thank-you-page-hyva-compatibility* packages for installing in composer suggest. (Note: the compatibility is available as part of an active Product Subscription or Support Subscription).

The extension is read and write **GraphQL compatible**. Now you can expose and mutate the datasets in One Step Checkout for Magento 2 via GraphQL queries.

The extension fully complies with WCAG 2.2 level AA accessibility requirements (Note: this compatibility applies to the Luma Theme only).

In **One Step Checkout FAQ** you can find answers to the most popular questions about the extension functionality.

Please note that due to technical reasons, the version of One Step Checkout Pro available on the Adobe Marketplace is 4.2.1, but it fully corresponds with the version listed on our website.

Before configuration

Having troubles with Magento 2 One Page Checkout? There are some tips in case of a situation when your Magento One Step checkout is not working correctly.

• Try disabling the extension and check if you're getting the same result with Magento default checkout. One Page Checkout is designed to be as transparent for other checkout-related extensions as possible, it will display the data "as-is". So if you're getting suspicious results please compare them to what you get with One Step Checkout disabled.

• Some custom themes may have a custom design for blocks displayed on checkout. If you see some blocks not working on or displaying incorrectly on Magento One Step Checkout, please try switching to the Magento default theme. If it helps, that will mean that the theme should be adjusted to disable the custom design for checkout blocks.

Payment Compatibility

Currently, the module supports the following payment methods:

- PayPal;
- Amazon Pay;
- Braintree;
- Klarna 9.0.16;
- Stripe;
- Adyen (tested compatibility with Credit card, Stored (Tokenized) credit card, Google pay, iDeal, PayPal);
- Authorize.net;
- GooglePay;
- iDeal;
- Mollie;
- Opayo
- Revolute;
- Visa;
- MasterCard.

To enable payment methods like Adyen and Authorize.net you can find additional packages for installing in Additional packages (provided in composer suggestions) section.

Please note that Adyen and Authorize.net payment methods compatibility is available as part of an active product subscription or support subscription. Adyen and Authorize.net payment methods are compatible with **Hyva Theme**.

NEW! This extension is compatible with the **Stripe Card Element** functionality.

General settings

To configure the Magento 2 One Page Checkout settings, please go to **Stores** \rightarrow **Configuration Amasty Extensions** \rightarrow **One Step Checkout**.

Expand the General tab.

<u>a</u>masty

General

Enable One Step Checkout [store view]	Yes	•
Allow to Edit Products in the Order Summary [store view]	Yes	•

	Select 'Automatically' to trigger an upd Order Summary automatically after th	ate of e

Enable One Step Checkout - set to Yes to activate the extension.

Allow to Edit Products in the Order Summary - choose Yes to allow customers to delete products and change their quantity on the checkout page.

Finish Product Editing - Select 'Automatically' to trigger an update of Order Summary automatically after the quantity or product options are changed, or just leave this option in the position 'Manually'.

Enable JS and HTML bundling and minifying for checkout

page [store view] Yes

Up to 30% faster checkout page load time and up to twice smaller bandwidth consumption due to reduced resources size.

quantity or product options are changed.

Enable JavaScript and HTML bundling and minifying for checkout page - set to Yes if you want to allow the extension speed up the checkout loading by minifying JavaScript and HTML code files. This way, when a customer refreshes the page, it will load noticeably faster.

To ensure the Enable JavaScript and HTML bundling and minifying for checkout page works seamlessly, make sure the One Step Checkout Cache is enabled. You can learn more on how to do

that in the Cache Management section of the User Guide.

,	bandwidth consumption due to reduced resources size.	
Allow Guest Checkout [store view]	Yes	▼ ✓ Use system value
Enable Guest Checkout Login [store view]	Yes	▼ ✓ Use system value
	Enabling this setting will allow unauthenticated users to query e-mail address is already associated with a customer account. T can be used to enhance the checkout workflow for guests that not realize they already have an account but comes at the cost exposing information to unauthenticated users.	if an This do of
Let Customers Create an Account at Checkout	While Placing an Order, Optional	Ŧ
[store view]	No	
Creating an Account at Checkout [store view]	After Placing an Order	
Social Login on Checkout [store view]	While Placing an Order, Optional	
	While Placing an Order, Required	

Allow Guest Checkout - enable this option to let your customers fill in the checkout form and create accounts right on the checkout page.

Enable Guest Checkout Login - enable this setting to let your customers log in to the checkout page (for Magento version 2.4.5-p3 and above).

Let Customers Create an Account at Checkout - three options are available:

- No Select '*No*' to forbid the creation of accounts on the checkout page for your guest customers.
- After Placing an Order If you select 'After Placing an Order', you will also need to enable or disable the 'Create an Account' Checkbox is Checked by Default' option.

Customers will be presented with the option to check the 'Create an Account' checkbox. If checked, your customer will get an email with account activation instructions after placing the order.

• While Placing an Order (optional or required) - To let your guest customers create accounts right on the checkout page, choose the 'After Placing an Order' or 'While Placing an Order' variant. If 'While Placing an Order' is chosen, set 'Yes' in the next field to allow the extension 'Automatically Log in Customers After Creating an Account at Checkout'.

Social Login on Checkout [store view]	No	•
	Let your customers sign in with differe social networks on the checkout. This setting is enabled once Social Login is installed. Learn more about it here.	nt

Social Login on Checkout - Let your customers sign in with different social networks on the checkout. This setting is enabled once the **Social Login for Magento 2** extension by Amasty is installed or if you have the One Step Checkout Premium version.

We enhanced compatibility with Amasty Social Login: now you can enable social login block on the checkout in the OSC configuration page One Step Checkout for Magento 2 extension is fully compatible with **GDPR for Magento 2**

Design

In the **Design** tab, you can configure all aspects of a one-page-checkout appearance at the frontend.

Text and Default Values

Expand the **Text and Default Values** tab to change Magento 2 One Step Checkout page title and description, select font and enter default field values if necessary.

Design

Texts and Default Values

Checkout Page Title [store view]	Checkout
Checkout Page Description [store view]	Please enter your details below to complete your purchase
	Provide customers with important info about taxes (e.g. VAT) or any other payment specifics. HTML is allowed
Checkout Text Font	Roboto
	Specify the Google font name. For example Roboto, Open Sans or Indie Flower Some fonts use extra parameters e.g. Molle:400i where 400 = regular, i = Italic (100 = thin, 700 = bold)
Default Shipping Method [store view]	Fixed •
Default Payment Method [store view]	Cash On Delivery 🔻
Default Country [store view]	United States 💌
Default Region/State [store view]	California 🔻
Default Zip/Postal Code [store view]	90201
Default City [store view]	Bell Gardens

Also see Layout settings to manage Block Names

Checkout Page Title - specify a custom title for the checkout page.

Checkout Page Description - provide customers with important info, including taxes (e.g. VAT), shipping or any other payment specifics.

Include main keywords for better SEO rankings and use <html> to highlight the important points.

Checkout Text Font - specify the name of a necessary font. Use Google Fonts to pick the one you need quickly.

Then, in the fields below you can specify values that will be preselected on the checkout page by default to speed up the checkout process. The **Default Values** settings are optional. Therefore, you can display only those values that meet your specific requirements.

With the One Step Checkout extension you can set default values for the following fields:

- Shipping method choose Fixed or Table Rate method according to your website needs;
- **Payment method** specify the necessary method to be chosen by default.

You can also set the necessary default values for the **Country**, **Region/State**, **Zip/Postal Code** and the **City**. Use the handy dropdown menu.

Place Order Custom Name [store view]	Yes
	Enable this setting if you'd like to set a custom name for the 'Place Order' button.
Custom Button Name [store view]	CUSTOM BUTTON NAME
	Enter the name that will be displayed in the 'Place Order' button. Limited to 40 symbols.
	Also see Layout settings to manage Block Names

Place Order Custom Name - Enable this setting if you'd like to set a custom name for the 'Place Order' button.

Custom Button Name - Enter the name that will be displayed in the 'Place Order' button. Limited to 40 symbols.

Layout

The **Layout** tab includes options regarding the style of the checkout page. Select the checkout design and layout and re-order blocks as you want to customize the checkout flow for your business.

🔿 Layout

Checkout Design [store view]	Modern 🗸
Checkout Page Layout [store view]	3 Columns 🗸
Display Billing Address On [store view]	Below Shipping Address 🔹
Place Order Button Position [store view]	Below the Order Total 🔹
	Please keep in mind that some payment methods may override this option, thus for such methods the button may remain in Payment Methods block regardless of this option's value.

Checkout Design - select either the *Modern* or *Classic* design. Depending on which design you choose, the offered **Checkout Page Layout** will differ.

Checkout Page Layout - define the checkout page blocks that will be displayed. Possible options:

- Classic Theme 2 columns, 3 columns.
- *Modern Theme* 1 column, 2 columns, 3 columns.

Please keep in mind that, for 3 Columns layout, the third column will be displayed only if Customer's Order may require shipping (contains non-Virtual products, in most cases).

Display Billing Address On - choose where to display the billing address:

- on Payment Method
- on Payment Page
- Below Shipping Address

Place Order Button Position - place the button either

- below the order total or
- below the selected payment method.

When selecting 'Below the Order Total' option, beware that, besides re-positioning, Place Order button behavior may slightly change. Because of that, it may impact your customers' checkout experience, especially in case you use any third-party payment integrations. If you experience any unexpected issues, please switch to 'Below the Selected Payment Method' option.

'Billing and Shipping Address are the same' by default [store view]

Checked	•
Checked	
Unchecked	
Unchecked and Hidden	

Specify the default state of the 'My billing and shipping address are the same' checkbox.

'Billing and Shipping Address are the same' by default - Specify the default state of the '*My billing and shipping address are the same'* checkbox. Three options are available:

- Checked;
- Unchecked;
- Unchecked and Hidden.

Re-order blocks via drag and drop - To set the order for the checkout blocks and customize their names to improve the checkout flow, adjust the **Re-order blocks via drag and drop** section. In this section, you can easily rename and reorder the blocks according to your needs via drag and drop function.

Re-order blocks via drag and drop [store view]

Shipping Address	Shipping Method	Order Summary
1. Customer Info	2. Shipping Meth	Your Order
	Delivery 3. Delivery	
	Payment Method	
	4. Payment Meth	

Also see Manage Checkout Fields to rearrange Address Block content

See how to specify the order and names of checkout fields here.

Address Formatting

Configure the way address information will be formatted and shown at the frontend.

Address Formatting

Number of Lines in a Street Address [website]	2 Valid range: 1-4	Use system value
Display Multiple Shipping Address In [store view]	Grid	*

Number of Lines in a Street Address - specify the number of lines for a 'Street Address' field. The max number to specify is 4. If you use system value, 2 lines will be set by default.

Display Multiple Shipping Address In - allows displaying billing address form in the customer information block below shipping address (if it differs from the shipping address).

If this option is grayed, please update your Magento to version 2.2 or newer to make this setting available.

<u>a</u>masty

Color Scheme

⊘ Color Scheme

Heading Text Color [store view]	#000000
Order Summary Background [store view]	#f2f5ff
Checkout Background Color [store view]	#ffffff
Place Order Button Color [store view]	#5853e6

Customize your checkout page style. With a handy color picker tool you can select colors for:

- Heading Text;
- Order Summary Background;
- Checkout Background Color;
- Place Order Button Color.

To select a preferable color, click on the field and the color picker tool will appear.

Here is an example of a custom checkout page design.

	You can set Terms and Conditions here.	
Terms and Conditions Checkbox Positioning [store view]	Below the Order Total	
Order Comment	Yes	
	If you need a wider range of configurable attributes available for you to customize and fine-tune your checkout page, please get our extension 'Order Attributes'. Learn more here.	
Phone Number Field Validation [global]	Numeric and Special Characters	0
Minimum Number of Symbols [global]	None Numeric Only Numeric and Special Characters	
Maximum Number of Symbols [global]	10	

Discount Field - let customers apply promo codes at the checkout.

The module updates the types of available shipping methods automatically after a coupon code is added. For example, you might want to allow free shipping if the user applies **FREESHIPPING** coupon. Now, the extension automatically re-calculates the available shipping options without additional page reloading.

Show Unit Price - Enable the setting if you want to show the price per item for each product in the Order Summary block.

Newsletter Checkbox - display the newsletter subscription checkbox.

Newsletter is Checked by Default - set the option to *Yes* to make the Newsletter Subscription option ticked by default.

Enable Terms and Conditions - set to Yes if you want to display Terms and Conditions checkbox.

Terms and Conditions Checkbox Positioning - if *Yes*, specify the position of the checkbox: *Below the selected payment method* or *Below the Order Total*.

Before you choose the position of the Terms and Conditions, check that:

 The Terms and Conditions are created and are enabled. In Stores → Settings → Terms and Conditions, select the condition you've created previously or create a new one and change its status to Enabled.

Terms and Conditions Information

Condition Name *	Example

more information here). Leave empty to ignore this feature.

API Key (Place Autocomplete Data API) - Click here to get API key from Google.

Country Restrictions for Address Autocomplete - If you ship goods to a limited number of countries, select those countries whose addresses will be offered to customers by the Google Address Autocomplete.

The search logic in the new autocomplete has been updated. It now prioritizes street names over countries.

How to get API key?

The API key is required to use Address Auto Suggest. To get an API key, you need your **Google account**. Create Google App here.

Click on the **CREATE PROJECT** button and configure your app settings.

■ Google Cloud Platform ■ ← Manage resources ■ CREATE PROJECT ■ CREATE FOLDER ■ MOVE ■ DELETE amasty.com Filter by name, ID, project number, or label O O Project name Labels Project ID Requests @ E ● Amasty 0 0 0 0 ● My Project 73694 0 0 0	o for Mage	ento 2

Organization 📀	
Create Cancel	

Then, please proceed to this page to create a new API key. ('Maps API' should be selected at first step). Choose the necessary project.

Go to **Credentials** \rightarrow **API key**.

≡	Google Cloud Platform	► My Project 85662 - Q
2	Google Maps	← Places API ■ DISABLE
٩	Overview	Metrics Quotas Credentials
≡	APIs	
th	Metrics	API key Identifies your project using a simple API key to check quota and access.
*	Support	OAuth client ID Requests user consent so your app can access the user's data. Service account key Enables server-to-server, app-level authentication using robot accounts. Help me choose Asks a few questions to help you decide which type of credential to use Create credentials

Copy the key and fill it in the Google API Key tab on the backend of the extension.

In our last module update we enhanced the work of Google Address Autocomplete so that the State/Province field is filled properly for United States, Great Britain, Netherlands, Germany and Italy.

Geo IP Data

This product includes GeoLite2 Data created by **MaxMind**, available from 24.10.2023 (last update date).

To use the Geo IP Location option please go to Stores \rightarrow Configuration \rightarrow Amasty Extensions \rightarrow Geo IP Data.

Databases are required for the correct work of the module. Also, you need to install php bcmath or gmp extension on your server.

You can get the databases automatically or import your own data.

Hit the **Download and Import** button to make the extension download the updated CSV dump file and import it into your database automatically.

To import the files from your own source, use the **Import** option. Path to the files should look like this (the part 'var/amasty' should be replaced with your folders' names):

6

var/amasty/geoip/GeoLite2-City-Blocks-IPv4.csv var/amasty/geoip/GeoLite2-City-Blocks-IPv6.csv var/amasty/geoip/GeoLite2-City-Locations-en.csv

In the Import section, the **Import** button is grayed out by default. It will be available right after you upload the CSV files. The red error notification will switch to green success notification when the import is completed.

IP Database Update Settings

The database included in the extension was last updated on October 24, 2023. To keep the IP database current, you can update it using one of two methods.

Please note that regardless of the updating method chosen, you need to import the IP database first.

IP Database Update Settings

Refresh IP Database - select the appropriate method for refreshing the IP database:

- Manually to manually upload the updated database files;
- **Update via Amasty Service** to update the database automatically and regularly via Amasty Service, which is complimentary for you *until August 2024*.

Debug Mode

You can enable IP forcing, which makes it possible to set a specific IP address that will be used instead of the visitor's real IP address when determining geolocation. The feature is useful while configuring or testing the extension.

Debug

Enable Force IP [global]	Yes	•
Force IP Address [global]	192.0.2.1	
	You can set IP address for testing. Please be careful to avoid issues on production.)

6

Enable Force IP - set to Yes to replace the real IP address.

Force IP Address - specify the address to use instead of a real one.

Gift Wrap

Gift Wrap

Allow Gift Messages on Order Level [website]	Yes	•
Allow Gift Messages for Order Items [website]	Yes	•
Gift Wrap [website]	Yes	•
Gift Wrap Fee [website]	0.00	

Allow Gift Messages on Order Level - If the option is enabled, the 'Add gift message' checkbox appears in the Order Summary block and the buyer can add a custom message to the whole order by clicking on it.

Gift Messages for Order Items - If the option is enabled, the customer can add a gift message to each product specifically in the cart.

Both options can be enabled. In this case, the customer can add a message both for each product and for the whole order.

Gift Wrap - If the option is enabled, the customer can add gift wrapping to the order.

Gift Wrap Fee - In this setting, the admin can set a custom fee for 'Gift Wrap' service.

Thus, if the customer selects 'Gift Wrap' option while placing an order the cost of the service is displayed in the 'Order Total' checkout block:

Cart Subtotal	\$34.00
Gift Wrap	\$7.00
Shipping Flat Rate - Fixed	\$5.00
Order Total	\$46.00

Gift wrap \$7.00	

Order Success Page

Custom Order Success Page - Disable it to show the default Magento order success page. If frozen, the control over the order success page is moved to the Thank You Page module.

Manage Checkout Fields

To manage checkout fields display, go to **System** → **Mange Checkout Fields**.

Enabled Checkout Fields

Field	Label	Placeholder	Width	Required
 First Name	First Name	Veronica	• 100	~
Last Name	Last Name	Costello	• 100	~
 Company	Company	Linden LLC	• 100	
Street Address	Street Address	3162 Boggess Street	1 00	~
Country	Country	United States	— 100	~
State/Province	State/Province	Ohio	• 100	
 City	City	Spring Valley	• 100	
Zip/Postal Code	Zip/Postal Code	45370	— 100	
 Phone Number	Phone Number	937-862-5886	— 100	

Disabled Checkout Fields

Field	Label	Placeholder	Width	Required
 Name Prefix	Name Prefix	Mr/Mrs/Ms	100	
Middle Name/Initial	Middle Name/Initial	Lee	— 100	
 Name Suffix	Name Suffix	Jr./Sr.	1 00	
Fax	Fax	555-123-4567	100	
 VAT Number	VAT Number	123.456.789	• 100	

On the fields management page you can:

- Specify a custom field label (field name);
- Specify a field placeholder;
- Set field width to fit your website style;
- Specify which of the fields should be required;
- Enable/disable checkout fields;
- Reorder fields position for checkout display using drag and drop function;
- Set fields' order for checkout display.

When disabling City and Country please keep in mind that shopping cart will also be affected since those attributes are used in estimations and calculations.

To configure State/Postcode requirement for certain countries please check settings at *Stores* > *Configuration* > *General* > *General* > *Country/State Options*

To create additional fields to get more valuable info at the checkout, click **Add Custom Fields**. You can create up to 3 custom fields.

Please take note that if Custom Fields are created, they will be displayed in the Address Book in Customer Account. The date specified in these fields will also be displayed on the checkout page.

Recently Ordered

NEW | We implemented straight-through management between Manage Checkout Fields and their analogs in Magento general settings, Amasty Order Attributes, and Amasty Customer Attributes. Now, for example, you can update the configuration in MCF and the changes will be reflected in Magento settings and vice versa.

Employ **Order Attributes** and **Customer Attributes** modules to add order and customer attributes to your checkout fields, you can also sort customer and order attributes alongside checkout fields and adjust each attribute settings.

Easily rename and reorder the fields according to your needs.

Enabled Checkout Fields

Gain more valuable information from Magento 2 One Page Checkout to make data-driven decisions. Upgrade marketing strategy via integration of your Magento One Page Checkout with Google Analytics.

Configure Google Analytics features of Enhanced Ecommerce to gather more insights about your

checkout performance. How to View Enhanced Google Analytics Ecommerce Report of Magento One Page Checkout?

To get started with Enhanced Ecommerce reports, follow these steps:

- Sign in to your Analytics account.
- Select the desired view.
- Click Reports.
- Select Conversions \rightarrow Ecommerce.

Moreover, in the Checkout Behavior Analysis Report, you can track user behavior throughout the checkout process. The informative visualization of the checkout flow allows you to see how many users move from one step to another or leave the site at one stage or another.

Cache Management

To access the Cache Management grid, please go to the **Configurations** \rightarrow **System** \rightarrow **Cache Management**. Amongst all caches that are available for your website, please look for **One Step Checkout** cache type, with tags **AMASTY_CHECKOUT**.

Cac	he Mana	gement	α.	👤 admin 👻
		Flush Cache Storage	Flush Magente	o Cache
Refre	sh 🔻 Subr	mit 16 records found		
×	Cache Type	Description	Tags	Status
	Configuration	Various XML configurations that were collected across modules and merged	CONFIG	ENABLED
	Page Cache	Full page caching	FPC	ENABLED
	Web Services Configuration	REST and SOAP configurations, generated WSDL file	WEBSERVICE	ENABLED
	Translations	Translation files	TRANSLATE	ENABLED
	One Step Checkout	Checkout page cache (including but not limited to UI components configuration, position of page elements, inactive heavyweight components of the page and so on)	AMASTY_CHECKOUT	ENABLED
	Vertex	Vertex tax calculation data	VERTEX	ENABLED

Additional Cache Management

Flush Catalog Images Cache	Pregenerated product images files
Flush JavaScript/CSS Cache	Themes JavaScript and CSS files combined to one file

By default, the *AMASTY_CHECKOUT* cache is disabled. Please note that for a proper extension functioning, it highly recommended to enable it.

[Premium] One Step Checkout Premium for Magento 2

As for now, the following <u>5 extensions</u> below are going with the **One Step Checkout Premium edition** out-of-the-box:

- Google Invisible reCaptcha M2 See user guide →
- Social Login M2 See user guide \rightarrow
- Order Attributes M2 See user guide →
- Abandoned Cart Email M2 See user guide →
- Thank You Page M2 See user guide →

The original functionality of these extensions by Amasty is fully available out-of-the-box with the **One Step Checkout Premium**. Set up One Step Checkout extension and start using the integrated extensions, no extra costs implied.

One Step Checkout for PWA (Add-on)

Provide a smooth checkout experience from any device with a ready-made PWA checkout solution. The add-on allows you to use all the features of the original One Step Checkout module on a smartphone or tablet. With the PWA One Step Checkout add-on, you allow customers to conveniently complete their purchases and can easily increase the conversion rates of your store.

Please keep in mind, the PWA add-on will work properly only if the original One Step Checkout extension for Magento 2 and a PWA theme are installed. Also, you need to install PWA Studio first Learn more on how to install PWA Studio here.

In order to correctly install a PWA add-on, please install the **corresponding GraphQL system package** first. For the correct name of it, please check the *composer.json file* of the main module. *For example,* the GraphQL system package name of the PWA add-on for the Blog Pro extension would be the following: **amasty/blog-graphql**

{	
"name": "amasty/blog",	
"description": "Amasty Blog Pro",	
"require": {	
"php": ">=7.3.0",	
"amasty/base": ">=1.13.4",	
"amasty/email-unsubscribe": "*",	
"amasty/cron-schedule-list": "*",	
<pre>"magento/framework": ">=102.0.0",</pre>	
<pre>"magento/module-catalog": "*"</pre>	
},	
"suggest": {	
<u></u>	
"amasty/blog-graphql": "Install blog-graphql module to activate Graphql and Blog Pro integration.",	
"amasty/module-blog-mftf-3". "Install module-blog-mftf-3 module to be able to run Blog Pro MFTF tests for Magento 2.4.0+ versio	n.",
"amasty/module-blog-pro-to-builder": "Install Amasty_BlogProToBuilder module to activate the integration with Custom Reports Bu	ilder extens
},	
"type": "magento2-module",	
"version": "2.10.4",	
"license": [
"Commercial"	
],	
"autoload": {	
"files": [
"registration.php"	

Customers can use all features of the original extension while managing One Step Checkout from mobiles and tablets.
