

amasty

For more details see the way the [Out of Stock Notification for Magento 2](#) extension works.

Guide for Out of Stock Notification for Magento 2

The module allows your customers to subscribe and receive notifications on price and inventory updates. And let you have more information on subscribers preferences and demands.

- Activate stock and price subscriptions
- Track users behaviour with Analytics dashboard
- Notify customers and guest visitors
- Keep admin informed about low stock and new subscriptions
- Let shoppers easily manage subscriptions in their account
- WCAG compliant (for Luma Theme)

The extension is **read and write compatible with GraphQL**. It has the option to retrieve extension settings and subscribe to products (for both guests and logged-in customers) using GraphQL mutations.

Magento 2 Out of Stock Notification extension is compatible with **Hyvä themes**. You can find the '*amasty/module-out-of-stock-hyva-compatibility*' package for installation in composer suggest. The compatibility is available as a part of an active product subscription or Support Subscription

Please note: For the correct Hyvä compatibility work, the **GraphQL** module should also be installed. You can find it in the composer suggest '*amasty/module-osn-graphql*'.

After Installation

Please, note that after you install the extension, it is recommended to compile all the **LESS** files. To get more details, see [these guidelines](#).

General Settings

To configure the extension settings, go to **Stores → Configuration → Out of Stock Notifications**.

General

Use Configurable Image <small>[store view]</small>	<input type="text" value="Yes"/>
	Use configurable product image for simple product subscriptions on account page
Greeting Text for Email <small>[store view]</small>	<input type="text" value="Dear Friend"/>
Minimum Stock Quantity <small>[store view]</small>	<input type="text" value="3"/>
	Minimum stock quantity before the email is triggered.
Test Stock Notification Email <small>[store view]</small>	<input type="text" value="amasty@example.com"/>
	Please go to the Reports > Stock Alerts to send it.
Show Options of Out Of Stock Configurable <small>[store view]</small>	<input type="text" value="Yes"/>
	Set 'Yes' to allow customers to subscribe on 'out of stock' configuration of 'out of stock' Configurable Product.

Use Configurable Image - When subscription, display the image of the configurable product instead of simple on the account page.

Use the **Magento 2 product returns extension** to effectively deal with the incoming return/exchange requests.

Greeting Text for Email - Specify greeting text for out of stock notifications.

Minimum Stock Quantity - If the option is disabled, the notification will be sent once the product status is changed to *In Stock*. You can also set the option to *Yes* and specify the minimum stock quantity that will trigger notification sending.

The extension also works with 0 Qty in cases when stock isn't managed.

To send a test notification:

- Input your e-mail in **Test Stock Notification Email** field;
- Go to **Reports → Notifications → Out of Stock notifications**;
- Select a desired out-of-stock product, checking the box;
- Select **Yes** in **Any** dropdown;
- Click **Actions** to select **Test Notifications**;
- Click **Submit**.

Show Options of Out of Stock Configurable - Set 'Yes' to allow customers to subscribe to an 'out of stock' configuration (simple out of stock products) of the 'out of stock' Configurable Product.

See an example of how the subscription option to the simple configurations will look like on the frontend:

If you are using the **Amasty Custom Stock Status** module on your instance and want to enable subscription for the out-of-stock option of a configurable product, we recommend setting **Show Out of Stock Configurable Attributes** in the Custom Stock Status module to either *Yes, Out of stock options selectable and crossed-out* or *Yes, Out of stock options selectable*.

How to enable Price Alert and Stock Alert?

Please navigate to '**Stores → Catalog → Product Alerts**' to enable the default Product Alerts (Price Alert and Stock Alert) and choose the email sender and templates for them.

Product Alerts

Allow Alert When Product Price Changes

Hide Stock Alert Block
[global]

Content

If necessary, change it to **No**, clear the caches, and then verify the visibility of the block on the frontend.

If the setting is set to No, but the stock alert block remains invisible on the storefront, the problem could be associated with theme compatibility or other site-specific factors. In such cases, don't hesitate to reach out to us for assistance.

Stock Subscription

Previously, you should enable *Default Stock Alerts* in **Configuration → Catalog → Product Alerts**

Allow Subscription for Selected Group(s) - Select one or several customer groups that will receive stock availability notifications.

Stock Subscription

Allow Subscription for Selected Group(s)
[store view]

- All Groups
- Not Logged In
- General

- Wholesale

Limit Emails by Product Qty
[store view]

No

Note! Emails will be sent once a day

Enable Persistent Stock Notification Checkbox
[store view]

Yes

If enabled, customers subscribing to stock notifications will be able to choose between receiving a single notification or continuous notifications every time the product comes back in stock.

Enable Subscribe from Category Page
[store view]

Yes

Enable Subscribe from Recommended Products Blocks
[store view]

No

Includes Related Products, Up-Sells, and Cross-Sells product blocks, as well as blocks from the Amasty Automatic Related Products module if installed.

Use Popup for Guests
[store view]

Yes

The popup will be displayed for guests on categories and recommended products blocks, if they are enabled.

Limit Emails by Product Qty - Enable the feature in case you want to align the number of emails to the quantity of the back-in-stock items. For instance, you have 30 subscribers for the particular product and only 5 items back to stock. With the feature enabled, only 5 first subscribers will receive the notifications.

Enable Persistent Stock Notification Checkbox - If enabled, customers subscribing to stock notifications will be able to choose between receiving a single notification or continuous notifications every time the product comes back in stock. Please note: this functionality is available as part of an active product subscription or support subscription.

Send Email Reports for New Subscriptions (Daily) - The daily email will include all the out-of-stock products, that have been recently subscribed to.

[A sample of email notification about new subscriptions:](#)

Hello,

This is an automatic notification about a new out of stock subscription(s) made today.

Products:

Name	SKU	Total Number of Subscriptions	Last Subscription
Fusion Backpack	24-MB02	1	2018-07-12 13:55:47
Impulse Duffle	24-UB02	2	2018-07-12 14:05:06
Stellar Solar Jacket-S-Blue	WJ01-S-Blue	1	2018-07-12 13:55:43

Thank you!

Email Template to Notify Admin - Select the appropriate template for the email notifications.

Notify Admin about Inventory Low in Stock - The feature sends the email notifications, basing on the specified value, which warns admin about low stock.

To specify the value, which will trigger the low stock notification, go to **Stores → Configuration → Catalog → Inventory → Product Stock Options → Notify for Quantity Below**.

[A sample of email notification about low stock:](#)

Hello,

This is an automatic notification about the low stock of the following product(s).

Product Name	SKU	Quantity
Strive Shoulder Pack	24-MB04	4

Thank you!

Email Template to Notify Low in Stock - Choose the appropriate template for the low stock notifications.

Notify for Quantity Below - Notify store admin when the quantity of products is less than this number.

Notify Admin about Out of Stock Inventory - If Yes, admin will also get a notification when a product comes to *out of stock* status.

Email Template to Notify Out Of Stock - Select email template to inform admins.

Admin Email Address - Input the email addresses, the extension will send notifications to. The addresses should be comma-separated, with no spaces.

Email Sender - Choose the email sender.

The extension allows collecting statistical data on Back in Stock requests and provides you with the next values:

- the quantity of Back in Stock Requests (Subscriptions) created;
- the quantity of Back in Stock Alerts sent;
- the value of orders made from the notifications sent.

Also, you can:

- Analyze which products are "Most Wanted" - the most wanted products are those which have the greatest quantity of out of stock subscriptions (the "Qty" column).
- Track your customers' recent activities: see for which products your customers subscribe and how often it is.

The data presented in this report can be filtered by dates.

Subscriptions to particular product

You can see the list of subscribers for a particular product. For this, go to **Admin Panel → Products → Catalog**. Then open the page of the product you are interested in and go to *Product Alerts* tab.

PWA for Out of Stock Notification (Add-On)

Keep customers updated with any changes in your stock by installing the PWA add-on for the Out of Stock Notification extension. The software provides a faster, enhanced experience for clients shopping from phones and tablets.

The feature can be enabled only after purchasing the **PWA for Out of Stock Add-On**. Also, you need to [install PWA Studio](#) first.

In order to correctly install a PWA add-on, please install the **corresponding GraphQL system package** first. For the correct name of it, please check the *composer.json* file of the main module. For example, the GraphQL system package name of the PWA add-on for the Blog Pro extension would be the following: **amasty/blog-graphql**

```
{
  "name": "amasty/blog",
  "description": "Amasty Blog Pro",
  "require": {
    "php": ">=7.3.0",
    "amasty/base": ">=1.13.4",
    "amasty/email-unsubscribe": "*",
    "amasty/cron-schedule-list": "*",
    "magento/framework": ">=102.0.0",
    "magento/module-catalog": "*"
  },
  "suggest": {
    "amasty/blog-page-builder": "Install blog-page-builder module to activate PageBuilder and Blog Pro integration.",
    "amasty/blog-graphql": "Install blog-graphql module to activate GraphQL and Blog Pro integration.",
    "amasty/module-blog-mftf-3": "Install module-blog-mftf-3 module to be able to run Blog Pro MFTF tests for Magento 2.4.0+ version.",
    "amasty/module-blog-pro-to-builder": "Install Amasty_BlogProToBuilder module to activate the integration with Custom Reports Builder extensions."
  },
  "type": "magento2-module",
  "version": "2.10.4",
  "license": [
    "Commercial"
  ],
  "autoload": {
    "files": [
      "registration.php"
    ]
  }
}
```

The add-on adapts interaction with the website to various screen resolutions to improve responsiveness and the overall client experience. See some storefronts examples:

[Subscription for the product at the Category Page:](#)

Subscription pop-up and GDPR for guests:

[Subscribe to price changes at the Product Page:](#)

[Subscribe to back in stock at the Product Page:](#)

Please, note limitations when purchasing PWA for Out of Stock Notification Add-On:

- Allow Subscription for Selected Group(s) for Price and Stock Subscription

Find out more about Magento PWA integration [here](#).

Additional packages (provided in composer suggestions)

To make additional functionality available, please install the suggested packages you may need.

Available with **no additional fees**:

- **amasty/module-osn-graphql** - Install this module to activate GraphQL and Out Of Stock Notification integration.

Available as a part of an active product **subscription** or support subscription:

- **amasty/module-out-of-stock-hyva-compatibility** - Install this package to ensure the Out Of Stock Notification extension works with the Hyvä Theme.
- **amasty/xnotif-subscription-functionality** - Install this package to:

1. filter by dates in the Analytics Dashboard;
2. allow customers to subscribe to Back in Stock notifications from the Related Products, Up-Sells, and Cross-Sells blocks;
3. let customers subscribe to regular notifications and receive an email each time a product is back in stock;
4. enable the ability to notify customers via email about their subscriptions to Price Alerts and Back in Stock Alerts.

FAQ

- [I've configured GDPR for subscriptions, but the link to Privacy Policy page is not redirecting to the correct page. How to fix?](#)
- [Customers do not receive notification. What might be the reason?](#)
- [The images are missing in the customer back in stock emails. How to fix?](#)
- [Can I subscribe to an out of stock simple product \(child of a configurable\)?](#)

Check out the **[Out of Stock Notification FAQ section](#)** to find answers to the most popular questions about the extension functionality.

Find out how to install the Out of Stock Notification for Magento 2 via [Composer](#).
