See the way CMS Page Builder by MageSolution for Magento 2 extension works.

# Guide for CMS Page Builder by MageSolution for Magento 2

Create custom pages and content blocks without writing a line of code with Magento CMS Page Builder extension.

- Create and edit CMS, category, and product pages
- Use 30+ building elements to create unique page designs
- Import/export, delete or restore any page version
- Provide mobile-responsive design
- Compatible with Magento 2 themes

# Configuration

To install the extension, follow these steps:

**STEP 1:** Extract Extension Package Right click on the extension package, find and click **Extract files** to unzip your package extension

STEP 2: Upload folders and files in extension package onto Magento root folder

- Open the extracted Builder package.
- Now you can see 3 smaller folders: **app, patches** and **pub**.
- Upload folders **app** and **pub** to the folder **app** and **pub** of your Magento root folder, respectively. Please note that, uploading means that you merge content of the original folder with the new content from our extension.
- If you are using our MGS Builder Theme, please go to the folder patches → patch\_for\_mgs\_frontend\_builder\_theme and once more, upload folder app inside it to the folder app of your Magento root folder.
- For the extension we recommend from the third party Mageplaza, please go to patches → patch\_for\_mageplaza\_extensions, upload folder app inside it to the folder app of your Magento root folder.

STEP 3:Refresh and update system by commands

- Go to your Magento root folder and open a terminal window here.
- Should you type **php bin/magento module:status**, you will see **MGS\_Fbuilder** in the list of disabled modules.
- Now type **php bin/magento module:enable MGS\_Fbuilder** to enable this extension.
- Type **php bin/magento setup:upgrade** to upgrade the extension to system.
- To make sure everything is up to date: If your Magento version is smaller than 2.1, type **php bin/magento setup:static-content:deploy**. Otherwise, type **php bin/magento setup:static-content:deploy -f**.

- Type php bin/magento cache:clean and then php bin/magento cache:flush to refresh system.
- Now our CMS Builder is installed successfully.

#### **STEP 4:** Active module in backend

- Log in backend with your admin account.
- Go to MGS → Page Builder Setting → General → Active Front-end Builder.

Configuration			Q 💄 admin 🗸
Scope: Default Config 👻 🕜			Save Config
AMASTY DEMO CONFIG	General		$\odot$
GENERAL	Active Front-end Builder	Yes 🗸	
CATALOG	Disabled Widgets on Homepage & CMS Pages	Yes 🗸	
SECURITY	[store view]	If you choose "Yes": all widgets for homepage and cms pages added from CONTENT > Widgets will not visible.	
CUSTOMERS	Disabled Widgets on Category Pages [store view]	Yes 🔻	
SALES		If you choose "Yes": all widgets for category pages added from CONTENT > Widgets will not visible.	
УОТРО	Width of section container [store view]	1240	
MAGE SOLUTION		рх. Default is 1240px	
I	Columns padding [store view]	15	
Front-end Builder		px. Padding left and padding right of columns (default is 15px)	

- Choose **Yes** to active our extension.
- Click **Save Config** button to save your change.
- Now clear cache to refresh system: In backend area, go to System → Cache Management. Click Flush Magento Cache button to clear cache

Ca	che Management			Q 💄 admin 🗸
			Flush Cache Storage	h Magento Cache
Refi	esh 💌 Submit 16 records found			
	Cache Type	Description	Tags	Status

Teterer view?		

With Social Settings, you can config:

- Instagram [Access Token]: Insert Access Token for your Instagram Shop
- Snapppt [Embed Code]: Insert Embed Code for your Snapppt
- Google [Google API Key]: Insert the Google API Key

#### **OWL Slider (single slide) Settings**

Go to Admin → MGS → Front-end Builder [OWL Slider (Single Slide)]

#### OWL Slider (Single Slide)

#### NAVIGATION

Navigation type [store view]	Use Font Icon 🔹
Next font class [store view]	fa fa-angle-right
Previous font class [store view]	fa fa-angle-left
Width [store view]	40
Height [store view]	80
Font size [store view]	80
Border radius [store view]	
	DEFAULT
Color [store view]	<b>3</b>
Border color [store view]	3
Background [store view]	3
Background opacity [store view]	
	From 0 to 1. ex: 0.6
	HOVER
Color [store view]	<b>3</b>
Border color [store view]	<b>3</b>
Background [store view]	3
Background opacity [store view]	
	From 0 to 1. ex: 0.6

With OWL Slider (Single Slide) Settings, you can config:

- Navigation section: Settings for the navigation.
- Navigation Type: Choose between Use Front Icon or Use Image.
- Next font class and Previous font class: Insert the class CSS for your previous and next icon.
- Width Height Font size: Config the width height value of your navigation, and the font size used in it.

- Border radius: Set value for the navigation radius border.
- Default section: Settings for the navigation without any mouse effects.
- Hover section: Settings for the navigation once.
- Pagination section: Settings for the pagination of slider with: Width, Height, Border radius, Background.

#### **OWL Slider (multiple slide) Settings**

Go to Admin → MGS → Front-end Builder [OWL Slider (Multiple Slides)]

#### **OWL Slider (Multiple Slides)**

NAVIGATION		
Navigation type [store view]	Use Font Icon	•
Next font class [store view]	fa fa-angle-right	
Previous font class [store view]	fa fa-angle-left	
Width [store view]	40	
Height [store view]	40	
Font size [store view]	30	
Border radius [store view]		
	DEFAULT	
Color [store view]		1
Border color [store view]		1
Background [store view]		1
Background opacity [store view]	From 0 to 1. ex: 0.6	
	HOVER	
Color [store view]		1
Border color [store view]		1
Background [store view]		1
Background opacity [store view]	From 0 to 1. ex: 0.6	

Similar to OWL Slider (Single Slide) Settings, you can config Navigation, Pagination and others detailed settings.

- Navigation section: Settings for the navigation.
- Navigation Type: Choose between Use Front Icon or Use Image
- Next font class and Previous font class: Insert the class CSS for your previous and next icon
- Width Height Font size: Config the width height value of your navigation, and the font size

used in it

- Border radius: Set value for the navigation radius border
- Default section: Settings for the navigation without any mouse effects
- Hover section: Settings for the navigation once
- Pagination section: Settings for the pagination of slider with: Width, Height, Border radius, Background.

#### Font & Style Settings

Font & Style		
	Include font Awesome	Yes 🔻
		If you choose <b>Yes</b> : we will insert fontawesome 4.7.0 style file to the <head> of the document. If fontawesome already exists in your theme, please choose <b>No</b></head>
	Custom style [store view]	

With Font & Style Settings, you can config:

- **Include font Awesome:** Choose to include font Awesome 4.7.0 style if you have not had font Awesome
- Custom style: Quickly put any additional custom style here.

#### Export/Import/Restore

Go to Admin → MGS → Front-end Builder [Export - Import - Restore]

Export - Import - Restore

Export [global]	Choose Page to Export
<b>Import</b> [global]	Browse     No file selected.       Choose Page to Import
Restore Versions [global]	Choose Page to Restore   Choose Version to Restore  Restore
Delete Versions [global]	home_2019-10-21_09:38:54.xml home_2019-10-21_07:53:13.xml home_2019-10-21_07:52:08.xml home_2019-10-18_10:21:40.xml home_2019-10-18_10:19:16.xml home_2019-10-18_03:53:17.xml

With Export - Import - Restore Settings:

**Export:** This function helps to immediately download to newest layout XML of any CMS Page.

Export [global]	Choose Page to Export	Export
	Choose Page to Export	
	Home Page	
	Privacy Policy	
	About Us	
	Orders and Returns	

- Click the dropdown list to choose page you want to export its layout.
- You should see an XML file automatically downloaded to your system. It is identified by page name, date amd time created.

Import: This function allows importing any layout XML to CMS Page.

- Click Browse to find the XMI file in your system.
- Choose CMS page that needed to import.
- Should you see the green message "Successfully import the page", the process is finished.

**Restore:** This function allows backing up any versions of XML of any page to any another page.

Restore Versions [global]	Choose Page to Restore	•	
	Choose Version to Restore		Restore
	Choose Version to Restore		
	home_2019-08-05_08:33:34.xml		
	home_2019-03-05_08:33:34.xml		
	privacy-policy_2019-08-05_08:33:34.xml		34.xml

- Choose the destination page that you want to restore.
- Choose the version you want to import. You can see several old versions of cms pages, identified by its page name, date and time created.
- Should you see the green message "Successfully restore the page", the process is finished.

**Delete:** This function helps to remove any versions of XML that you don't need.

Delete Versions [global]			
			-
	Delete	Delete All	

- Choose the version that you want to delete.
- Click the delete button and confirm Yes to finish the process.
- Note that, hold Shift on your keyboard to choose multiple versions.
- Besides, you can press Delete All to remove all of XML files.

## **Create Panel Account (in front-end)**

Step 1: Create Customer Account (Frontend)

- At Front-end, go to link yoursite.com/customer/account/create/.
- Create an Customer Account with your information: Full name, email and password. You should use a strong password to improve the security.

# Create New Customer Account

#### Personal Information

First Name \*

Last Name \*

Sign Up for Newsletter

#### Sign-in Information

Email \*

Password \*

Password Strength: No Password

Confirm Password \*

\* Required Fields

#### **Create an Account**

If you can't create an account, please try to connect ssh and reindex data again, use this command to reindex data: **php bin/magento indexer:reindex** 

Step 2:Set Customer to Panel Account

• In Backend, go to **Customers** → **All Customers**. Find and click its edit button.

	Animation Dela	ay ms	
			Margin px Padding px px px px px px px

- Block col (12 to full): Set width (%) for block on desktop, tablet and mobile screen.
- Hidden: Choose to hide the block on any resolution of desktop, tablet of mobile.
- Custom class: Add CSS class of block for styling.
- Block Animation: Animation effect of the block when page load. Click to choose one in the list.

#### • Animation Delay: Delay of animation effect

After configuring & saving block, you can see the demonstration of this element, also the group button to edit this block.

<b>Block Title</b>	
--------------------	--

- Arrows button: You can drag & drop block to change position. Remember that, the block can't be moved out section or section col.
- Pencil button: Edit settings of that block.
- Copy button: Duplicate that block
- Columns button: Shortcuts to change the Block col
- Trash button: Remove block.

#### Publish a builder page

After finishing creating and editing your cms page, click **Publish** button at the top left of the page.

Wait for the page to reload, now you can see the page is still in editing mode, but it has saved all your data.

#### <u>a</u>masty

If you want to get out of editing mode, switch off Active Builder button to see your result.

# **Product description builder**

**STEP 1:** Enable the Product Description for Builder Account In Backend, go to **Customers**  $\rightarrow$  **All Customers**. Find the customer you want to enale rule and click its **Edit** button.

#### **Duplicate product description builder template**

There are 2 ways to copy product description from a product to another product.

**METHOD 1:** Edit directly in product detail page (Backend) This way helps to duplicate the Builder's description of a product to a certain product.

• In Backend, go to **Catalog** → **Products**. Find the product that you want to paste new template and click its Edit button.

Products								C	ζ 📫 1	admin 🔻
									Add Product	•
							<b>Filters</b>	• Default	View 🗸 🏠 Co	lumns 🔻
Search by keyword	Q									_
Actions •	2046 records found						20 • per page	e <	1 of 103	3
ID ↓ Thumbnail	Name	Туре	Attribute Set	sku	Price	Quantity	Visibility	Status	Websites	Action
□ 1 <b>▲</b>	Joust Duffle Bag	Simple Product	Bag	24-MB01	\$34.00	100.0000	Catalog, Search	Enabled	Main Website	Edit
2	Strive Shoulder Pack	Simple Product	Bag	24-MB04	\$32.00	100.0000	Catalog, Search	Enabled	Main Website	Edit
3	Crown Summit Backpack	Simple Product	Bag	24-MB03	\$38.00	100.0000	Catalog, Search	Enabled	Main Website	Edit

- On Edit Product Page, choose section **Content**.
- Now you can see field **Description** with the **Copy Description Template** button, then click it.

Content

Description [store view]	Show / Hide Editor Copy Desctiption Template								
	B / 世 ## 言言言 Source: Product Id Check -								
	ĂªŒŒ®Ă\$;;;;;;;;;;;;;;;;;;;;;;;;;;;;;;;;;;;								
	Path: p								

• A box will display and allow you to enter the **Product Id** of the **Source Product**. It means that this is the product of which the description (must be built by Builder) you want to duplicate.

If the Product Id you entered exists, a select list will be shown, allow you to choose from which store view to be duplicated.

Content

Description [store view]	Show / Hide Editor	Copy D	esctiption Templ	ate		
	B / ∐ ABC   ≣ ≣ ≣	Source:	1385	From	Apply	
				From Default - ID #0 Default Store View - ID #1		
		and the B				
	Path: p					11

- Choose a store view to duplicate. They are distinguished by store view name and store view id.
- Click **Apply** button to require duplication.
- Otherwise, there is nothing changed, you should check the **Product Id** again.
- After you have done, click **Save** button at the top to finish the process.

METHOD 2: Edit directly in the list of products

This method helps to duplicate a Builder's product description to several products.

In Backend, go to Catalog → Products. In the left column, you can see a tick box for each product.

Sea	rch by key	word	Q		
Act	ions		▼ 2046 records found (3 selected)		
- 1	ID	↓ Thumbnail	Name	Туре	Attribute Set
~	1		Joust Duffle Bag	Simple Product	Bag
	2	6	Strive Shoulder Pack	Simple Product	Bag
~	3		Crown Summit Backpack	Simple Product	Bag
~	4	-	Wayfarer Messenger Bag	Simple Product	Bag
	5		Rival Field Messenger	Simple Product	Bag

- Tick on the product(s) that you want to be **Pasted** a new Builder description.
- Right below you can see the dropdown, click it and find **Copy Description Template** button. Then click it and you can see the pop up box again.

Search	h by keyword	Q	
Action	ns	<ul> <li>2046 records found (3 selected)</li> </ul>	
Delet	e		Туре
Chan	ge status	D (11) D = 0	Circula Dec duct
Upda	te attributes	Duffie Bag	Simple Product
Copy	Description Template	unan 1224 Chark	
	2	urce: 1234 Check	Simple Product
~	3	Crown Summit Backpack	Simple Product
~	4	Wayfarer Messenger Bag	Simple Product
	5	Rival Field Messenger	Simple Product
	SULLEY B		

Now, you do the work of entering the **Product Id** of the **Source Product** again. Please note once more, this is the product that has the description (built by Builder) you want to duplicate.

- If the Product Id you entered exists, a select list will be shown, allow you to choose from which store view to be duplicated.
- Choose a store view to duplicate. They are distinguished by store view name and store view id.
- Click **Apply** button to require duplication.

Searc	h by keyword	Q	
Actio	ns	<ul> <li>2046 records found (3 selected)</li> </ul>	
Delet	te		Туре
Chan	ge status	Duffle Bag	Simple Product

- **Primary Color, Secondary Color and Third Color:** Choose the 3 main color for your category tab. You can enter the hex code color directly in the blank or use color picker tool at the right.

# **Product by Attribute Block**

The Products By Attribute element helps to show products by attribute (Yes/No) with different view options (grid, list, slider, category tabs).

## **Create (Yes/No) Attribute Product**

In backend, go to **STORES** → **[Attributes] Product**. Click **Add New Attribute** button.

Complete the Basic Properties

The Basic Properties is required for an product attribute.

- Insert the Default Label to describe the attribute.
- In the Catalog Input Type for Store Owner, choose **Yes/No** of the input from a list.
- Choose **Yes** for the Value Required to ask customers to select the options before purchasing.

Complete the Advanced Properties (Optional)

- Insert the Attribute Code that is less than 30 characters and excluded spaces.
- The Scope includes Store View, Website, and Global.You will choose one of three places in your store system where the appearance of attribute is approved.
- Apply the Unique Value if you not want to share it with other products.

Insert the Field Label

- Open the Manage Title section.
- Insert the Title that is shown for the field label. In case of multiple languages supported on your store, insert the translation of the title for each view.

Complete the Storefront Properties

- Choose Yes for the Use in Search to be ready for searching the attribute.
- Allow comparing the product attributes in Product Compare if you choose Yes in the Comparable on Storefront field.
- Choose Yes in the Use for Promo Rule Conditions field to apply the product attribute for the price rules.

To make the attribute visible in catalog page listing, choose Yes in the Visible on Catalog Pages on Storefront field.

If Product Listing is supported at your store, the attribute can be appeared and used as sort parameter. Configuring that from the Used in Product Listing and Used for Sorting in Product Listing field. Save Attribute to finish all.

Reindex Data

- Login to your server with your SSH account
- Switch to apache user
- Change to magento root directory
- Run command line: php bin/magento indexer:reindex
- Run command line: php bin/magento cache:clean (if your site enable cache).

# **Create Product Attribute Builder**

If you haven't got any Instagram Shop yet, you can see an announcement like this:

- Please follow our instruction in the box by go to Admin panel > MGS > Page Builder Setting > Social > Snapppt.
- After that, you will not see Instagram Shop config anymore. Instead, everything you need to do now is to make needed settings in General Config tab.
- Finally, click **Submit** button to save your changes.
