

amasty

For more details see how the [Payment Restrictions for Magento 2](#) extension works.

Guide for Payment Restrictions for Magento 2

- Set up restrictions based on cart contents
- Display different payment methods for orders depending on Subtotal or customer attributes
- Apply restrictions depending on customer shipping address
- Use customer purchase history to decide which payment methods to show
- Hyva-compatible by default
- Hyva Checkout ready

Magento 2 Payment Restrictions extension is compatible with [Hyvä themes](#). You can find the **amasty/payrestriction-hyva-checkout** package for installing in composer suggest (Note: the compatibility is available as a part of an active product subscription or support subscription).

Troubleshooting checklist

If the rule you've just set up doesn't seem to work please check the information below first.

Make sure there are no other rules active at the same time

Restrictions from different rules can work simultaneously. It means that, for example, if you have two payment methods - **Method One** and **Method Two** - and you want to block the **Method One** with a restriction rule **A**, and the **Method Two** with a restriction rule **B** and activate both rules at the same time, then **Method One** and **Method Two** will be restricted at the same time as well.

Make sure conditions are set correctly

If a rule is configured with conditions but doesn't work, please try removing conditions you've set up. If that helped it would be a good idea to revise the conditions configuration. Please check [this article](#) to see which mistakes are made more often Conditions configuration and find out how they can be fixed.

Usage examples

Block PayPal for restricted items

[PayPal's use policy](#) disable the service when you sell, for example, ammunition. So if you are a gun

enthusiast selling products over the Internet it would wise to hide PayPal when certain products are added to a customer cart. Payment Restrictions extension is just a tool for the job.

The rule setup is very simple. We just select to block all PayPal methods...

The screenshot shows the 'SHIPPING RULES OPTIONS' sidebar on the left with 'Restrictions' selected. The main area is the 'General' tab for a rule named 'Restrict PayPal for ammo'. The 'Status' is set to 'Active'. The 'Methods' section shows a list of payment methods: 'PayPal (Braintree)', 'Paypal - Credit Card' (listed three times), and 'Paypal - PayPal Billing Agreement'. All these methods are selected, indicated by a blue background.

...when there is a product from the “Ammunition” attribute set in the cart

The screenshot shows the 'SHIPPING RULES OPTIONS' sidebar on the left with 'Conditions' selected. The main area is the 'Conditions' tab. It states: 'Apply the rule only if the following conditions are met (leave blank for all products).'. Below this, it says 'If ALL of these conditions are TRUE :'. The condition is: 'If total quantity equals or greater than 1 for a subselection of items in cart matching ALL of these conditions:'. Under this, there is a condition: 'Attribute Set is Ammunition'. There are two green plus icons below this condition, indicating more conditions can be added. The 'Backorders' section is also visible, with 'Apply the rule to' set to 'All orders'.

And that's it! PayPal will be available to use up until any product from the “Ammunition” Attribute Set is added to cart.

Extension settings overview

Extension settings are located in **Stores > Configuration > Amasty Extensions > Payment Restrictions**

General

Include tax in subtotal
[store view]

No

Use subtotal after discount
[store view]

No

- **Include tax in subtotal** - controls, whether the Tax value will be included in the Subtotal condition or not.
- **Use subtotal after discount** - works the same as setting above, but for Discount values.

Please select...

▼

- **Days of the Week** - Specify the days of the week when the rule should be activated.
- **Time From - Time To** - Specify a certain time interval during which the rule should be active.

Conditions

Apply the rule only if the following conditions are met (leave blank for all products).

If **ALL** of these conditions are **TRUE** :

If **total quantity** **equals or greater than** **1** for a subselection of items in cart matching **ALL** of these conditions: 

Category is one of 17,47 

Backorders

Apply the rule
to

All orders

- **Condition tree** - if there are some conditions, the rule will be applied only when the conditions are met. If there are no conditions set, the rule will be active all the time.
- **Backorders** - the option controls how the rule will work if there are Backorder items in the cart. When it's set to **Backorders only** the rule will work when there are only Backorder items in the cart. With the **Non backorders** the rule will be applied when there are no Backorder items. **All orders** will work regardless if there are Backorder items in the cart or not.

Choose conditions to be met, based on cart attributes, customer attributes, or use advanced conditions, when necessary.

Apply the rule only if the following conditions are met (leave blank for all products).

If ALL of these conditions are TRUE :

Please Choose a Condition to Add.
