For more details see how the [Product Management Toolkit](#) extension works.

Guide for Product Management Toolkit for Magento 2

Make your product management workflow maximally effective. Process products in bulk and upgrade your catalog presentation to increase conversions and reduce manual work.

- Extend product grid functionality: apply precise filtering and add extra columns
- Use mass product actions
- Upload product attachments and adjust their frontend display
- Manage attachments via API
- Create multiple product options templates

The solution has 3 variations: **Lite**, **Pro** and **Premium**.

Let's find out the scope of features for each pack.

Product Management Toolkit Lite

The Lite version includes the features to simplify product editing and the functionality to create product attachments.

Extended Product Grid with Editor

With the advanced product grid, you can add extra columns, update data right from the grid (including prices, categories and even thumbnails) and apply the extended filtering.

Key features:

- Add extra attributes-based columns to the grid
- Filter items by custom parameters
- Edit product data from the grid using AJAX
- Create custom grid templates
- Update prices and quantities from the grid
- Auto-change goods availability based on quantity
- Use with Magento Enterprise splitted databases

3		Crown Summit Backpack	Gear Gear/Bags	\$38.00	100	Black	24-MB03		Simple Product	1	Main Website	In Stock		Product Link	0	Edit
4		Wayfarer Messenger Bag	Gear Gear/Bags Collections Collections/New Luma Yoga Collection	\$45.00	97	Black	24-MB05		Simple Product	1	Main Website	In Stock		Product Link	3	Edit
5		Rival Field Messenger	Gear Gear/Bags	\$45.00	100	Black	24-MB06		Simple Product	1	Main Website	In Stock		Product Link	0	Edit

To configure the general grid settings, navigate to **Stores → Configuration → Amasty Extensions → Product Grid**.

Configure the grid itself in the **Catalog → Inventory → Products** section. Expand the **Columns** dropdown to customize grid display and editing options.

See the detailed description of the available configuration [in this guide](#).

Product Attachments

Equip your product and category pages with all required information about the items you offer. Display manuals, licenses, warranties, promo documentation and other downloadable information on any page of your store. Import files in bulk and attach them to multiple products at once.

Key features:

- Upload 25+ file types
- Assign the same file to multiple products, categories and CMS pages to avoid database overload
- Use the built-in or add custom file icons
- Add files to customer accounts and transactional emails according to order statuses
- Boost sales with a mobile-ready design and Magento B2B compatibility

Check all features of this component and their configuration [in this guide](#).

Product Management Toolkit Pro

The **Pro** version of the pack includes the features for mass management and is tailored to speed up product updating as much as possible. All **Lite** features included.

Mass Product Actions

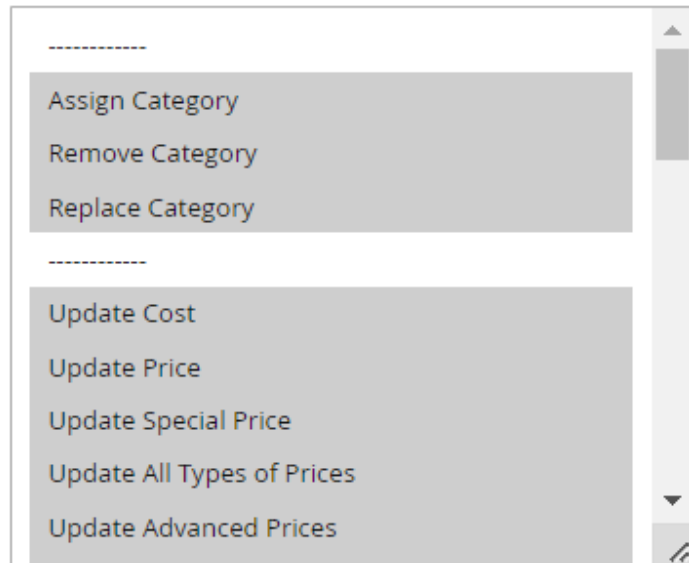

This component lets you edit all product-related information in bulk. Change prices, modify and spread attributes, duplicate custom options and images, set related products, cross-sells and up-sells. Apply routine actions to multiple products and save time.

- Modify price and customize price rounding for multiple products
- Duplicate attributes, custom options, and product images
- Mass delete products in a mouse click
- Create product relations, up-sells and cross-sells
- Configure the product grid and adjust mass actions

To configure the available mass actions, navigate to **Stores → Configuration → Amasty Extensions → Mass Product Actions**.

General

Enabled Actions [global]

Press CTRL+mouse to select multiple values.

Price Rounding [store view]

Copy Attributes [website]

Please specify comma separated attribute codes like short_description, meta_keyword, meta_title, etc

Replace in Attributes [website]

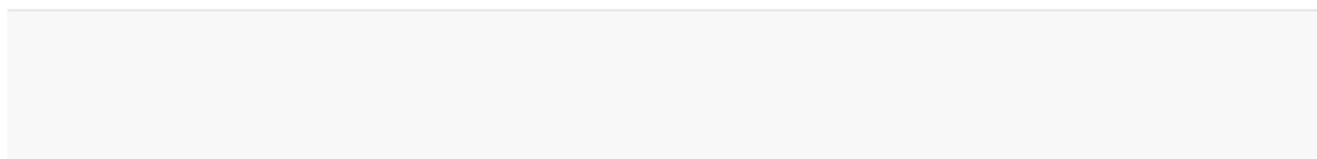

Please specify comma separated attribute codes like short_description, meta_keyword, meta_title, etc

Append Text Position [website]

Mode to Select Categories [website]

To apply the actions, go to **Catalog** → **Inventory** → **Products** and expand the **Actions** dropdown.

2046 records found

Actions				Attribute Set
<input type="checkbox"/>	7	Impulse Duffle		Bag
<input type="checkbox"/>	8	Voyage Yoga Bag		Bag
<input type="checkbox"/>	9	Compete Track Tote		Bag

The image shows a screenshot of a product management interface. At the top, it says '2046 records found'. Below this is a table with columns for 'Actions', a selection column, a product name column, and an 'Attribute Set' column. A dropdown menu is open over the 'Actions' column, listing several options: 'Update Price', 'Update Special Price', 'Update All Types of Price', 'Update Advanced Prices', 'Modify Special Price using Price', and 'Modify Price using Cost'. The table rows show product names like 'Impulse Duffle', 'Voyage Yoga Bag', and 'Compete Track Tote', all with an attribute set of 'Bag'.

Explore the detailed configuration guide for this extension [here](#).

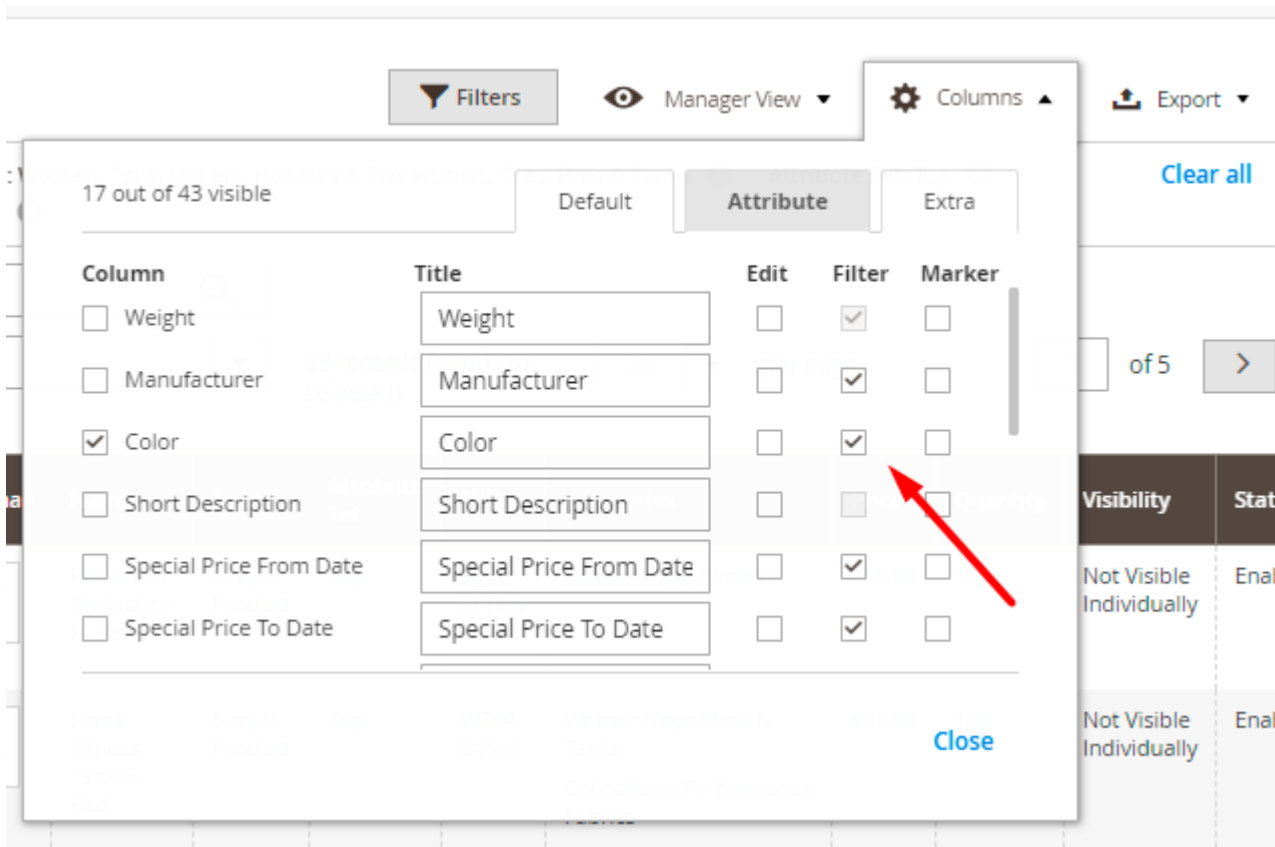

Mass Actions + Extended Product Grid: Use Case

These two extensions can perfectly work together and help you complete routine tasks quicker, e.g. filter items using the extended grid and update them in bulk using mass action.

How it works:

For example, you want to add +10\$ to the prices for all red women blouses in your store (prices are different for blouses, but anyway you want to rice each price by 10\$). Let's see how you can do it:

Step 1. Configure the necessary grid view and activate filters. In our case, we need category, attribute set and color filters. Enable new filters in a *Columns* dropdown.

Step 2. Expand the *Filters* section and choose the necessary values.

<input type="checkbox"/>	ID	Thumbnail	Name	Type	Attribute Set	SKU	Categories	Price	Quantity
<input type="checkbox"/>	1282		Riona Full Zip Jacket-M-Red	Simple Product	Top	WJ05-M-Red	Women/Tops/Jackets	\$60.00	100
<input type="checkbox"/>	1727		Nona Fitness Tank-S-Red	Simple Product	Top	WT04-S-Red	Women/Tops/Bras & Tanks Collections/Performance Fabrics Default Category	\$39.00	100
<input type="checkbox"/>	1448		Layla Tee-XL-Red	Simple Product	Top	WS04-XL-Red	Women/Tops/Tees Promotions/Tees Collections/New Luma Yoga Collection Collections/Eco Friendly Default Category	\$29.00	100

Step 3. Tick all or select the products that you need.

Step 4. Expand the *Actions* dropdown and apply 'Update Price'. Add +10\$ to each blouse price.

Attachments in Category

Add Attachments

Category Name - specify the category title that will be displayed on both backend and frontend.

Icon - upload an icon that will be displayed before the title.

Please, keep in mind that the image will be resized to 50×50 px. Allowed file types: **jpg, png, jpeg, bmp**. Gif can have only one frame.

Is Visible - set to Yes to show the category on the storefront.

Assing Files to Categories - choose the files suitable for the category.

API for Product Attachments

With the Pro pack, you can manage product files using API. The basic backend operations let you view, upload, edit and delete files.

In Postman the queries are the following:

- **GET**
- **POST**
- **PUT**
- **SEARCH**
- **DELETE**

Find out more about the backend and frontend API operations [in this guide](#).

Product Management Toolkit Premium

The Premium version includes a complex frontend solution to equip products with customizable options. Provide shoppers with related items and services to offer an outstanding experience and increase the average order value.

Key features:

- Easily offer extra products and services
- Customize options with image, text and color swatches
- Configure smart option dependencies
- Quickly assign option templates to multiple products
- Add free and paid accompanying items to products
