For more details see how the Quick Order for Magento 2 extension works.

Guide for Quick Order for Magento 2

Boost B2B sales and increase repeated purchases with Magento 2 Quick Order extension. Enable buyers to quickly order multiple products without visiting numerous web store pages.

- Enable instant product search by SKU/Name
- Create order lists by inserting multiple SKUs
- Let customers place orders via CSV and XML files
- Enable buyers to specify custom product options
- Provide convenient quick order UX on mobile
- Compatible with Amasty Request a Quote, Hide Price and Pre Order extensions

The extension is compatible with **Hyvä Theme**. You can find the 'amasty/module-quick-order-hyva' package for installing in composer suggest. The compatibility is available as a part of an active product subscription or support subscription.

General Settings

<u>a</u>masty

General

Enabled [store view]	Yes 💌
URL Key [store view]	quick-order
Label [store view]	Based on Website Base URL. If left empty, default 'quick-order' is used. Quick Order
	Here you can name the functionality the way you would like it to be displayed on the storefront. If left empty, default Quick Order is used.
Display Link in [store view]	Page Header Top Menu Page Footer Choose where to display a link.
Disable for Customer Groups [store view]	Not Logged In General Retailer Wholesale

Chosen customer groups won't be able to Quick Order.

Enabled - Set 'Yes' to enable the extension for this store.

URL Key - Specify custom URL here. If left empty, the default 'quick-order' URL key is used.

Label - Specify a custom name for your Quick Order page here. If left empty, the default Quick Order is used.

Display Link in - Choose places where the link to your Quick order page will be displayed on the frontend. The available places for display are page header, top menu, and page footer.

Here's an example of the link displayed in the header and top menu. If you customize page Label, you'll see the changes here as well.

	Default welcome msg!	Place a Quick Order	Sign In or Cr	eate an Account

ush It Messenger Bag	24-WB04	Add Mult	tiple Produc	ts
		Use new line for each	separate SKU. Add	i just SKUs
Here's the example of	the link display in the foote	er.		
About us Customer Service	Search Terms Privacy and Cookie Policy Advanced Search Orders and Returns Contact Us Place a Quick Order		Enter your email addres:	s Subscribe

Disable for Customer Groups - Chosen customer groups won't be able to use the Quick Order page functionality.

Max Search Results [store view]	10
	Limit a maximum number of search results to show in autocomplete popup. For better performance we do not recommend to use large numbers here.
Number of Items to Display Pager [store view]	7
Allowed QTY of Items to Add [website]	100
	Limit the quantity of items to be added to quick order grid. To avoid excess load on the server we recommend 100 as maximum qty.
Disable File Upload for Customer Groups [store view]	Not Logged In
	General
	Retailer
	Wholesale
	Chosen customer groups won't be able to add products to Quick Order grid from file. You can use this option to limit file uploading by not logged in users.

Max Search Results - Limit a maximum number of search results to show in the AJAX search. For better performance, we do not recommend using large numbers here.

For better search experience in autocompleting suggestions try using the **Elastic Search for Magento 2** extension.

Number of Items to Display Pager - Here you can limit the number of product lines to be shown on one page before pagination appears for more convenience. Then your customers will see only this number of products per each page within your product list.

Allowed QTY of Items to Add - Limit the number of items to be added to the quick order grid. To avoid excess load on the server we recommend 100 as maximum qty.

Disable File Upload for Customer Groups - Chosen customer groups won't be able to add products to the Quick Order grid from file. You can use this option to limit file uploading by not logged in users.

Please note that if you've previously disabled some of the customer groups (read more about the configuration above), it automatically won't be shown in the list for disabling file upload for customer groups.

Disable for Customer Group [store vie	Not Logged In	
	General	
	Retailer	7
	Wholesale	
	Chosen customer groups won't be able to Quick Order.	
Max Search Resul [store vier	ts 10	
	Limit a maximum number of search results to show in autocomplete popup. For better performance we do not recommend to use large numbers here.	
Number of Items to Display Page [store view]	er 7	
Allowed QTY of Items to Ad	ld 100	
	Limit the quantity of items to be added to quick order grid. To avoid excess load on the server we recommend 100 as maximum qty.	
Disable File Upload for Customer Group [store view	Not Logged In	
	General	
	Wholesale	•
	Chosen customer groups won't be able to add products to Quick Order grid from file. You can use this option to limit file uploading by not logged in users.	
Show Request a Quote Button [store view]	/es	
lf e iter	nabled, customers will be able to request a quote for the list of addee ms right from Quick Order page.	d
Allow Customer to Download the List [store view]	/es	
Set in .	'Yes' to let customers download the list of items added to Quick Orde	er grid

Allow Customer to Download the List - Set '*Yes*' to allow customers to download the quick order lists they create right from the Quick Order page. The files will be created in CSV format.

Show Request a Quote Button - This setting becomes available if you also have Request a Quote by Amasty installed. Set '*Yes*' to make the Request a Quote button and the Quote Cart always visible on the front. Thus, if enabled, customers will be able to request a quote for the list of added items right from the Quick Order page.

Table Category Mode

The Table Category Mode is currently not compatible with the Hyva Theme, but we are actively working on a fix.

Table Category Mode

Enable [store view]	Yes	
Disable for Selected Customer Groups [store view]	Not Logged In	
	General	
	Retailer	
	Wholesale	
	Chosen customer groups will not be able to see and use Table Mode on category pages.	_//

Enable Table Category Mode - Set '*Yes*' to update the display of the product list on catalog pages. Thus it acquires the functionality similar to the quick order page.

See how this setting changes the frontend display on a category:

Disable for Selected Customer Groups - with this setting you can disable this special category display (table category mode) for certain customer groups. Chosen customer groups will not be able to see and use Table Mode on category pages.

Choose categories where Table Mode is unavailable.

Disable for Categories - here you can select categories where Table Mode is unavailable.

Replace Default List Modes - this allows choosing from one of three modes for a table category mode:

- Set 'Yes' to hide default List/Grid modes on chosen categories.
- Set 'No (and use Table Mode as default)' to enable switching between the default Magento category view and the upgraded category page display (Table Mode) with the Table Mode as default.
- Set '*No (but use default settings)*' to enable switching between the default Magento category view and the upgraded category page display (Table Mode) with the original Magento category page display as default.

See how to switch between the available category display modes on the frontend:

9/20

1 2 >			Show 10 ∨ pe 5 10 15 20	r page
Search Terms Privacy and Cookie Policy Advanced Search Orders and Returns Contact Us Place a Quick Order			Enter your email address Subscr	ribe

Products per Page on Grid Default Value - set the default value for the dropdown which is equal to the number of products to be displayed on a category page.

Apply to Search Results Page - Set 'Yes' to apply the upgraded category display (Table Mode) for the search results page.

See how this configuration will be displayed on the front:

Compatibility with Request a Quote

This extension is compatible with the Request a Quote for Magento 2 by Amasty. To use both extensions together, please install the Request a Quote extension.

Compatibility with the Request a Quote extension allows you to add selected products to a quote from the Quick Order page or the table category mode page, enabling the request for special purchasing conditions. See below how the Request a Quote's functionality looks on the Quick Order Page.

🔇 LUMA	Search entire store here Q

You have no items in y	our wish							

Compatibility with Hide Price

The Quick Order extension is compatible with the Hide Price for Magento 2 by Amasty. To use these two extensions together, both the Quick Order and Hide Price extensions must be installed.

Compatibility with the Hide Price extension allows you to hide product prices and Add to Cart buttons for specific products displayed in table category mode or on the Quick Order page, based on the settings you configure.

See the example below how this functionality looks on the frontend (table category mode page).

Hoodies & Sweatshirts

Compare Products		Size	Colo	r				
You have no items to compa	are.	XS S	M L XL					

Please note, that the settings "Hide 'Add to Wishlist'" and "Hide 'Add to Compare'" will not affect the table category mode.

A short use-case:

- If you set the 'Hide Price' setting to 'Yes' and 'Hide Add to Cart' to 'No' in the Hide Price extension settings, the products will be displayed with the price hidden, but they can still be added to the cart using the general Add to Cart button.
- If you set both 'Hide Price' to 'Yes' and 'Hide Add to Cart' to 'Yes', the product prices will be hidden, and these products cannot be added to the cart.

This feature is currently not compatible with the Hyva Theme, but we are actively working on a fix.

Compatibility with Pre Order

The Quick Order extension is compatible with the Pre Order for Magento 2 by Amasty. To use the functionality, both extensions must be installed.

The compatibility allows you to:

- Display Amasty Pre Order statuses in the table category mode (compatibility with Pre Order)
- Adjust the possibility of adding both pre-order products and the products with other Backorder settings to the cart (compatibility with Preorder Pro Mixed Cart feature).

See the example below how this functionality looks on the frontend:
