For more details see how the [Quick View](#) extension works.

Guide for Quick View for Magento 2

Let customers preview product information and add necessary items to cart right from the quick view window on a category page.

- Preview product info on a category page
- Add products to cart from the quick view window
- Write and submit reviews from the preview pop-up
- Customize quick view button
- Improve product browsing process

The extension is compatible with the **Hyvä Theme**. You can find the 'amasty/module-quickview-hyva' package for installing in composer suggest. Note: the compatibility is available as a part of an active product subscription or support subscription.

Quick View Settings

General

Enable Quick View <small>[store view]</small>	Yes
Quick View Button Text <small>[store view]</small>	QUICK VIEW
Custom CSS Styles for Hover Block <small>[store view]</small>	background-color: DarkOrange
Close Popup after Add to Cart <small>[store view]</small>	No
	Available for Magento 2.2 and Higher
Use Fancybox Library <small>[store view]</small>	Yes
	Set 'No' if Fancybox is already used on your site.

Enable Quick View - Switch to Yes to activate the extension.

Quick View Button Text - Specify any text for a quick view button.

Custom CSS Styles for Hover Block - This feature enables you to customize the Quick View button. You can specify button *color*, *size* and *other parameters* with a standard CSS formatting.

Close Popup after Add to Cart - Specify whether close or not the quick view pop-up after adding a product to cart. This option is available only for Magento 2.2 and higher.

Use Fancybox Library - Set to 'Yes' to use Fancybox Library. Choose 'No' if Fancybox is already used on your site.

DOM Selectors

Product Item <small>[store view]</small>	<input type="text" value=".products .product-item, .product-item"/>
	Specify DOM-selector(s) for Product Item
Product Container <small>[store view]</small>	<input type="text" value=".product-image-container"/>
	Specify DOM-selector(s) for Product Container
Product Image <small>[store view]</small>	<input type="text" value=".product-image-photo"/>
	Specify DOM-selector(s) for Product Image
Product Image Container <small>[store view]</small>	<input type="text" value=".item, .product-item"/>
	Specify DOM-selector(s) for Product Image Container
Product Add To Cart Form <small>[store view]</small>	<input type="text" value="#product_addtocart_form"/>
	Specify DOM-selector(s) for Product Add To Cart Form

In this tab, you can specify the DOM-selectors for Product Item, Product Container, Product Image, Product Image Container and Product Add To Cart Form.

Save Config - Click here save configuration settings.

A sample of a hover block with the *Quick View* button on a category page.

Diva Gym Tee
★★★★★ 3 reviews
\$32.00

Q QUICK VIEW

Karissa V-Neck Tee
★★★★★ 3 reviews
\$32.00

Add to Cart

Tiffany Fitness Tee
★★★★★ 3 reviews
\$28.00

A sample of a customized *Quick View* button with specified background-color: orange.

Affirm Water Bottle
★★★★★ 1 review
\$7.00

Q QUICK VIEW

Sprite Yoga Companion Kit
From \$61.00
To \$77.00

Add to Cart

Harmony Lumaflex™ Strength Band Kit
★★★★★ 3 reviews
\$22.00

Here is a pop-up preview window sample. On the popup, you can perform any regular actions like on a product page.

The screenshot shows a product quick view window for a 'Desiree Fitness Tee'. On the left, there is a main image of a woman wearing the black t-shirt and light blue shorts, with three smaller thumbnail images below it showing different views of the t-shirt. On the right, the product title 'Desiree Fitness Tee' is displayed, followed by a 4-star rating (3 reviews) and a price of '\$24.00'. The status 'IN STOCK' and SKU# 'WS05' are also shown. Below the price, there are dropdown menus for 'Color' and 'Size', both currently set to 'Choose an Option...'. A quantity selector is set to '1', and a blue 'Add to Cart' button is prominent. At the bottom right of the product area, there are 'COMPARE' and 'EMAIL' icons. Below the product area, there are three tabs: 'Details', 'More Information', and 'Reviews (3)'. The 'Details' tab is active, showing a paragraph of text and a bulleted list of features: 'Short-Sleeves', 'Performance fabric', and 'Machine wash/line dry'.

How to delete a block from a Quick View window?

1. Open a file, which is responsible for the hints' display.

```
vendor/magento/module-developer/Model/TemplateEngine/Decorator/DebugHints.php
```

2. Find a function:

```
_renderBlockHints
```

A sample:

```
protected function renderBlockHints($blockHtml, \Magento\Framework\View\Element\BlockInterface $block)
{
    $blockClass = get_class($block);
    $block->getNameInLayout();
    return <<<HTML
<div class="debugging-hint-block-class" style="position: absolute; top: 0; padding: 2px 5px; font: normal 11px
{$blockHtml}
HTML;
}
```

3. Replace a line -

```
$blockClass = get_class($block);
```

with the following one:

```
$blockClass = $block->getNameInLayout();
```

A sample:

```
protected function _renderBlockHints($blockHtml, \Magento\Framework\View\Element\BlockInterface $block)
{
    $blockClass = $block->getNameInLayout();
    return <<<HTML
<div class="debugging-hint-block-class" style="position: absolute; top: 0; padding: 2px 5px; font: normal 11px
{$blockHtml}
HTML;
}
```

4. Next, go to Admin Panel > Stores > Configuration > Advanced > Developer > Developer Client Restrictions

- Input your **IP** to prevent hints' display for all users.
- Navigate to **Debug** section.
- Set to Yes **Enabled Template Path Hints for Storefront**
- Set to Yes **Add Block Names to Hints**
- Save Config

A sample:

Developer Client Restrictions

Allowed IPs (comma separated)
[store view]

213.184. . .

Leave empty for access from any location.

Template Settings

Debug

Default editor for whoops
[global]

Select default editor

Enabled Template Path Hints for Storefront
[store view]

Yes

Enabled Template Path Hints for Admin
[global]

No

Add Block Names to Hints
[store view]

Yes

Log to File
[global]

No

Not available in production mode.

5. Go to the front-end, open a catalog page with the quick views:

- Find a name of a block you want to remove;
- Copy this block's name (displayed in dark blue)

[A sample:](#)

6. Open a file, which is responsible for a quick-view's display:

```
app/code/Amasty/Quickview/view/frontend/layout/amasty_quickview_ajax_view.xml
```

Before a line:

```
</body>
```

Add one more line:

```
<referenceBlock name="{{block}}" remove="true">
```

Input a block's name, that you want to remove, instead of a **block**, for instance **product.info.media.image**

Save changes.

```
<page xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xsi:noNamespaceSchemaLocation="urn:magento:framework:View/Layout/etc/page_configuration.xsd">
  <head>
    <css src="Amasty_Quickview::css/amquickview_page.css"/>
  </head>
  <body>
    <referenceContainer name="content">
      <block name="amasty-quickview.js" class="Amasty\Quickview\Block\Page" before="-" />
    </referenceContainer>
    <referenceContainer name="footer-container" remove="true"/>
    <referenceContainer name="page.top" remove="true"/>
    <referenceContainer name="header.container" remove="true"/>
    <referenceContainer name="header" remove="true"/>
    <referenceBlock name="menu" remove="true"/>
    <referenceBlock name="copyright" remove="true"/>
  </body>
</page>
```

7. Go to **Admin Panel > Stores > Configuration > Advanced > Developer** to disable hints:

- Navigate to **Debug** section.
- Set to **No Enabled Template Path Hints for Storefront**
- Set to **No Add Block Names to Hints**
- Save Config, and flush the Cache.

8. Go to the front-end to see the results.
