

amasty

For more details see how the [RMA](#) extension works.

Guide for RMA for Magento 2

Manage product returns and exchanges effectively with the powerful RMA for Magento 2 module. Make these processes simple and enhance your customer service.

- Use RMA for all or specific types of products
- Set unique return reasons, rules, and resolutions
- Customize RMA statuses
- Provide customers with understandable instructions
- Enable guest requests
- Activate notifications and use live chat to interact with customers
- Add custom fields
- Let users rate you return system

Important! Though we did our best to transfer all the data from the old version to the new one while updating, please keep in mind that 2.0.0 version is an absolutely new extension. Don't forget to make a full backup and test it on a staging site first.

Magento 2 RMA extension (standard version) is compatible with [Hyvä themes](#). You can find the **amasty/module-rma-hyva** package for installing in composer suggest (Note: the compatibility is available as part of an active product subscription or Support Subscription). For the correct Hyvä compatibility work, the GraphQL module (**amasty/rma-graphql**) should also be installed.

Explore our internal [Knowledge Base](#) to gain even more valuable insights and uncover answers to popular questions about the configuration and features of the Magento 2 RMA extension.

Return Request Creation

Customers can create requests right from their accounts in 2 ways.

It can be done right in the **My Orders** tab.

My Orders

Order #	Date	Order Total	Status	Action
000000029	5/3/21	\$146.14	Pending	View Order Reorder
000000028	5/3/21	\$55.88	Processing	View Order Reorder
000000027	5/3/21	\$81.19	Complete	View Order Reorder Return
000000026	4/28/21	\$59.54	Complete	View Order Reorder Return
000000025	4/28/21	\$79.28	Complete	View Order Reorder
000000024	4/28/21	\$79.28	Complete	View Order Reorder Return
000000023	4/28/21	\$104.59	Complete	View Order Reorder Return
000000015	9/16/19	\$26.65	Closed	View Order Reorder
000000014	9/6/19	\$214.34	Closed	View Order Reorder

Also, they can view and manage all requests in the **My Returns** tab and select the order they want to return.

After choosing the order to return, a customer needs to specify the most important info about the request.

By the way, it is possible to open the 'My Returns' tab directly from the header block.

An admin can create return right from the backend. Just open the necessary order and click **Create return**.

Return Reasons

For customers, it is allowed to create requests according to return reasons store admins create in the backend settings.

Return Rules

With the extension, you can set various return rules for all the products in your store. Customers will

see it on product pages in the More Information tab and in their shopping carts (if these options are enabled in the [general setting](#)).

The screenshot displays the product page for the 'Didi Sport Watch' on the LUMA website. The page layout includes a navigation menu with categories like 'What's New', 'Women', 'Men', 'Gear', 'Training', and 'Sale'. The breadcrumb trail is 'Home > Gear > Watches > Didi Sport Watch'. The product is shown with a black and white digital watch. The price is \$92.00, and it is marked as 'IN STOCK' with SKU# 24-WG02. There are 2 reviews and an 'Add Your Review' link. The 'Add to Cart' button is prominent. Below the product, there are options to 'ADD TO WISH LIST', 'ADD TO COMPARE', and 'EMAIL'. The 'More Information' tab is active, showing the following details:

Details	More Information	Reviews (2)
Activity	Gym, Athletic	
Material	Metal, Rubber, Silicone	
Gender	Women	
Category	Electronic, Exercise, Timepiece	
Repair period	90 days	
Return period	60 days	
Exchange period	60 days	

If some products are non-refundable in your store, customers will not be able to create return

requests. Thus, you won't have to handle these requests manually.

Returns: how it works

Your request has been created and is pending approval. Store administrators will check it and inform you if the product(s) can be sent back. In case any details are needed, we will contact you. Please wait for further instructions.

Items

	Product Details	Return Details	Item Status
	Aim Analog Watch SKU: 24-MG04 Qty: 1	Return Reason: Wrong Product Description Items Conditions: Unopened Return Resolution: Exchange Store pays for Shipping.	Processing

There are 5 possible states: Processing, Approved, Delivered, Completed (these states are displayed in a customer’s progress bar) and Canceled.

Every RMA request usually passes 4 basic statuses:

- **Processing** - a request is processed by an admin.
- **Approved** - an admin approves that a customer is allowed to send the item back to the store.

- **Delivered** - an admin receives the package and checks if everything is OK.
- **Completed** - an admin resolves the request.

In some cases, a request can be **Rejected** - an admin rejects the request or a customer cancel it if no longer needed.

We display the current state of the request to the customer on the progress bar of the request page. But before the request reaches each particular state, it can have several statuses, e.g. *'Need Details'*. With the extension, you can create as many statuses as you need and customize the conditions according to which the request will get to the next state.

To manage all the statuses, please go to **Admin Panel → Sales → RMA Settings → RMA Statuses**.

Click the field to choose color.

Position

Enable the status.

Title - specify the title of the status that will be displayed in the backend settings.

Request State - assign the necessary request state to the status. An appropriate request state will be displayed on the progress bar on the frontend when the status is set for the request.

Is Initial Status - activate this option if you want to automatically assign all new requests to this status. Please mind that there can be only one initial status.

Automatically Set Status on Event - when a customer performs the selected action in his RMA request, the status of the request is automatically updated to the current one.

Move Request to Grid - when a request switches to the current status, it is moved to the grid selected in this option. Thus, an admin can create a comfortable for him workspace by removing all unnecessary requests from the particular grid or placing requests that need admin actions to the separate '*Manage Requests*' grid. This kind of workflow allows to save admins' time and effort since they can see all the requests they need to approve on a separate grid.

There are 3 available grids:

- **Manage Requests grid** - all the requests that need admin actions are placed here.
- **Customers' Pending Requests** - the requests that need some details or action from a customer are moved to this grid.
- **Archived Requests** - the requests that are resolved or rejected and do not need any actions from both admins and users are placed here.

Label Color - choose the color for the state to simplify its processing. Click the field to use a handy color-picker tool.

Position - set the position of the status among the other statuses.

Returns: how it works

So your return request got approved. That's a win!

What's next? To return your purchase to domain.com, follow the step-by-step instructions below.

1. Print the packing slip and shipping label simply by clicking the buttons below.

[Print Packing Slip](#) [Download Shipping Label](#)

- 2. If possible, put your purchase(s) in the original package. We remind you that only returns that are in good condition are refunded. Prior to sending your return, make sure you've removed all additional labels from the package. Then put the packing slip you've printed into the package.
- 3. Now place the shipping label you've printed onto the package.
- 4. You should send the package with a pre-paid traceable method like Insured Parcel Post or UPS.

NOTE: Some charges are non-refundable. We don't return Shipping and Handling costs, gift box costs and other charges.

The instructions are added during a new status creation with the WYSIWYG editor.

So your return request got approved. That's a win!

What's next? To return your purchase to domain.com, follow the step-by-step instructions below.

1. Print the packing slip and shipping label simply by clicking the buttons below.

magento widget magento widget

2. If possible, put your purchase(s) in the original package. We remind you that only returns that are in good condition are refunded. Prior to sending your return, make sure you've removed all additional labels from the package. Then put the packing slip you've printed into the package.

In addition to this, you can add special widgets that are necessary for advanced RMA process: **Shipping Label Button** and **Packing Slip Button**.

Shipping Label allows improving the customers shopping experience in cases when a store is supposed to pay for shipping. A user just needs to press the button and download a shipping label. **Packing Slip** is also generated automatically to make the shipping process even easier for a customer.

If a customer is supposed to pay for shipping, he should add tracking numbers by himself.

Configuration

To adjust the basic RMA setting, go to **Admin Panel** → **Stores** → **Configuration** → **RMA**.

Expand the **General** tab.

General Settings

General

Module Enabled
[store view] ▼

URL Prefix
[store view]

Set route name. Example for logged in user:
`{base_store_url}/{URL prefix}/account/view/request/`

Module Enabled - select Yes to enable the extension.

URL Prefix - specify the prefix that will be used for a route name.

Example for the registered customers:

```
{base_store_url}/{URL prefix}/account/view/request/
```

For guests:

```
{base_store_url}/{URL prefix}/guest/login/
```

Allow Guest RMA <small>[store view]</small>	<input type="text" value="Yes"/>  
Confine Guest RMA to the Current Store View <small>[store view]</small>	<input type="text" value="Yes"/>  <small>When enabled, guests are only allowed to create RMA requests for orders made from the current store view. RMA for orders from other store views will not be available.</small>
Hide Billing Last Name from Guest RMA Form <small>[store view]</small>	<input type="text" value="Yes"/>  <small>When enabled, a guest RMA form only required customer order ID and customer email or zip code.</small>
Allowed Order Statuses for RMA <small>[store view]</small>	<div style="border: 1px solid #ccc; padding: 5px;"><p>-- Please Select --</p><p>Pending</p><p>Processing</p><p>Suspected Fraud</p><p>Complete</p><p>Closed</p><p>Canceled</p><p>On Hold</p></div>

Please, note that RMA request can not be created for orders without shipped item(s)

Allow Guest RMA - choose Yes if you want to allow your guest visitors to submit return requests as well.

Confine Guest RMA to the Current Store View - when enabled, guests are only allowed to create RMA requests for orders made from the current store view. RMA for orders from other store views will not be available.

Hide Billing Last Name from Guest RMA Form - set to Yes if you want to hide the Billing Last Name field on the RMA form, allowing guests to submit RMA requests using only the order ID and customer email or zip code.

Allowed Order Statuses for RMA - select order statuses for which RMA will be allowed.

This is how RMA looks like for a guest visitor (with the **Hide Billing Last Name from Guest RMA Form** enabled):

Display Return Information on Product Page ?
[store view]

Display Return Information on Shopping Cart Page ?
[store view]

Ask Customers to Leave Feedback ?
[store view]

Max Message Attachment File Size (KB)
[global]

Display Return Information on Product Page - if Yes, resolution periods (in days) will be displayed on product details pages in the 'More Information' tab.

Display Return Information on Shopping Cart Page - if Yes, resolution periods (in days) will be displayed for each product in the shopping cart.

Ask Customers to Leave Feedback - set Yes to provide your customers with the ability to leave

feedback, or just set *No* to disable 'How do you rate the work of a manager' pop-up.

If enabled customers will see the 'How do you rate the work of a manager' pop-up in the request after it changes its State to 'Completed'. The feedback consists of the rating stars and text. The rating can be later seen and used in the filter on the 'Archived Requests' grid. As well as it is used in the RMA Reports Add-on.

Max Message Attachment File Size (KB) - limit the size of allowed attachments if needed.

RMA Policy

With the extension, you can create your own return policy and display it to customers to make your RMA maximally clear.

Configuration

RMA Policy

Enable Return Policy
[store view]

Return Policy CMS Page
[store view]

Enable Return Policy - if Yes, a customer will have to accept the Return Policy before submitting a Return Request.

Return Policy CMS Page - select the CMS magento orders and returns page to redirect your customers to.

The example of RMA Policy on the frontend:

RMA Custom ID Number (PRO and PREMIUM)

In the RMA Custom ID Number tab, you can customize the display of RMA request numbers.

RMA Custom ID Number

Enabled <small>[store view]</small>	Yes	▼
Number Format <small>[store view]</small>	RMA- <code>{yy}</code> - <code>{mm}</code> - <code>{dd}</code> - <code>{rma_id}</code>	
	You can use variables <code>{rma_id}</code> , <code>{store}</code> , <code>{yyyy}</code> , <code>{yy}</code> , <code>{m}</code> , <code>{mm}</code> , <code>{d}</code> , <code>{dd}</code> . If you type RMA- <code>{yy}</code> - <code>{mm}</code> - <code>{dd}</code> - <code>{rma_id}</code> in the field, you will have RMA numbers of the kind: RMA-13-08-15-1	
RMA ID Padding <small>[store view]</small>	6	
	Total number of digits in the RMA number. If the RMA id is 24 and padding is 6, the result will be 000024. Leave 0 (zero) not to add leading zeros.	

Please note that the RMA Custom ID Number functionality is available only as a part of an active

product subscription or support subscription for RMA Pro and RMA Premium extension versions.

Enable - set to Yes to customize the RMA request numbers.

If enabled, the customized RMA request numbers will be displayed on the Manage Requests grid, Customers' Pending Requests grid, Archived Requests grid, in the customer account (My Returns tab), and in emails.

Number Format - specify the RMA number format to replace the default format.

To ensure the uniqueness of the RMA request numbers, consider using various variables. Please refer to this list to find the necessary ones:

- `{rma_id}` for RMA ID;
- `{store}` for store ID;
- `{yyyy}` for full year display;
- `{yy}` for shortened year display;
- `{m}` for short month display;
- `{mm}` for full month display;
- `{d}` for short day display;
- `{dd}` for full day display.

For instance, if `RMA-{yy}-{mm}-{dd}-{rma_id}` is specified in the Number Format field, you will have RMA numbers of the kind: RMA-13-08-15-1.

RMA ID Padding - specify the total number of digits in the RMA ID number. If you want all RMA ID numbers to have 6 digits, set the padding to 6. For example, if the RMA ID is 24 and the padding is 6, the result will be '000024.' Leave it as '0' (zero) to avoid adding leading zeros.

Shipping

Expand this tab to adjust the carriers that will be available for a customer to be selected while attaching a Tracking Number to the RMA Request.

<input type="text" value="bank_code"/>	<input type="text" value="Bank IFS C Code"/>	
<input type="text" value="account_number"/>	<input type="text" value="Bank Account Nur"/>	
<input type="button" value="Add"/>		

The **Block Title** field is responsible for the name of the block with the custom text fields. Also, specify fields' codes and labels.

Chat Quick Replies

In this field, you can prepare quick replies and use them while managing return requests. It allows to save managers' time and automate RMA processing even more.

Enable Chat on the Frontend - choose whether you want to enable or disable chat on the frontend.

Please note that even if you disable chat on the frontend in general settings, you'd be still able to see this chat on the backend. Thus, your customers won't be able to communicate with you until you enable the chat again.

In case your customers have their email notifications enabled, then they would get your comments from the chat on their email even though the chat is disabled on the frontend.

RMA Export (PRO and PREMIUM)

The extension includes a part of **Export Orders** solution. It means that you can export any RMA requests using the simplified export UI.

Navigate to **System → Amasty Export → Export**.

Choose the required entity and configure export settings.

Main features you can use:

- Choose 1 of 6 available file types (CSV, XML, ODS, XLSX, JSON, Template)
- Specify output option (Store Exported File On Server, Upload Exported File By FTP / SFTP, Send Exported File to E-mail, Send to Rest Api Endpoint)

- Configure export fields and their namings
- Filter requests by any parameter (managers, request statuses, rating, etc.)

Check the details of each tab configuration [in this guide](#).

RMA Import (PRO and PREMIUM)

It is also possible to import any RMA entities using the convenient import UI.

Import

Import Settings

Please note that compatibility with the Amasty Import Orders extension is available for RMA Pro and Premium versions as part of an active product subscription or support subscription.

Go to **System → Amasty Import → Import**

Select the required entity and configure import settings (import behavior, import file type, import source, etc.).

Check the details of each tab configuration in this [in this guide](#).

API Integration (PRO and PREMIUM)

The **Pro** and **Premium** extension versions include API support. Store admins may use the following methods:

amastyRmaStatusRepositoryV1 Interface StatusRepositoryInterface

GraphQL Compatibility

The extension is compatible with GraphQL (read + write). Here is an example of the implementation via GraphQL. Follow the steps below:

1. Create return request

```
1 mutation {  
2   placeAmRmaCustomerReturnRequest(  
3     input: {  
4       order_id:5  
5       comment: "Hello from graphql"  
6       policy_allowed: 1  
7       return_items: [  
8         {  
9           order_item_id:5  
10          return: 1  
11          qty: 1  
12          reason:1  
13          condition:1  
14          resolution: 1  
15        }  
16      ]  
17    }  
18  ){  
19    request_id  
20  }  
21 }
```

```
{  
  "data": {  
    "placeAmRmaCustomerReturnRequest": {  
      "request_id": 2  
    }  
  }  
}
```

```

mutation {
  placeAmRmaCustomerReturnRequest(
    input: {
      order_id: "Your order ID"
      comment: "Rour return comment"
      policy_allowed: 1
      return_items: [
        {
          order_item_id:"Order item ID for return"
          return: 1
          qty: "Return qty"
          reason:"Return reason ID"
          condition:"Return condition ID"
          resolution: "Return resolution ID"
        }
      ]
    }
  ) {
    request_id
  }
}

```

2. See all return requests for customer

```

1 {
2   customer {
3     amrma_returns {
4       items {
5         request_id
6         url_hash
7       }
8     }

  }
}

```

RMA Shipping Labels (Add-On)

If a store is supposed to cover shipping costs, an admin needs to pay for shipments beforehand. To simplify this process, you may generate shipping labels automatically and improve customer shopping experience with fast shipment processing.

The feature can be enabled only after purchasing the **Shipping Labels for RMA Add-On** and available for **UPS**, **DHL** and **FedEx** shipping carriers.

General Configuration

First of all, you need to set the address according to which shipping cost will be calculated by a

carrier.

Navigate to **Stores → Configuration → Amasty Extensions → RMA Automatic Shipping Label**.

Items Return Address

Return Address Source <small>[global]</small>	Custom Address ▼
Contact Name <small>[website]</small>	General Store Address Shipping Origin Address Custom Address
Country <small>[website]</small>	United States ▼
Region/State <small>[website]</small>	Michigan ▼
ZIP/Postal Code <small>[website]</small>	49862
City <small>[website]</small>	Munising
Street Address <small>[website]</small>	1411 Center St
Street Address Line 2 <small>[website]</small>	

Here you can choose between:

- General store address
- Shipping origin address
- Custom address

If you choose *Custom Address*, specify the address details in the appropriate fields.

Shipping Carriers

On the next step, you need to enable labels generation for particular carriers.

Go to **Stores → Configuration → Sales → Shipping Methods**.

Expand the necessary carrier.

FedEx

Enabled for Checkout <small>[website]</small>	<input type="text" value="Yes"/>	<input type="checkbox"/> Use system value
Use for Amasty RMA <small>[website]</small>	<input type="text" value="Yes"/>	
Title <small>[store view]</small>	<input type="text" value="Federal Express"/>	<input checked="" type="checkbox"/> Use system value
Account ID <small>[website]</small>	<input type="text" value="....."/>	

Please make sure to use only digits here. No dashes are allowed.

Use for Amasty RMA - if enabled, the current shipping method will be used for shipping label generation.

Labels Generation

To create a shipping label, navigate to a particular return request page. Scroll down to the Tracking Information section.

Tracking Information

<input type="text" value="Please Select"/>	<input type="text"/>	<input type="button" value="Add"/>
--	----------------------	------------------------------------

Shipping Label

or [Add a file](#) to upload shipping label

Internal RMA Note

Keep in mind that automatic label generation is available for **Approved** return requests only:

RMA Status

Also, you can generate a label only for the **Approved items** as well:

Items to Return

Product	Who Pays for Shipping	Approved
 Erika Running Short-32-Green SKU: WSH12-32-Green	Store is supposed to cover shipping costs	<input checked="" type="checkbox"/>

If an item is in a *Rejected* or *Processing* status, you are not able to add this item to the package.

Click the **Generate** button.

Step 1. Shipping Information ✕

[Apply and generate package](#)

Federal Express ⌵

- International Economy 114.36
- International Priority 122.62
- International First 169.62

In the appeared popup select the necessary shipping carrier and its option. Click **Apply and generate package**.

Step 2. Create Packages ✕

[Back](#) [Add Package](#) [Done](#)

Shipping Information

Federal Express International First **169.62**

Package 1 [Add Products to Package](#)

Package Type	Customs Value	Total Weight	Length	Width	Height	Signature Confirmation
FedE FedEx Envelope FedEx Pak FedEx Box FedEx Tube Your Packaging	1	1	lb 10	12	8	in Adult Not Required Adult Direct Indirect

Here specify package options that are obligatory for a particular carrier and method.

Find out more about carriers and their requirements [here](#).

Next, add the products that will be sent in the package by clicking **Add Products to Package** and ticking the necessary ones.

Step 2. Create Packages

Back

Add Package

Done

Shipping Information

Federal Express International First **169.62**

Package 1

[Add Selected Product\(s\) to Package](#)

Package Type	Customs Value	Total Weight		Length	Width	Height		Signature Confirmation
FedE		1	lb	12	10	8	in	Adult
Product		Weight		Qty Ordered		Qty		
<input checked="" type="checkbox"/> Montana Wind Jacket-S-Green		1		1		1		
<input checked="" type="checkbox"/> Zeppelin Yoga Pant-34-Green		1		1		1		

Click **Add Selected Product(s) to Package** and hit the **Done** button.

The add-on also supports a validation feature. Thus, if the package options are incorrect, you will be notified.

Step 2. Create Packages

[Back](#)

[Add Package](#)

[Done](#)

Weight - Package weight exceeds maximum for requested service/packaging in RequestedPackage 1; Invalid country of manufacture for commodity 1. Please correct the value as it will not be accepted in the future.;

Shipping Information

Federal Express International First **169.62**

Package 1

[Add Products to Package](#)

Package Type	Customs Value	Total Weight	Length	Width	Height	Signature Confirmation			
FedE	0	2	lb	10	12	8	in	Adult	Delete

If everything is correct, the generated label and a tracking code will be added to the return request.

Tracking Information

Carrier	Tracking Number	Action
FedEx	794616129526	Remove

[Add](#)

Shipping Label

[ShippingLabel\(13\).pdf](#)

[View Package](#)

Internal RMA Note

It is possible to *View* or *Delete* the package if it is incorrect.

Save the return request updates. After that, a webstore user will be able to download the generated

label right in the customer account.

RMA Automation Rules (Add-On)

With the extension it is possible to process RMA requests automatically, without manager involvement.

The feature can be enabled only after purchasing the **Automation Rules for RMA Add-On**.

Configuration

To configure the add-on general settings, navigate to **Stores → Configuration → Amasty Extensions → RMA Automation Rules**.

Configuration

Search icon | admin

Save Automation Rule

General Settings

Return Rule Name *

Priority * ?

Enabled Yes

Stop Further Rules Processing Yes

Apply Rule for New RMA Yes ?

Apply Rule for Existing RMA Yes ?

Return Rule Name - specify the name for internal rule usage. It will be displayed on the grid.

Priority - prioritize the rule, where 0 is the highest priority.

Enable - set to Yes to activate the rule.

Stop Further Rules Processing - enable this option if you do not want other rules to be applied to the same requests.

Apply Rule for New RMA - if Yes, the rule will be applied only for newly created RMA requests while the existing ones will be ignored.

Apply Rule for Existing RMA - if Yes, the rule will be applied only for existing RMA requests while the new ones will be ignored. The triggering events are requests amendments by a manager,

automatic RMA status changes and the daily Cron job.

Conditions

In this tab you may specify the conditions according to which the rule will be applied. Here we set the particular return reason.

New Return Rule

  admin ▾

Thus, you can create an unlimited number of flexible rules to speed up and simplify return requests processing.

Additional packages (provided in composer suggestions)

To make additional functionality available, please install the suggested packages you may need.

Available with **no additional fees**:

- **amasty/rma-graphql** - Install amasty/rma-graphql to activate GraphQL and RMA integration.

Available as a part of an active product **subscription** or support subscription:

For **Lite, Pro and Premium** versions:

- **amasty/module-rma-subscription-functionality** - Install this package:
 1. For compatibility with automatic filling of Credit Memo data
 2. To restrict the creation of RMAs for site guests to only the store view where the order was placed
 3. Hide the 'Billing Last Name' field on the RMA Login form for site guests
- **amasty/module-rma-hyva** - Install this package to ensure the RMA Base extension works with Hyva Theme.

For **Pro and Premium** versions:

- **amasty/module-rma-import-entity** - Install this package for Import Orders compatibility.
- **amasty/module-rma-custom-number** - Install this package to use custom RMA ID number functionality.

RMA Reports (Add-On)

It is possible to track and analyze the completed requests statistics in a separate dashboard.

The feature can be enabled only after purchasing the **Reports for RMA Add-On**.

Reports Overview

To view the analytical charts, please go to **Admin Panel → Amasty → RMA Reports → Reports**.

Date Range: 30 Days

Statistics

Total Requests **6**

Percentage of Returns **31.58%**

Lead-time **82.50**

Rating **4.0**

Delivery by store **6**

Top Reasons

- Defective/Does not Work Proper
- Wrong Product Description
- No Longer Needed/Wanted
- Product Did Not Meet Customer Expectations
- Wrong Product Ordered

Items

Return Reason: Defective/Does not Work Properly

Item	Returned, times	Price
Voyage Yoga Bag	0	\$32.00
Cruise Dual Analog Watch	1	\$55.00
Hero Hoodie-M-Green	1	\$0.00

Customers

Return Resolution: Repair

Name	Orders Qty	RMA Qty	Profit
Veronica Costello	13 (\$1129.88)	10 (\$202.00)	\$927.88
John Smith	2 (\$114.00)	3 (\$0.00)	\$114.00
Peter Brown	4 (\$302.00)	3 (\$55.00)	\$247.00

Set the period according to which the data will be displayed (7 Days, 30 Days, Last year or Custom Date) and view all the information in one place.

Statistics

On the *Statistics* chart you may see the overall data based on the specified period. It is possible to check the average indicator of:

- Total Requests
- Percentage of Returns
- Lead-time
- Rating
- Delivery by Store

Date Range: Last Year ▼

Top Reasons

Track the most frequent return reasons in a separate chart. The diagram shows the percentage of each return reason you've created.

Items

In the *Items* chart you may see the return requests products according to their return reasons. For example, you can easily check what products are “defective” or which items have the “wrong description”.

Items

Return Reason

- Wrong Product Delivered
- Wrong Product Description
- Wrong Product Delivered
- Wrong Product Ordered
- Product Did Not Meet Customer's Expectations
- No Longer Needed/Wanted
- Defective/Does not Work Properly
- Damaged During Shipping
- Late Delivery of Items

Item	Returned, times	Price
Voyage Yoga Bag	0	\$32.00
Cruise Dual Analog Watch	1	\$55.00
Hero Hoodie-M-Green	1	\$0.00

Customers

With the add-on, it is possible to check the customers who are returning more often and what profit do you get from them. Thus, you may easily see problematic customers and adjust you policy regarding them if you do not have enough profit from resolving their requests.

Thus, you may easily analyze the tendencies of your RMA system, find out the most problematic issues and find the resolutions.

RMA for PWA (Add-on)

The PWA add-on helps your customers manage their return requests from mobile devices.

Before purchasing the **PWA for RMA Add-On**, keep in mind that it requires

- the original RMA extension;
- PWA theme and [PWA Studio](#) installed.

In order to correctly install a PWA add-on, please install the **corresponding GraphQL system package** first. For the correct name of it, please check the *composer.json* file of the main module. For example, the GraphQL system package name of the PWA add-on for the Blog Pro extension would be the following: **amasty/blog-graphql**

```
{
  "name": "amasty/blog",
  "description": "Amasty Blog Pro",
  "require": {
    "php": ">=7.3.0",
    "amasty/base": ">=1.13.4",
    "amasty/email-unsubscribe": "*",
    "amasty/cron-schedule-list": "*",
    "magento/framework": ">=102.0.0",
    "magento/module-catalog": "*"
  },
  "suggest": {
    "amasty/blog-page-builder": "Install blog-page-builder module to activate PageBuilder and Blog Pro integration.",
    "amasty/blog-graphql": "Install blog-graphql module to activate Graphql and Blog Pro integration.",
    "amasty/module-blog-mftf-3": "Install module-blog-mftf-3 module to be able to run Blog Pro MFTF tests for Magento 2.4.0+ version.",
    "amasty/module-blog-pro-to-builder": "Install Amasty_BlogProToBuilder module to activate the integration with Custom Reports Builder extens
  },
  "type": "magento2-module",
  "version": "2.10.4",
  "license": [
    "Commercial"
  ],
  "autoload": {
    "files": [
      "registration.php"
    ]
  }
}
```

This is how a customer account looks:

A sample of a new request:

Customers can use all features of the original extension while managing RMA from mobiles, including chat:

Please, note a few limitations when purchasing PWA for RMA Add-On:

- Creating and managing RMA is unavailable for guests;
- Widgets can't be used in a customer account.
