## Introduction

With Meta Tags Templates extension you can automatically generate meta tags as well as descriptions for:

- Product pages
- Category pages
- Any site page by URL

Functionality has hierarchical structure. That means you can choose the category and specify all the tags for:

- Current category
- Sub categories
- Products in current category
- Products in subcategory

A range of complex variables can be used in tags and descriptions.

To specify general settings please go to System->Configuration-> SEO Meta Tags Templates

Dashboard Sales Catalog Mobile Customers Promotions Newsletter CMS Reports **System** Get help for this page

### SEO Meta Tags Templates

Save Confir

#### General

Max Title Length	<input type="text" value="250"/>	[STORE VIEW]
Max Description Length	<input type="text" value="500"/>	[STORE VIEW]

#### Product Page

Enabled	<input type="text" value="Yes"/>	
Replace Filled Metadata	<input type="text" value="No"/>	
Product URL Key Template	<input type="text"/>	[STORE VIEW]

▲ You can use variables in this template  
Example: {name} - {sku}

Apply Template For Product URLs [STORE VIEW]

#### Category Page

Enabled	<input type="text" value="Yes"/>	[STORE VIEW]
Replace Filled Metadata	<input type="text" value="No"/>	[STORE VIEW]

If you set the option to 'No' all previously created meta tags won't be replaced except for empty ones. In case you set the option to 'Yes' you'll replace all meta tags.

You can disable meta tags functionality for product or category pages.

Specify max length for meta title and description.

Click on this button to apply the template for all previously created products.

### 3. Category-based templates

To create product meta tags templates by category please go to admin panel -> CMS-> Meta Tags by Category.

The screenshot shows the CMS admin interface. At the top, a navigation bar includes 'Dashboard', 'Sales', 'Catalog', 'Mobile', 'Customers', 'Promotions', 'Newsletter', 'CMS', 'Reports', and 'System'. The 'CMS' menu is expanded, showing options like 'Pages', 'Static Blocks', 'Widgets', 'Polls', 'SEO ToolKit', 'Goolge Sitemaps', 'HTML Sitemap', 'Rich Data', 'Tags', 'Friendly URLs', 'Meta Tags Templates', 'Errors Detector', and 'Settings'. The 'Meta Tags by Category' option is highlighted. Below the navigation, the page title is 'Meta Tags Template (Categories)'. There are buttons for 'Add New', 'Reset Filter', 'Search', and 'Submit'. The main content area shows a table with columns 'ID', 'Store', and 'Category'. The table is empty, displaying 'No records found.'.

### Current Products

Title

By {name}{color}, from{manufacturer|brand}!

▲ Available variables:

Category - {category}

All Categories - {categories}

Store View - {store\_view}

Store - {store}

Website - {website}

Price - {price}

Special Price - {special\_price}

Final Price - {final\_price}

Final Price with Tax - {final\_price\_incl\_tax}

Price From (bundle) - {startingfrom\_price}

Price To (bundle) - {startingto\_price}

Brand - {brand}

Color - {color}

And other product attributes ...

Meta Description

Purchase the{name} for only {final\_price} at {website}!

Keywords

{name}, {manufacturer}, {category}, {color}.

Please use 'Product Meta Title' field to create a template for meta title tag.

You can also use complex variables like {brand|manufacturer|provider}. These variables work great, if for some products you use manufacturer attribute and for others brand or provider attributes. So for products with brand attribute, brand value will be used for meta tags; for products with manufacturer attribute, manufacturer value will be used and so on.

# 5. Category-based templates. Products tags

## Template Configuration

### Current Products

Title	<input type="text" value="By {name}{color}, from{manufacturer brand}!"/> ▲ Available variables: Category - {category} All Categories - {categories} Store View - {store_view} Store - {store} Website - {website} Price - {price} Special Price - {special_price} Final Price - {final_price} Final Price with Tax - {final_price_incl_tax} Price From (bundle) - {startingfrom_price} Price To (bundle) - {startingto_price} Brand - {brand} Color - {color} And other product attributes ...
Meta Description	<input type="text" value="Purchase the{name} for only {final_price} at {website}!"/>
Keywords	<input type="text" value="{name}, {manufacturer}, {category}, {color}."/>

Please use 'Product Meta Description' field to create a template for meta description tag. You can use the same variables as for meta title tag.

## 5. Category-based templates. Products tags

Keywords	<input type="text" value="{name}, {manufacturer}, {category}, {color}"/>
H1 Tag	<input type="text" value="{name} in Chicago"/> <small>▲ This value will override any H1 tag even it is not empty</small>
Short Description	<div style="border: 1px solid orange; padding: 5px; display: inline-block;"><b>Show / Hide Editor</b></div> <div style="border: 1px solid #ccc; padding: 5px;"><p>Purchase the {name} for only {final_price} at {website}!</p></div> <p>Path:</p>
Full Description	<div style="border: 1px solid orange; padding: 5px; display: inline-block;"><b>Show / Hide Editor</b></div> <div style="border: 1px solid #ccc; padding: 5px;"><p>By {name} form {manufacturer brand provider} at the lowest price in Chicago. The price is only {price}! Stylish color {color}.</p></div>

Please use 'Short Description' field to create a template for short product description.

Please specify 'H1 Tag' here. This will be used as a name of the product on the product page.

You can also use complex variables like {brand|manufacturer|provider}.

Use 'Product Full Description' field to create a template for short product description.

# 6. Category-based templates. Category tags

Use all the variables as well as complex ones in category tags and descriptions.

## Template Configuration

- Main Category
- Products in Main Category
- Sub Categories
- Products in Sub Categories

Title, meta description, keywords, H1 tag and description are specified by analogy with product tags.

For category pages you can also specify image alt and title.

Write the text which will be displayed after product list on category page.

## New Template

Back Reset Delete Save Save and Continue Edit

### Current Categories

Title	Enjoy {category} for the low price!
Meta Description	Order any product from {category} and get Christmas discount!
Keywords	{category}
H1 Tag	{category} of high quality on {website}! ▲ This value will override any H1 tag even it is not empty
Description	Order any product from {category} and get 40% Christmas discount!
Image Alt	{category} for Christmas ▲ Please, make sure that category image is wrapped into tag with class 'category-image' and image has alt attribute
Image Title	{category} products ▲ Please, make sure that category image is wrapped into tag with class 'category-image' and image has title attribute
Text after Product List	Feel free to contact our support team if you have any questions.

# 7. URL-based templates

To create URL-based template go CMS -> Seo Toolkit  
-> Meta Tags Templates -> Meta tags by URL

The screenshot shows a CMS interface with a top navigation bar containing 'Dashboard', 'Sales', 'Catalog', 'Mobile', 'Customers', 'Promotions', 'Newsletter', 'CMS', 'Reports', and 'System'. The 'CMS' menu is expanded, showing options like 'Pages', 'Static Blocks', 'Widgets', 'Polls', 'SEO ToolKit', 'Google Sitemaps', 'HTML Sitemap', 'Rich Data', 'Tags', 'Reviews', 'Meta Tags Templates', and 'Settings'. The 'Meta Tags Templates' sub-menu is also expanded, showing 'Meta Tags by Category' and 'Meta Tags by URL'. The main content area is titled 'New Template' and has a 'General' tab selected. It contains three fields: 'Page Url' (with the value 'example.com/c'), 'Priority' (with the value '1'), and 'Show In' (with the value 'English'). A 'Save and Continue Edit' button is visible in the top right. On the left, there is a 'Template Configuration' sidebar with 'General' and 'Page Content' sections. An orange callout box points to the 'Page Url' field with the text: 'Specify URL of the page you want to create a template for.'

## 7. URL-based templates

### Template Configuration

General

Page Content

You can specify meta tags, title, etc. for any page on site, e.g. Contact Us, Partnership, etc.

It's very useful for SEO to specify meta tags for the pages when attribute is chosen (let's say [www.example.com/t-shirts?color=blue](http://www.example.com/t-shirts?color=blue)).

Also, you can create it for any product page. In such a way all the settings specified in Category-based template will not affect the product.

Specify canonical URL for the page.

### New Template

#### Content

Title {website} Contacts Page

Meta Description Contact us - {store}, {website}

Keywords {store}, {website}

Canonical Url example.com/contact-us

Robots NOINDEX, NOFOLLOW

H1 Tag Contact Us page

▲ This value will override any H1 tag even it is not empty

You can make the page 'no follow' and 'no index' by search engines
