For more details see how the [Ajax Shopping Cart for Magento 2](#) extension works.

Guide for Ajax Shopping Cart for Magento 2

Magento 2 *AJAX add to cart* extension provides a comfortable shopping experience. Customers can easily select configurable options and edit the items in the pop up without wasting time on page reloads.

- User-friendly shopping process;
- Stylish Magento 2 AJAX cart pop up;
- Equip Magento 2 stores with AJAX confirmation windows of 2 different types;
- Support of custom options and configurable products;
- Additional way to gently promote related items.

Magento 2 Ajax Shopping Cart extension is compatible with [Hyvä themes](#). You can find the **amasty/module-ajax-cart-hyva** package for installing in composer suggest (Note: the compatibility is available as part of an active product subscription or Support Subscription).

General Settings

To configure the module, go to **Admin Panel → Stores → Configuration → Amasty Extensions → Ajax Shopping Cart**

General

Enable Ajax Shopping Cart [store view]	Yes
Enable Flying Image Effect [store view]	Yes
Set to 'Yes' for a nice-looking visual effect. The product image 'flies' to the 'Top Cart' block in the top menu.	
Show the Product Qty Added to the Cart on the Product Listing [store view]	Yes
Add Products to Compare with AJAX [store view]	No
Add Products to Wish List with AJAX [store view]	No
Show a Mini Cart once Item is Added [store view]	No
Set 'Yes' to Show a Mini Cart instead of Confirmation Pop-up once an item is added to the cart.	

Enable or disable the extension in **Enable Ajax Shopping Cart**.

Enable flying image effect: With this setting, you can activate and deactivate nice looking visual effect.

You can get an idea of how the effect works [here](#).

Show the Product Qty Added to the Cart on the Product Listing: Enable the option to highlight the products that have already been added to the shopping cart. With mouse hover over the product, the number of items added to the cart appears.

Add Products to Compare with AJAX: Enable the option to let customers add products to Compare without page reloading. This will fasten the process and make it more convenient.

Add Products to Wish List with AJAX: Set the option to **Yes** to eliminate page reloading when customers add products to Wish List.

Show a Mini Cart once Item is Added: Enable the option to Show a Mini Cart instead of a Confirmation Pop-up after an item is added to the cart.

Add To Cart Requests Limitation

With the AJAX Shopping Cart extension, you can block IP addresses that send lots of spam requests.

This helps prevent your databases from cluttering with unnecessary entries. The functionality is available as part of an active product subscription or support subscription.

Add To Cart Requests Limitation

Block Requests from One IP Address <small>[global]</small>	<input type="text" value="Yes"/>
The IP address will be blocked according to the conditions set below: exceeding the number of requests for the specified period of time.	
Requests Number <small>[global]</small>	<input type="text" value="100"/>
Period in Minutes <small>[global]</small>	<input type="text" value="1"/>

Block Requests from One IP Address - set to 'Yes' to enable the option. In such a case The IP addresses will be blocked according to the conditions set below: exceeding the number of requests for the specified period of time.

Requests Number - set the number of requests.

Period in Minutes - set the period in minutes.

If more than the specified number of requests were sent from one IP address during the specified period, then the IP address will be blocked until the set period of time has elapsed since the last request.

Please note, that for the correct work of this functionality you will need to install the additional library: [GitHub - symfony/rate-limiter](#), that will provide a Token Bucket implementation to rate limit input and output in your application.

Dialog Pop-up

Dialog Pop-up

Redirect to the Product Page
[store view]

Set 'Yes' to redirect to the product page when an item has unspecified options. Leave 'No' to show the pop-up with the options on category, search & wishlist.

Display Custom Options
[store view]

Customers can select configurable products and custom options right on the category page. If the 'Show Only If There Are Required Options' is enabled and a product has at least one required option, all custom options including the required ones are shown.

Pop-up for Composite Products
[store view]

This pop-up is used for Configurable, Bundle, Grouped Products on a Category Page.

QTY Instant Change
[store view]

Choose yes, if you want to change the qty in the cart immediately after changing the qty in the dialog pop-up

Redirect to the Product Page: Enable the option to redirect customers to the product page when they haven't specified the necessary products options. Set to 'No' to show the pop-up with the options on category, search & wishlist.

Display Custom Options: Customers can select configurable products and custom options right on the category page. If the 'Show Only If There Are Required Options' is enabled and a product has at least one required option, all custom options including the required ones are shown.

Pop-up for Composite Products: It is possible to select what product information you would like to display in the cart dialog window. Set this option to **Mini Product Page** to display product image, rating and short description together with product options and quantity in the pop-up. Choose **Custom Options & Product Qty** to show only custom options and product quantity in a pop-up. [Here](#) you can see the difference.

QTY Instant Change: Choose yes, if you want to change the qty in the cart immediately after changing the qty in the dialog pop-up.

Confirmation Pop-up

Confirmation Pop-up

Dialog Close Delay (in seconds)

[store view]

Set a timer for the Continue button. When the preset period expires, the dialog box disappears. If set to 0, dialog won't be hidden automatically.

Enable a Confirmation Pop-up on a Product Page

[store view]

Continue Button Action on a Product Page

[store view]

Choose whether the Continue button on a product view page should link to the category page or remain on the product page.

Dialog Close Delay (in seconds): In this field, you can set a timer for *Continue* button. After a set time expires, a dialog box disappears.

Enable a Confirmation Pop-up on a Product Page: Set the option to **Yes** to enable showing a confirmation pop-up on a product page.

Continue Button Action on a Product Page: Choose whether the *Continue* button on a product view page should link to the category page or remain on the product page.

- Men Block
- Gear Block
- Sale Block**
- New Block
- Home Page Block
- Performance Fabrics Block
- Eco Friendly Block
- Giftcard Block
- Login Info Block

Please note. Some CMS blocks can break confirmation popup. We recommend to select mobile view optimized blocks.

To make sure the CMS blocks work as expected, please select simple CMS blocks. For example, you can add text notification to display useful information. In case of more complex blocks, be prepared to thoroughly check the way block works on the front-end. We also recommend selecting mobile view optimized blocks.

Cancel Add to cart

When a customer adds a product to the cart without specifying mandatory options (e.g. size, colour, etc.), the AJAX pop-up will be displayed. The customer will be able to choose the required options right in this pop-up.

Product Page

When adding products to cart, customers will see the item they are adding to cart and also brief cart overview - the **number** of items in the cart and current **subtotal**.

Flying Effect

This is how the **flying image visual effect** looks like. It appears when a customer adds a product to the shopping cart.
