

amasty

See how the [Automatic Related Products](#) extension works.

Guide for Automatic Related Products for Magento 2

Motivate customers to purchase more from your store using special blocks with cross-sells, up-sells, or related products. Automatically promote products with smart algorithms for product relation and increase the average order value.

- Create attractive product offerings using smart relation algorithm
- Utilize various conditions to differentiate products display
- Show related items based on customers' views or purchases
- Exclude out-of-stock products from the display
- Use automatic relation results instead of manual configuration

Explore our internal [Knowledge Base](#) to gain even more valuable insights and uncover answers to popular questions about the configuration and features of the Magento 2 Automatic Related Products extension.

Magento 2 Automatic Related Products extension is compatible with [Hyvä themes](#). You can find the 'amasty/module-mostviewed-hyva' package for installing in composer suggest. The compatibility is available as part of an active product subscription or Support Subscription.

Please note that for the correct Hyvä compatibility work, the **GraphQL** module 'amasty/customers-also-viewed-graphql' should be also installed.

General Settings

To configure the extension please go to **Stores → Configuration → Amasty Extensions → Automatic Related Products** and expand the **General** section.

General

To configure the rules please go to Catalog -> Amasty Related Products -> [Related Product Rules](#)

Data Gathered Period (days)
[store view]

Please specify the time period basing on which the module will gather statistical data and display related, up-selling and cross-selling products for 'Bought together' and 'Viewed together' condition.

Please specify the order statuses that needs to be considered when the system selects matching products for 'Bought together' condition.

Ignore Anchor Categories in 'Same As' Condition
[store view]

If enabled, the rule condition 'Category is same as Current Product Categories' will consider only non-anchor categories the product belongs to.

Enable Products Displaying of Subsequent Rules
[global]

Provide shoppers with the functionality to easily return or exchange products with the **Magento 2 RMA** extension.

Data Gathered Period (days) - specify a time period for stats data gathering that will be used in related, up-selling, cross-selling, 'bought together' and 'viewed together' products.

Order Status - specify order statuses that need to be considered when the system selects matching products for the 'Bought together' condition.

Ignore Anchor Categories in 'Same As' Condition - If enabled, the rule condition 'Category is the same as Current Product Categories' will consider only non-anchor categories the product belongs to.

[Narrow case] Please note that the condition rule you created will be ignored (all store products will

be applied) **if both of the conditions below are applied:**

- the product you're configuring belongs to an anchor category **ONLY**;
- the setting '*Ignore Anchor Categories in 'Same as' Condition*' is enabled.

Enable Products Displaying of Subsequent Rules - set to 'Yes' to display subsequent rules products if there are no products matching the condition in the priority rule.

Please consider, that due to its specifics, the 'Enable Products Displaying of Subsequent Rules' setting **may affect webstore performance** if enabled. Please, enable this feature only in cases when it is needed.

Bundle Packs

In the **Bundle Packs** section, you can fine-tune the main settings of product bundle packs.

Bundle Packs

The screenshot shows the 'Bundle Packs' configuration section with three settings:

- Display Position** [store view]: A dropdown menu with 'Product Tab' selected. Below it, a note says: 'Select the position to display the Bundle Packs Promo at the Product Page.'
- Tab Title** [store view]: A text input field containing 'Bundle Packs'.
- Choose CMS Page** [store view]: A dropdown menu with 'All Bundle Packs Page [Disabled]' selected. The menu is open, showing a list of options: '404 Not Found', 'Home Page', 'Enable Cookies', 'Privacy Policy', 'About us' (highlighted in blue), 'Customer Service', 'All Bundle Packs Page', and 'All Bundle Packs Page [Disabled]'. Below the menu, a note says: 'Please make sure the CMS page is enabled (Content -> Elements -> Pages)'.

Display Position - choose the position to display product bundle packs: below product info, on a product tab, or in a custom position.

Tab Title - when displaying bundle packs on a product tad, specify a custom title for the tab.

Choose CMS Page - Choose a CMS page to show bundle packs on.

Add Bundle Packs Link to Top Menu [store view]	<div>Display Last ▼</div> <div>No</div> <div>Display First</div> <div>Display Last</div>
Display Link to All Bundle Packs in Top Menu	
Bundle Packs Item Label [store view]	<div>Bundle Packs</div>
Used in top menu	
Bundle Pack Title in Confirmation Popup [store view]	<div>Bundle Pack</div>

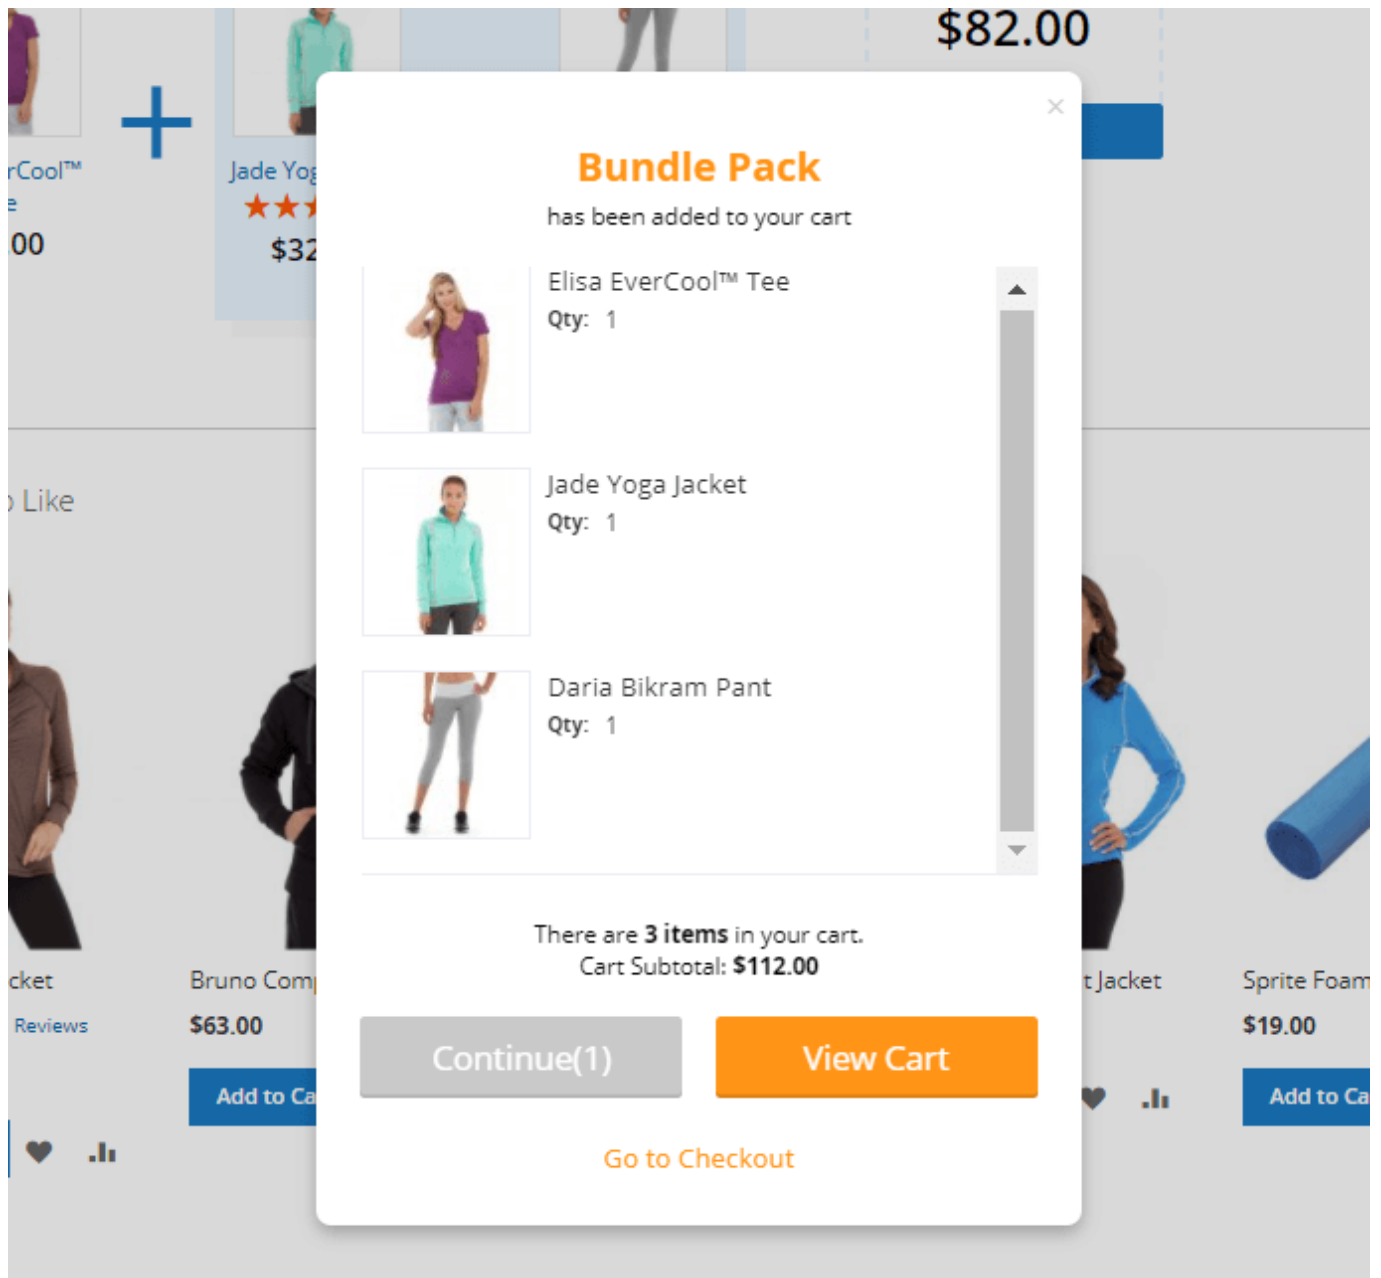

Add Bundle Packs Link to Top Menu - choose the position for a bundle packs link on the top menu.

Bundle Packs Item Label - specify the bundle packs item label that will be used for a link in the top menu.

Bundle Pack Title in Confirmation Popup - Here you can specify the bundle pack title to be displayed in the confirmation popup (used in the top menu).

Please note that this option ('*Bundle Pack Title in Confirmation Popup*') becomes available only if the **AJAX Shopping Cart for Magento 2** extension by Amasty is enabled as well.

[See the example of the popup:](#)

Display Popup for Options Choosing <small>[store view]</small>	<input type="text" value="Always"/>	If set to Always, popup will be displayed even if the product has only non-required options to choose.
Apply Bundle Discounts for Items That Were Added Separately <small>[store view]</small>	<input type="text" value="Yes"/>	When set to No, the discount will be applied only after bundle pack's Add To Cart action.
Replace Bundle Pack Item Discount with Cart Price Rules <small>[global]</small>	<input type="text" value="Yes"/>	Cart Price Rules will replace bundle discount for an individual Cart Item only if they provide a greater discount. You can find more information in the user guide .
Display Upsell Message in Cart <small>[store view]</small>	<input type="text" value="Yes"/>	Display one random hint message in cart, telling the customer which product to add in order to get the Bundle Pack discount.
Display Bundle Pack in Cart <small>[store view]</small>	<input type="text" value="Yes"/>	Display one random Bundle Pack in cart, telling the customer which Bundle Pack to add in order to get the discount.

Display Popup for Options Choosing - Use this setting to configure the display of the popup for choosing custom product options.

The setting offers two ways of display:

- 'Only if Product has Required Options' - choose this option to show the popup only if a product has any required options to be configured;
- 'Always' - if set to 'Always', the popup will be displayed even if the product has only non-required options to choose from.

Apply Bundle Discounts for Items That Were Added Separately -

- Set this setting to 'No' if you want a discount to be applied to a certain combination of products bought in a format of the bundle only.
- Set this setting to 'Yes' if you're okay if a customer accidentally gets a discount in case certain 2 or 3 products get to the shopping cart together without being added to the cart intentionally as a bundle.

Replace Bundle Pack Item Discount with Cart Price Rules - set to 'Yes' if you want to replace a bundle item discount with a cart price rule discount. A cart price rule will replace bundle discount for a particular item only if it provides a greater discount.

Display Upsell Message in Cart - display one random hint message in a cart, telling a customer which products to add to get the Bundle Pack discount.

Display Bundle Pack in Cart - display one random Bundle Pack in a cart, telling a customer which Bundle Pack he can add to get a discount.

If you want to set a custom position for Bundle Pack Display, copy the necessary embedding code and

paste in a suitable position.

Display Position

[store view]

Custom Position

Product Description Embedding Code

[store view]

```
{{widget  
type="Amasty\Mostviewed\Block\  
Product\BundlePackCustom"}}
```

Copy this code into description field on product edit page to insert Bundle Pack there.

Template Embedding Code

[store view]

```
<?= $this-  
>helper("Amasty\Mostviewed\Hel  
per\Render")-  
>renderCurrentPack() ?>
```

Insert this code into *.phtml template directly to display Bundle Pack in any block.

Layout Embedding Code

[store view]

```
<referenceContainer  
name="content">  
    <block  
class="Amasty\Mostviewed\Blo  
ck\Product\BundlePackCustom  
"
```

Insert this code into layout to display the Bundle Pack block.

On the product rules grid, you can see all existing rules for displaying related, up-sell and cross-sell items on different pages and in various positions in your store.

The rules are sorted by the **ID** and the **Name**. You can see the **Status** of each rule and change it right from the grid by clicking the necessary rule and setting the **Enable Rule** option to Yes or No.

All the rules are provided with the information about the **Store View**, **Rule Type**, its **Position** on the frontend. You can also check the **Priority** of each rule.

Only one rule can be applied in one position. If there are several rules, the rule with the highest priority will be executed.

Check the progress and effectiveness of each product block performance by tracking the number of **Views**, **Clicks**, **CTR**, **Orders Made** and the final **Revenue**.

When a related products block appears, it is counted as *Views*. When any product from the block is clicked, it is counted as *Clicks*. Firstly, all views are placed in a temporary table, and then the info is transferred to a permanent one via Cron jobs. After that, the temporary info is cleared.

Cronjob tasks:

```
amasty_mostviewed_analytics_collect_view
```

```
amasty_mostviewed_analytics_collect_click  
amasty_mostviewed_analytics_clear_temp
```

Tables:

```
pref_mostviewed_view_temp - cleared  
pref_mostviewed_click_temp - cleared  
pref_mostviewed_analytics - contains data
```

Change the columns' position with a handy drag-and-drop function.

The dropdown menu allows to **Delete**, **Enable**, **Disable**, **Duplicate** or **Edit** each rule or several rules in one click.

It is possible to handle **CRUD actions** on Automatic Related Products rules **via REST API**. The following actions are supported:

- /V1/amasty_mostviewed/rules, POST method
- /V1/amasty_mostviewed/rules/:groupId, PUT method
- /V1/amasty_mostviewed/rules/:groupId, DELETE method
- /V1/amasty_mostviewed/rules/:groupId, GET method
- /V1/amasty_mostviewed/rules, GET method

How to create Magento 2 related products rules for linking products? Our Magento 2 Related Products extension will help you to do it easily.

Magento 2 Automatic Related Products plugin is designed to analyze the interests of online shoppers to display the relevant related products table for them. It is possible because of a smart personalized system of autosuggestions that uses rules based on product conditions and helps to offer customers only those goods that are more likely to be additionally purchased.

Check the video guide to learn how to create a new related product rule step-by-step

To create a new algorithm for displaying relevant products automatically, click **Add New Rule** button and expand the **Rule Information** tab.

Custom Position

For 'Shopping Cart Page' the conditions are applied only to the latest added item.

Block Position - customize the location for your related products block. Choose its position on the **Product Page**, **Shopping Cart Page** or **Category Page**.

You may also configure a **Custom Position** for the block with related products. This option provides a custom code to be inserted into layout. Thus you can place the block anywhere on your website. To use the option create a New Rule, choose 'Custom Position' in Block Position window and save the rule. A custom code will appear in the 'Block Embedding' window. Copy the code to the xml file with needed page layout (commonly xml files are located here:

your_magento_instance_folder/design/layout/catalog_product_view.xml Use before/after tags to indicate the exact position of the widget. You may also add the code to any product or category page by inserting it into the 'Layout Update XML' window in Design section.

'Where to Display' Conditions

Block Position *

For 'Shopping Cart Page' the conditions are applied only to the latest added item.

Block Embedding

```
<argument name="group_id"
xsi:type="string">9</argument>
</arguments>
</block>
</referenceContainer>
```

Insert this code into layout to display the product block.

For 'Shopping Cart Page' the conditions are applied only to the latest added item.

If **Add into Native Up-sells Block** on a product page or **Add into Native Cross-sells Block** on a shopping cart page is chosen, you will have an option to specify the **Replace Type**.

'Where to Display' Conditions

Block Position *

For 'Shopping Cart Page' the conditions are applied only to the latest added item.

Replace Type

The extension matches related products automatically. However, you can not only **replace** manually added products, but also **append** to them.

See how to add related products manually [here](#).

After specifying the position, choose the **conditions** to define the products the “related items” block will be displayed according to color, size, price, category, etc. You can use the combination of the attributes if needed.

The extension is compatible with **Amasty Improved Sorting** extension. Therefore, having this module installed, you can use bestsellers data in related block product conditions in the '**Where to Display Conditions**' tab and in the '**Products to Display**' tab.

Show only for 'Out of Stock' Products - enable this option to display related products block for 'out of stock' products and provide customers with the items they can purchase.

Check the products that fall under the conditions created by clicking the **Preview Products** button.

You can see the Thumbnail, the **Name**, the **Type** and other additional information about each product. Use handy filters to find necessary products according to the name, type, price, status,

visibility, etc.

If you are not satisfied with the list of products, change the conditions and hit the Preview Products button again.

Choose products to display

To sort the items that will be shown at the related products block, expand the **Products to Display** tab.

Products to Display

Choose the conditions to define the products that will be displayed in the "related items" block.

If **ALL** of these conditions are **TRUE** :

Gender contains Women 

Material contains Cotton 

Preview Products

Hide Products

Please click here to preview the product list.

For applying this conditions please save the rule.

Note that preview does not show products based on 'Viewed Together', 'Bought Together' and 'Same As' Conditions.

Source Type

Only Product Conditions	▲
Only Product Conditions	
Viewed Together	
Bought Together	

Conditions - select the attributes according to which the products will be shown.

Click **Preview Products** to check the products list if needed.

Note that preview does not show products based on frontend variable parameters: 'Viewed Together', 'Bought Together', 'Same As' and 'Current category only' Conditions.

If you want to show related products block on a product page, specify the *Source Type*.

Source Type - choose the way for related products to be assorted.

Only Product Conditions - choose this source type to display the items that fall under the conditions specified.

Viewed Together - enable this type to let the system show the products according to the history of views based on the statistical data.

Bought Together - this type displays products according to the statistical data of purchases.

Please enable 'Product View' report at the **Configuration → General → Reports** for the 'Viewed

Together' data source works properly.

Apply "Same As" Condition ☒ Yes ?

If ALL of these conditions are TRUE :

- Category is same as Current Product Categories ✖
- New is same as Current Product New ✖
- Price

equals or less than ▲

is

is not

equals or greater than

equals or less than

greater than

less than

 Current Product Price ✖

Apply "Same As" Condition - enable this option to select products by the same attribute value to display in the block.

For 'same as' condition you can set any attribute value: category, material, size, color, price and etc. For example, you can choose how to show products: display from any category or only from the same category with the selected item. The price is also variable.

If you would like to show related items on a category page, you also may enable the option to display the products from the current category only.

Products to Display

Choose the conditions to define the products that will be displayed in the "related items" block.

If **ALL** of these conditions are **TRUE** :

Color is Brown 

Size is M 

Preview Products

Yes

Please note that it is possible to use both '**is**' and '**is not**' configurations for the '*same as*' condition.

Apply "Same As" Condition

Yes

If **ALL** of these conditions are **TRUE** :

Attribute Set

is

same as Current Product 

is

is not

Sort products to show

To customize the related products block according to your needs, go to the **Display Settings** tab.

Display Settings

Block Title	<input type="text" value="You may be interested in"/>
Sort by	<div>Random </div>
Block Layout	<div>Grid </div>
Display "Add to Cart" Button	<input checked="" type="checkbox"/> Yes
Display "Add to Wish List" Button	<input checked="" type="checkbox"/> Yes
Display "Add to Compare" Button	<input checked="" type="checkbox"/> Yes
Max Products to Display	<input type="text" value="10"/>
Show "Out of Stock" Products	<input checked="" type="checkbox"/> Yes

It works based on default Magento setting. [Click here](#) to manage it.

Block Title - add a custom title to capture customers' attention.

Sort by - define the way to display the products: sort them by name, price, newest or leave it random.

Get **Amasty Improved Sorting** extension to enable additional sorting methods: by Best Seller, Most Viewed, Reviews Count and Top Rated.

Block Layout - choose the style of the block: grid or slider.

Display "Add to Cart" Button - enable this option to let your customers add products to the cart right from the block.

Display "Add to Wish List" Button - set to 'Yes' to allow customers to add products to their wish lists.

Display "Add to Compare" Button - enable this option to let your store visitors add products to comparison.

Max Products to Display - specify the suitable for your website max number of products displayed in a product block.

Show "Out of Stock" Products - exclude out-of-stock items from displaying to provide your

customers with the products they can purchase immediately.

The extension is compatible with **read-only GraphQL**. It allows to expose product data like SKU, name, link, image, price etc. in order to build PWA/JS based frontend.

Replace Items Manually

According to the rules, the extension matches related products automatically. However, you can replace or add related items manually in each product block.

Go to the **Catalog → Products**.

Choose the product needed and expand the **Related Products, Up-Sells**, and **Cross-Sells tab**.

Related Products, Up-Sells, and Cross-Sells

Related Products

Related products are shown to customers in addition to the item the customer is looking at.

[Add Related Products](#)

< 1 of 1 >

	ID	Thumbnail	Name	Status	Attribute Set	SKU	Price	Actions
	11		Endeavor Daytrip Backpack	Enabled	Bag	24-WB06	\$33.00	Remove
	12		Driven Backpack	Enabled	Bag	24-WB03	\$36.00	Remove

Up-Sell Products

An up-sell item is offered to the customer as a pricier or higher-quality alternative to the product the customer is looking at.

[Add Up-Sell Products](#)

Cross-Sell Products

These "impulse-buy" products appear next to the shopping cart as cross-sells to the items already in the shopping cart.

[Add Cross-Sell Products](#)

To add items to the necessary category, click the **Add Related/Up-Sell/Cross-Sell Products** button.

Choose the items and hit the **Add Selected Products** button.

On the preview grid you may see the information about the products: the thumbnail, the name, active status and attribute set, SKU, price.

Also, you can **Remove** them in one click if needed.

Bundle Packs

To configure and manage product bundle packs, please, go to **Catalog → Bundle Packs**.

Upsell Message	<div>Add {product_names} and save up to {discount_amount}</div> <p>Please make sure the Bundle Packs > 'Display Upsell Message in Cart' setting is enabled in the configuration. Allowed variables: {product_names}, {discount_amount}, {total_discount_amount}.</p> <p>Note:</p> <ul style="list-style-type: none"> • {total_discount_amount} is for Fixed Discount Type only; • if you set unique discounts for Bundle Pack Products the {discount_amount} variable won't be displayed.

Discount Type - three discount types are available, please choose one of them from the dropdown:

Fixed - set 'Fixed' type of the discount to apply a discount like '\$10', i.e. the fixed sum of money;

Percentage - set 'Percentage' type of the discount to apply a discount like 10% from the final price of the bundle pack, which means that the actual discount amount will vary from bundle to bundle;

Conditional Discounts - choose this option if you want to configure a differentiated discount depending on how many products are added to the cart.

Please note that the options 'Discount Amount', 'Apply Discount to the Main Product', 'Apply Discount if' and the 'Upsell Message' won't be available if you choose the 'Conditional Discounts' type. But

there becomes available a new tab ('*Conditional Discounts*') for further configurations of the conditional discounts.

Discount Type

Conditional Discounts ▼

These 4 settings below are available only if you have chosen **Fixed** or **Percentage** discount type.

Discount Amount - specify the discount amount.

The setting defines the discount for the Main Product (if the corresponding setting is enabled) and all Bundle Pack Products. You can set unique discount amounts (including 0) per each item on the Bundle Pack Products grid below (if discount fields on the grid are left empty the value of the current setting is applied as a discount).

The discount for bundle packs products will be applied above the special price if it is set.

Apply Discount to the Main Product - enable the option to apply the discount to the main product in a bundle pack.

Apply discount if - Choose from the two available options:

- Any Bundle Product is Chosen - the discount will be applied if any product from the bundle is chosen;
- All Bundle Products are Chosen - the discount will be applied only if all products from the bundle are chosen.

Please note that if set to 'All Bundle Products are Chosen':

- Bundle Pack discount will be canceled if any of bundle product is unchecked;
- Bundle Pack will not be displayed if any of bundle items is not present on the storefront.

The screenshot displays a product page for the 'Elisa EverCool™ Tee'. On the left, a model wears the purple V-neck tee. To the right, the product details show a price of \$29.00, size and color selection options, and an 'Add to Cart' button. Below the product image, a 'Bundle Packs' section is active, showing a 'Hot spring deal!' with three items: the Elisa EverCool™ Tee, a Jade Yoga Jacket, and Daria Bikram Pant. The bundle total is \$80.00, with a 'Save \$0.00' badge and an 'Add to Cart' button.

Upsell Message - specify the upsell message that will be displayed in a shopping cart. Use variables: {product_names}, {discount_amount}. The upsell message will appear only when the **Bundle Packs** → 'Display Upsell Message in Cart' setting is enabled in the configuration.

Please make sure the **Bundle Packs** → 'Display Upsell Message in Cart' setting is enabled in the configuration. Allowed variables: {product_names}, {discount_amount}, {total_discount_amount}. Please note that:

- {total_discount_amount} is for Fixed Discount Type only;
- if you set unique discounts for Bundle Pack Products the {discount_amount} variable won't be displayed.

Bundle Pack Products

of 1

>

ID	Thumbnail	Name	Type	SKU	Price	Status	Actions
1465		Elisa EverCool Tee	configurable	WS06	-	Enabled	Remove

On the **Bundle Pack Products** and **Main Products** grids, you can choose the main and bundle pack products accordingly. Choose the order of bundle pack products on the appropriate grid via drag-and-drop and specify each bundle pack product quantity.

Bundle Packs do not work with Grouped and Gift Card product types.

Bundle Pack Use Case

In case you want to set up three cross-promotional bundles with the three same products,

configuration will look like the following:

Apply Discount if ?

Bundle Pack Products

Add products

20 per page 1 of 1

	ID	Thumbnail	Name	Type	SKU	Price	Qty	Discount Amount	Status	Actions
	1		Joust Duffle Bag	simple	24-MB01	\$34.00	<input type="text" value="1"/>	<input type="text"/>	Enabled	Remove
	3		Crown Summit Backpack	simple	24-MB03	\$38.00	<input type="text" value="1"/>	<input type="text"/>	Enabled	Remove
	5		Rival Field Messenger	simple	24-MB06	\$45.00	<input type="text" value="1"/>	<input type="text"/>	Enabled	Remove

Main Products

Add Main Products

20 per page 1 of 1

ID	Thumbnail	Name	Type	SKU	Price	Status	Actions
1		Joust Duffle Bag	simple	24-MB01	\$34.00	Enabled	Remove
3		Crown Summit Backpack	simple	24-MB03	\$38.00	Enabled	Remove
5		Rival Field Messenger	simple	24-MB06	\$45.00	Enabled	Remove

Please note that for this very case you can only set up a 'flexible' bundle with the setting '**Apply discount if**' set to '**any bundle product is chosen**' only.

In case you need to set up three cross-promo bundles with the setting '**Apply discount if**' set to '**all**

bundle products are chosen' (the 'strict' bundle discount rule), then you need to create three separate bundles for each promo case for now, meaning, only with one main product at a time.

For example:

Apply Discount if All Bundle Products are Chosen ?

Bundle Pack Products 

Add products

20  per page  1 of 1 

	ID	Thumbnail	Name	Type	SKU	Price	Qty	Discount Amount	Status	Actions
	3		Crown Summit Backpack	simple	24-MB03	\$38.00	<input type="text" value="1"/>	<input type="text"/>	Enabled	Remove
	5		Rival Field Messenger	simple	24-MB06	\$45.00	<input type="text" value="1"/>	<input type="text"/>	Enabled	Remove

Main Products 

Add Main Products

20  per page  1 of 1

Find out how to install the Automatic Related Products extension via [Composer](#).

PWA for Automatic Related Products (Add-On)

The extension also works smoothly on mobile devices if combined with a ready-made PWA solution, due to which store admin can significantly improve the user shopping experience on smartphones.

The feature can be enabled only after purchasing the [PWA for Automatic Related Products Add-On](#). Also, you need to [install a PWA theme](#) first.

In order to correctly install a PWA add-on, please install the **corresponding GraphQL system package** first. For the correct name of it, please check the *composer.json* file of the main module. For

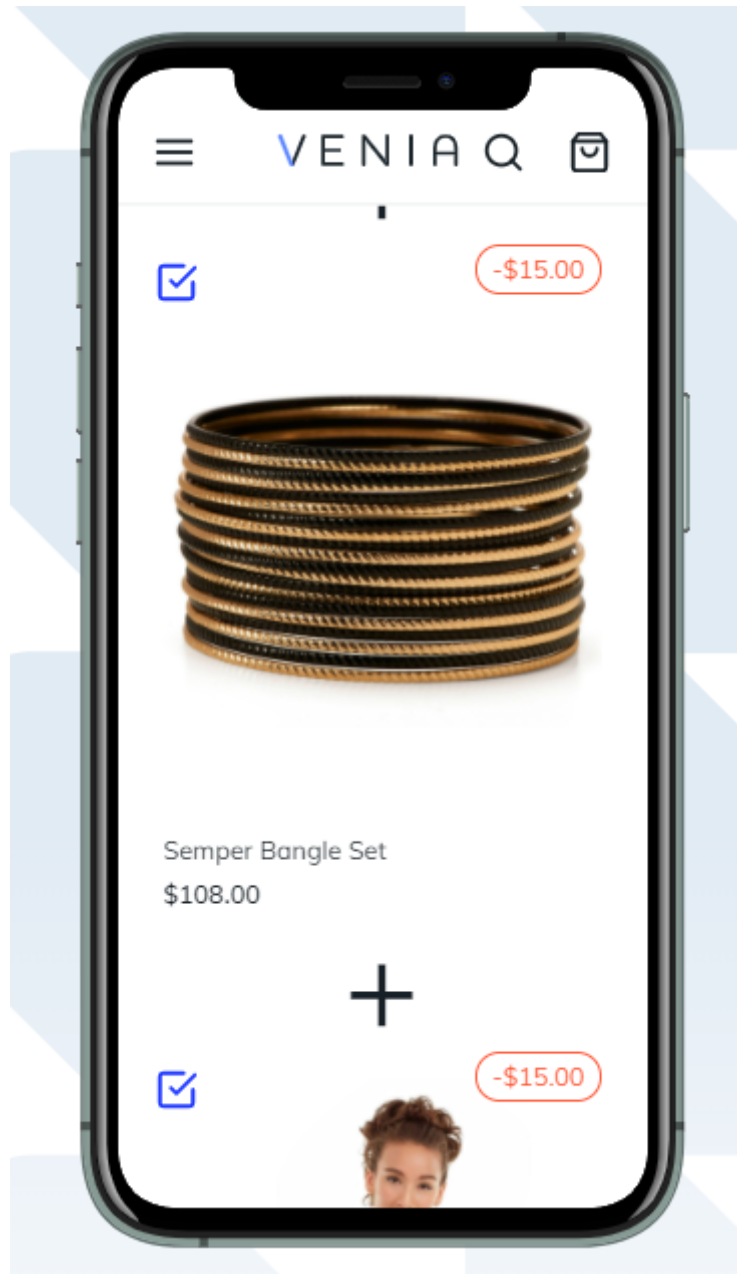

amasty

example, the GraphQL system package name of the PWA add-on for the Blog Pro extension would be the following: **amasty/blog-graphql**

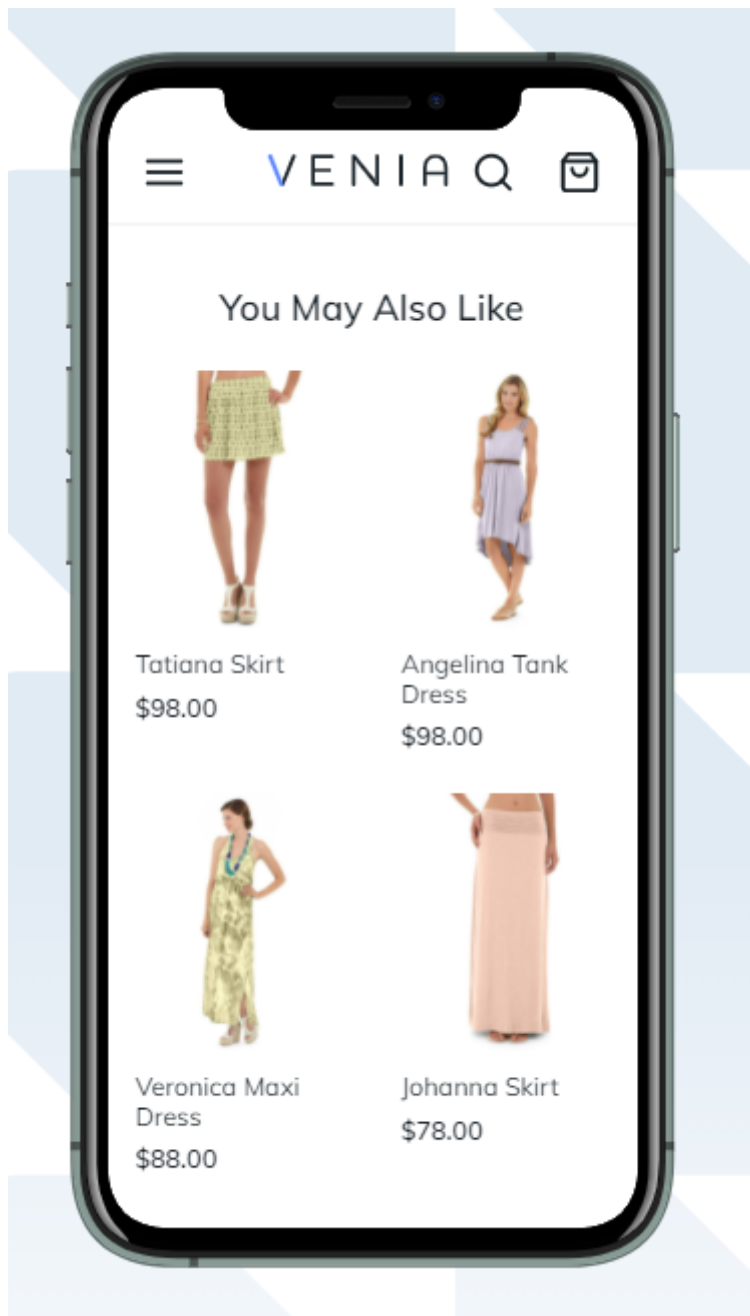

```
{
  "name": "amasty/blog",
  "description": "Amasty Blog Pro",
  "require": {
    "php": ">=7.3.0",
    "amasty/base": ">=1.13.4",
    "amasty/email-unsubscribe": "*",
    "amasty/cron-schedule-list": "*",
    "magento/framework": ">=102.0.0",
    "magento/module-catalog": "*"
  },
  "suggest": {
    "amasty/blog-page-builder": "Install blog-page-builder module to activate PageBuilder and Blog Pro integration.",
    "amasty/blog-graphql": "Install blog-graphql module to activate Graphql and Blog Pro integration.",
    "amasty/module-blog-mftf-3": "Install module-blog-mftf-3 module to be able to run Blog Pro MFTF tests for Magento 2.4.0+ version.",
    "amasty/module-blog-pro-to-builder": "Install Amasty_BlogProToBuilder module to activate the integration with Custom Reports Builder extens
  },
  "type": "magento2-module",
  "version": "2.10.4",
  "license": [
    "Commercial"
  ],
  "autoload": {
    "files": [
      "registration.php"
    ]
  },
}
```

If the add-on is installed, Venia theme will be displayed for this extension in the following way:

[Products in a bundle on Venia storefront:](#)

Products in a related items block on a product page with Venia:

Find out more about Magento PWA integration [here](#).

How to add new components of the Automatic Related Products M2 extension on Venia theme

Before you start further configuration, please read the following instructions on Venia configuration components [here](#).

You can freely add new components like blocks with related products or bundles on any place in your Venia-based store. For this, please navigate to store backend and configure the related product items display by specifying the following in the extension parameters:

For the blocks with the **related products** you need to specify:

- categoryId - ID of the category or product for which the related offering will be displayed;
- Position - you need to specify the position where the related offering will be displayed on the front.

Please have a look at the list of the available positions for this extension working in combination with the PWA add-on:

- 'product_before_related',
- 'product_after_related',
- 'product_into_related',
- 'product_before_upsell',
- 'product_after_upsell',
- 'product_into_upsell',
- 'product_content_top',
- 'product_content_tab',
- 'product_before_tab',
- 'product_content_bottom',
- 'product_sidebar_top',
- 'product_sidebar_bottom',
- 'cart_before_crosssell',
- 'cart_after_crosssell',
- 'cart_into_crosssell',
- 'cart_content_top',
- 'cart_content_bottom',
- 'category_content_top',
- 'category_content_bottom',
- 'category_sidebar_top',
- 'category_sidebar_bottom',
- 'custom'

For the **bundle packs** you need to specify:

- Id - the ID of the product for which the bundle packs' display is configured.

Please note that the option of placing bundle packs on the shopping cart is currently unavailable due to the limited Venia theme functionality as per now.

Please note that bundle packs are currently working only for configurable and simple types of products due to the limited Venia theme functionality as per now.

Please note that it's currently unavailable to place and manage bundle packs on the CMS pages due to the limited Venia theme functionality as per now.

Here's an *example* of how to add the related product components on the *Cart page*:

Please note that as per the moment of creation of this guide the Shopping Cart page on Venia theme is not fully developed yet.

1. Copy the component's folder of the search page into the folder with our components:

```
cd myproject
mkdir -p src/lib/components/
```

```
cp -R node_modules/@magento/venia-ui/lib/components/CartPage  
src/lib/components/
```

Edit the component *searchPage.js*. Change all relative ways of components import to absolute:

```
@magento/venia-ui/lib/PATCH_TO_COMPONENT_FOLDER
```

for example:

```
import Button from '../Button';
```

to

```
import Button from '@magento/venia-ui/lib/components/Button';
```

Add import of the component Related Products import RelatedProducts from

```
'../../components/AmRelatedProducts';
```

Choose the place where to place the component:

```
<RelatedProducts categoryId={3} position={'cart_content_bottom'}/>
```

As a result, the file *searchPage.js* should look like the following below:

```
import React, { useMemo } from 'react';  
  
import { useCartPage } from  
'@magento/peregrine/lib/talons/CartPage/useCartPage';  
  
import { Title } from '@magento/venia-ui/lib/components/Head';  
import Button from '@magento/venia-ui/lib/components/Button';  
  
import PriceAdjustments from '@magento/venia-  
ui/lib/components/SearchPage/PriceAdjustments';  
import PriceSummary from '@magento/venia-  
ui/lib/components/SearchPage/PriceSummary';  
import ProductListing from '@magento/venia-  
ui/lib/components/SearchPage/ProductListing';  
import { mergeClasses } from '@magento/venia-ui/lib/classify';  
import defaultClasses from '@magento/venia-  
ui/lib/components/SearchPage/cartPage.css';  
import { GET_CART_DETAILS } from '@magento/venia-  
ui/lib/components/SearchPage/cartPageQueries';  
import RelatedProducts from '../../components/AmRelatedProducts';
```

```
const CartPage = props => {
  const talonProps = useCartPage({
    queries: {
      getCartDetails: GET_CART_DETAILS
    }
  });

  const {
    handleSignIn,
    hasItems,
    isSignedIn,
    isCartUpdating,
    setIsCartUpdating
  } = talonProps;

  const classes = mergeClasses(defaultClasses, props.classes);

  const signInDisplay = useMemo(() => {
    return !isSignedIn ? (
      <Button
        className={classes.sign_in}
        onClick={handleSignIn}
        priority="high"
      >
        {'Sign In'}
      </Button>
    ) : null;
  }, [classes.sign_in, handleSignIn, isSignedIn]);

  const productList = hasItems ? (
    <ProductListing setIsCartUpdating={setIsCartUpdating} />
  ) : (
    <h3>There are no items in your cart.</h3>
  );

  const priceAdjustments = hasItems ? (
    <PriceAdjustments setIsCartUpdating={setIsCartUpdating} />
  ) : null;

  const priceSummary = hasItems ? (
    <PriceSummary isCartUpdating={isCartUpdating} />
  ) : null;

  return (
    <div className={classes.root}>
      <Title>{'Cart - ${STORE_NAME}'}</Title>
      <div className={classes.heading_container}>
        <h1 className={classes.heading}>Cart</h1>
        {signInDisplay}
      </div>
    </div>
  );
};
```

```

        </div>
        <div className={classes.body}>
            <div
className={classes.items_container}>{productListing}</div>
            <div className={classes.price_adjustments_container}>
                {priceAdjustments}
            </div>
            <div className={classes.summary_container}>
                <div className={classes.summary_contents}>
                    {priceSummary}
                </div>
            </div>
            <div className={classes.recently_viewed_container}>
                <a href="https://jira.corp.magento.com/browse/PWA-270">
                    Recently Viewed to be completed by PWA-270.
                </a>
            </div>
        </div>

        <RelatedProducts categoryId={3}
position={'cart_content_bottom'}/>
    </div>
);
};

export default CartPage;

```

2. Add the edited file into the override map of standard components *componentOverrideMapping.js*

```

[ `@magento/venia-ui/lib/components/CartPage/cartPage.js` ]:
'src/lib/components/CartPage/cartPage.js',

module.exports = componentOverride = {
    [ `@magento/venia-ui/lib/RootComponents/Category/category.js` ]:
'src/lib/RootComponents/Category/category.js',
    [ `@magento/venia-ui/lib/RootComponents/Product/product.js` ]:
'src/lib/RootComponents/Product/product.js',
    [ `@magento/venia-ui/lib/components/CartPage/cartPage.js` ]:
'src/lib/components/CartPage/cartPage.js',
};

```

3. Run the Watch command: `'yarn watch'`.

FAQ

[Why a bundle pack is not displayed on the frontend?](#)

I've set up a rule with the 'same as' condition, but it doesn't seem to work.

Why taxes are applied to bundle products after discount?

Why can't I use an attribute as a condition in Where to Display and Products to Display tabs?

If there are several rules applicable for the same product on the same block, will several related product blocks be displayed?

I've set up an automatic related rule based on a custom attribute, but nothing is displayed on the front-end. What might be the problem here?

Find more questions and answers [here](#).

You can also explore some best practices of product recommendations in our recent [blog article](#).
