Please go to System -> Configuration -> Customer Configuration -> Name and Address Options and make sure that "Show date of birth" setting is set either to "Optional" or to "Required".

To configure the extension please go to System -> Configuration -> Birthday Coupon page

If you set "Send E-mails" to "No", coupon notifications will not be sent.

You can send birthday coupons, before, after or right on the birthday. If you indicate '-5' like here, the coupon will be sent 5 days before birthday. Specify '0' (zero) for the coupon to be sent right on birthday or let's say '3' for it to be sent 3 days after birthday.

You can send registration coupons to customers – indicate the number of days after registration when the coupon should be sent. To send the coupons on the day of registration – specify '0' (zero) in this field. Indicate '-1' to disable sending of registration coupons.

You can specify discount type (percent, fixed per product and fixed per whole cart), discount amount, expiry period and the number of coupon uses.
