Table of contents:

1.	<u>Call for Price Options.....</u>	<u>3</u>
2.	<u>Advanced Options for custom templates.....</u>	<u>4</u>
3.	<u>Price Block Customization for particular products.....</u>	<u>5</u>
4.	<u>Frontend Examples</u>	<u>7</u>

1. Call for Price Options

To set up Call for Price, please go to:
System > Configuration > Call for Price

Here you can specify the text displayed instead of the “Add to Cart” button as well as the link URL for the button to direct customers to pages you need.

The screenshot shows the Magento 2 admin interface. The top navigation bar includes 'Dashboard', 'Sales', 'Catalog', 'Customers', 'CMS', and 'System' (highlighted). A 'Get help for this page' link is visible. On the left, the 'Configuration' sidebar shows 'Call For Price' selected. The main content area is titled 'Call For Price' and includes a 'Save Config' button. Below this is the 'Call For Price Options' section, which contains three rows of configuration options:

Field	Value	Scope
Link Text	CALL FOR PRICE	[STORE VIEW]
Link Url	http://example.com/	[STORE VIEW]
Enable Global	No	[STORE VIEW]

Below the options section is a 'Prototype CSS selectors (advanced options for custom templates)' section.

Callout boxes provide additional instructions:

- Top-left: 'To set up Call for Price, please go to: System > Configuration > Call for Price'
- Top-right: 'Here you can specify the text displayed instead of the “Add to Cart” button as well as the link URL for the button to direct customers to pages you need.'
- Bottom-left: 'Set this option to “yes” if you want to apply the tool for all products in your store.'

Call For Price Options

Link Text	<input type="text" value="CALL FOR PRICE"/>	[STORE VIEW]
Link Url	<input type="text"/>	[STORE VIEW]
Enable Global	<input type="text" value="No"/>	[STORE VIEW]

Prototype-like css selectors (advanced options for custom templates)

Product list. Price box	<input type="text" value="div.price-box"/>	[STORE VIEW]
Product list. "Add to cart" button	<input type="text" value="div.actions"/>	[STORE VIEW]
Product list. Product link	<input type="text" value=".product-name > a"/>	[STORE VIEW]
Product view. Price box	<input type="text" value="div.product-essential div.price-box"/>	[STORE VIEW]
Product view. Tier price	<input type="text" value="div.product-essential ul.tier-prices"/>	[STORE VIEW]
Product view. Price notice	<input type="text" value="div.product-essential span.price-notice"/>	[STORE VIEW]
Product view. Price label	<input type="text" value="div.product-essential div.price-box-bundle"/>	[STORE VIEW]
Product view. Qty input	<input type="text" value='div.product-essential label[for="qty"]'/>	[STORE VIEW]
Product view. Qty label	<input type="text" value="div.product-essential input#qty"/>	[STORE VIEW]
Product view. "Add to cart" button	<input type="text" value="div.product-essential button.btn-cart"/>	[STORE VIEW]
Upsell products. Product link	<input type="text" value="h3.product-name > a"/>	[STORE VIEW]
Upsell products. Product price box	<input type="text" value="div.price-box"/>	[STORE VIEW]
Related products. Product link	<input type="text" value="p.product-name > a"/>	[STORE VIEW]

These settings are quite complex from a programming perspective. They are used for adjusting the extension to your custom theme.

NOTE! If you need help in configuration, please create a [support ticket](#).
