Configurable Preselect

General Settings

Preselect First Options for All Products

To specify general extension settings, please go to System -> Configuration -> Amasty Extensions Tab.

Lets say that configurable products in your store have 2 options: size and color. By default Magento doesn't display the second option (color), while the first (size) is not selected. If Preselect First Option is set to 'Yes', both configurable options (color and size) will be displayed on page load for all products.

2. Choose default product

- Customers Tagged Product
- Custom Options
- Associated Products**
- Product Orders

To specify default option for a configurable product please go to edit the product in admin panel, open 'Associated Products' tab, find 'Default Configurable Preselect' block and indicate the id of the simple product, which should load by default.

Super product attributes configuration

Price values for options should be specified in system base currency.
Attribute names can be specified per store.

Attribute Name:	Shoe Size	<input type="checkbox"/> Use default (Shoe Size)
Option: 8	Price:	Fixed
Option: 9	Price:	Fixed
Option: 10	Price:	Fixed
Option: 11	Price:	Fixed
Option: 12	Price:	Fixed

Default Configurable Preselect

Default Simple Product ID:

This product will be automatically preselected on the configurable page at the frontend.

You can look up the id of the simple product here.

Page 1 of 1 pages | View 20 per page | Total 5 records found Reset Filter Search

<input checked="" type="checkbox"/>	ID	Name	Attrib. Set Name	SKU	Price	Inventory	Shoe Size	Action
Yes					From: <input type="text"/> To: <input type="text"/>			
<input checked="" type="checkbox"/>	30	ASICS® Men's GEL-Kayano® XII	Shoes	asc_8	\$134.99	In Stock	8	Edit

You can also give direct link to an option of configurable product, by specifying id of the simple product in the url.

For example you have product url http://your_site_url.com/product.phtml. Add '?sel=' and id of the simple product after the url to get a link like this:

<http://yoururl.com/product.phtml?sel=2>

When a customer opens such link, the configurable product page will display the simple product, id of which is indicated in the link.

Thank you!

Should you have any questions or feature suggestions, please send an email to:
