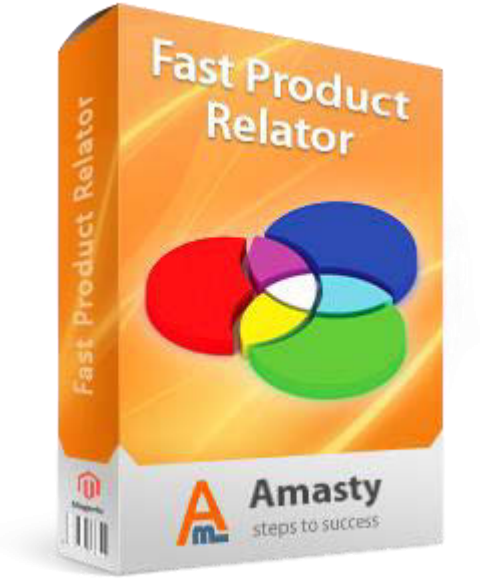
Fast Product Relator



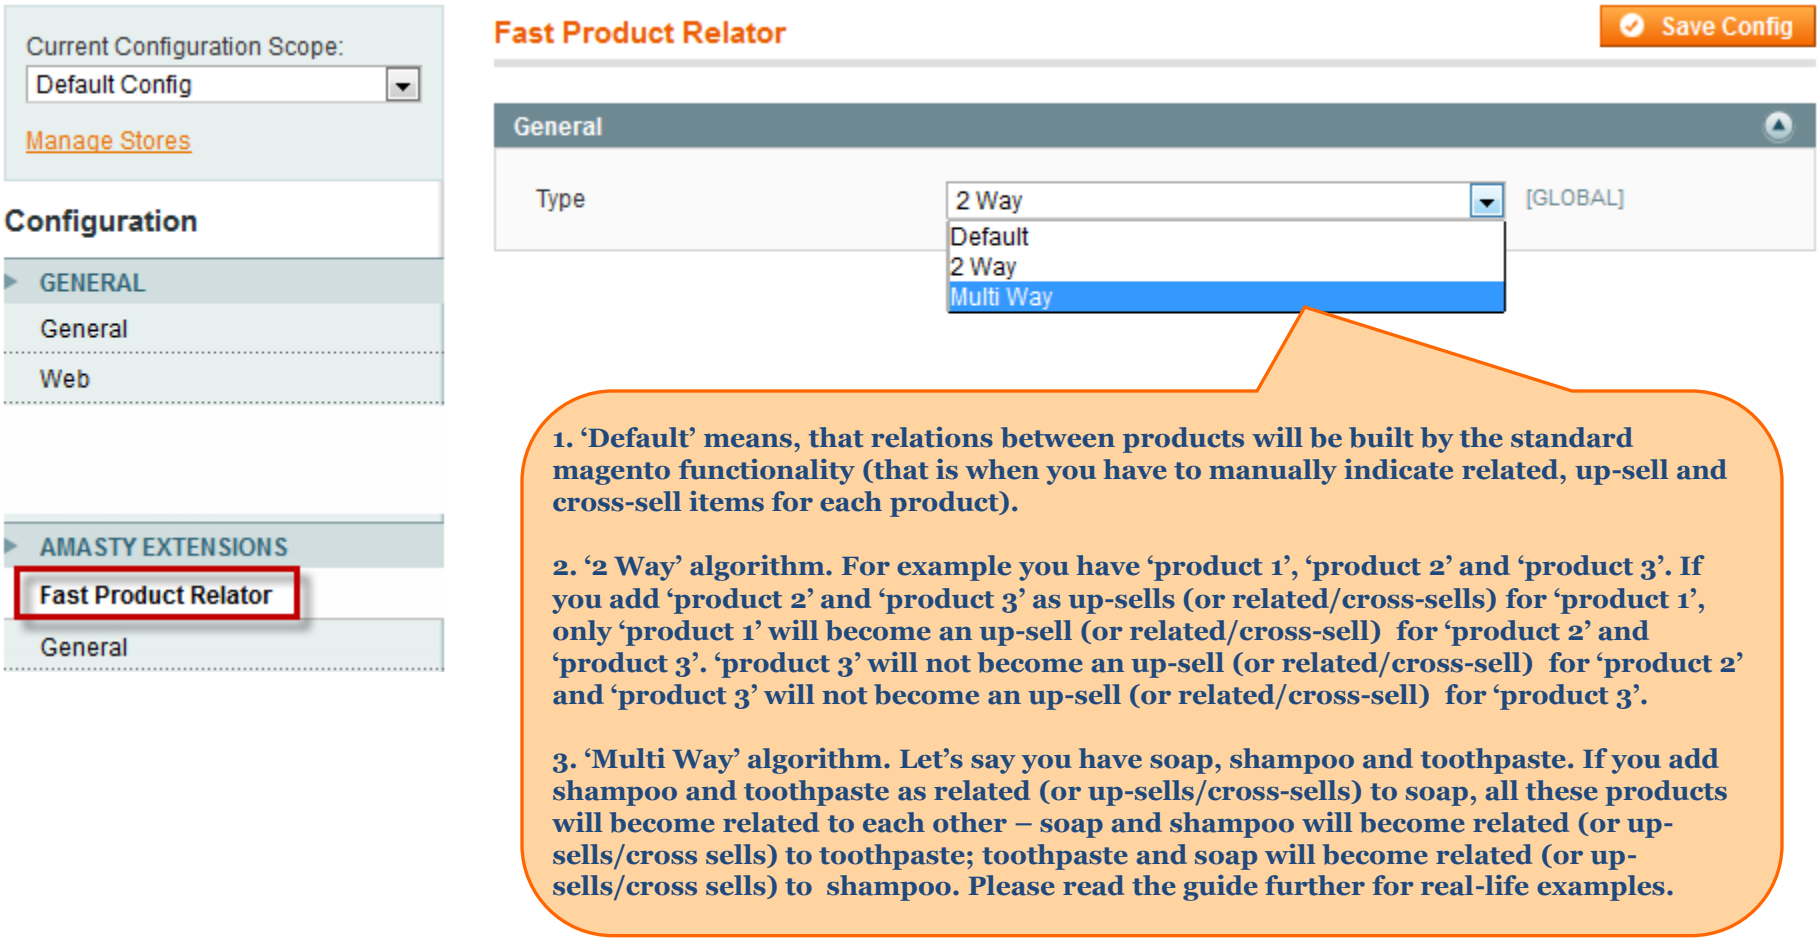
Magento Extension
User Guide

Official extension page: Fast Product Relator

Table of contents:

1. Choose relating algorithm 3
2. '2 Way' algorithm 4
3. 'Multi Way' algorithm 6
4. Example of a front end block 8

Please go to admin panel -> System -> Configuration -> Fast Product Relator to choose the product relating algorithm.



1. 'Default' means, that relations between products will be built by the standard magento functionality (that is when you have to manually indicate related, up-sell and cross-sell items for each product).

2. '2 Way' algorithm. For example you have 'product 1', 'product 2' and 'product 3'. If you add 'product 2' and 'product 3' as up-sells (or related/cross-sells) for 'product 1', only 'product 1' will become an up-sell (or related/cross-sell) for 'product 2' and 'product 3'. 'product 3' will not become an up-sell (or related/cross-sell) for 'product 2' and 'product 3' will not become an up-sell (or related/cross-sell) for 'product 3'.

3. 'Multi Way' algorithm. Let's say you have soap, shampoo and toothpaste. If you add shampoo and toothpaste as related (or up-sells/cross-sells) to soap, all these products will become related to each other – soap and shampoo will become related (or up-sells/cross sells) to toothpaste; toothpaste and soap will become related (or up-sells/cross sells) to shampoo. Please read the guide further for real-life examples.

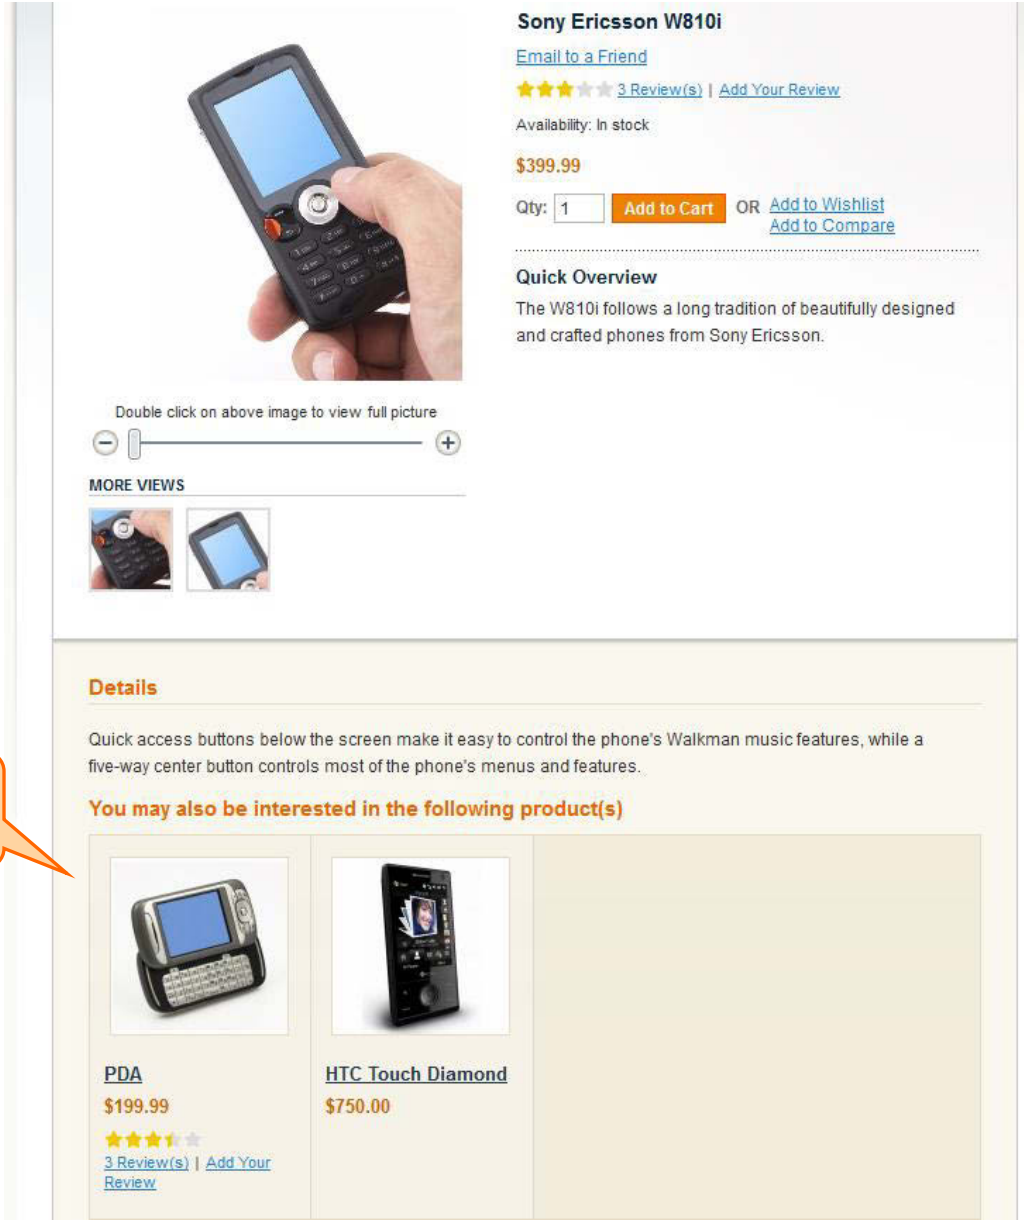
As you see now both 'PDA' and 'HTC Touch Diamond' have become up-sells for 'Sony Ericsson W810i' (also 'PDA' and 'Sony Ericsson W810i' have become up-sells for 'HTC Touch Diamond').

‘PDA’ and ‘HTC Touch Diamond’ in up-sells block of ‘Sony Ericsson W810i’ on front end.



Thank you!
