To import the files from your own source, use import option. Path to the files should look like this. Replace the selected part with your folders' names.

1. GeoIP Redirect settings

Please go to Stores -> Configuration -> GeoIP Redirect

The screenshot shows the Magento configuration page for GeoIP Redirect. The left sidebar contains navigation options: DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area is titled 'Geo Ip Data' and 'GeoIp Redirect'. The 'GENERAL' tab is selected, showing the following settings:

- Enable GeoIP Redirect:** Yes (General setting affecting all rules). Callout: **Enable or disable redirection.**
- Restriction:** Callout: **Select the general logic of redirecting rules.**
 - Apply Logic To:** All Except Specified URLs (dropdown menu with options: All URLs, Specified URLs, All Except Specified URLs, Redirect From Home Page Only). Callout: **If you choose 'Specified URLs' or 'All Except Specified URLs' options, define the excepted URLs here.**
 - Excepted URLs:** /about-us/ (text area). Callout: **Ignore redirection rules for search engines.**
- User Agents to Ignore:** googlebot, yahoo, msnbot (text area).
- Restriction by Ip:** 333.567.3.890, 777.456.2.770 (text area). Callout: **Restrict redirection for certain Ip addresses.**

Each IP on a separate line.

1. GeoIP Redirect settings

It's possible to enable redirection only for the first visit. Beware that if you set this option to 'No', customer wouldn't be able to switch store view and currency at their desire.

SERVICES ▼

ADVANCED ▼

First visit redirect only

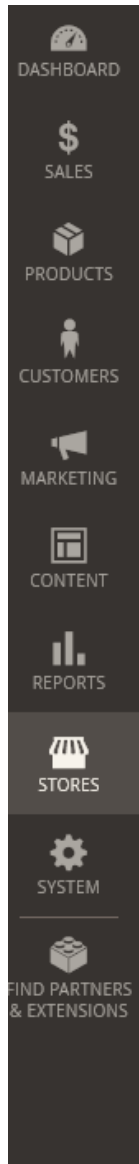

Warning! If you select "No" visitors will be not able to change Store View / currency.

Redirect Between Websites

If you have several websites, it's possible to enable redirection between them.

2. Choose redirection options
