Apply the rule only if the following conditions are met (leave blank for all products)

If **ALL** of these conditions are **TRUE** :

Total Items Quantity **equals or greater than 3**

When setting conditions, please make sure that one of the conditions is Total Items Quantity 'equals or greater than (any amount above 1)'. This is very important, because in some cases a customer can have only one item in the shopping cart and it could adhere to all the conditions and the customer would get the item for free.

 **Edit Rule 'getfree'**

Update prices using the following information

Apply	<input type="text" value="Get cheapest product for free"/>
Discount amount *	<input type="text" value="Percent of product price discount"/>
Maximum Qty Discount is Applied to	<input type="text" value="Fixed amount discount"/>
Discount Qty Step (Buy X)	<input type="text" value="Fixed amount discount for whole cart"/>
Apply to Shipping Amount	<input type="text" value="Buy X get Y free (discount amount is Y)"/>
Free shipping	<input type="text" value="Get cheapest product for free"/>
Stop further rules processing	<input type="text" value="0"/>
	<input type="text" value="No"/>
	<input type="text" value="No"/>
	<input type="text" value="No"/>

Choose 'Get cheapest product for free' action at the 'Actions' page.

Apply the rule only to cart items matching the following conditions (leave blank for all items)

If **ALL** of these conditions are **TRUE** :

- Category **is 8** 
- Manufacturer **is Canon** 
- 

You can use all standard magento conditions with the new action. If you would like to provide for free items only from a certain category or of a particular brand, please indicate the category and/or brand here.

It is possible to give customers more than one cheapest item in one order. You can have discounts like 'Get 1 cheapest product free for each 3 purchased products', so if a customer buys 12 products, he/she will get 3 cheapest items for free. You can also limit the number of free items a customer can get in one order.

Use 'Discount Qty Step (Buy X)' field to specify how many products customers need to buy to get one free item. If you indicate 4 like here, that means that from every 4 items purchased customers will get 1 for free (that means three products will be paid and one free). If you leave '0' (zero), customers will get only 1 free item per order (if conditions are met).

 **Edit Rule 'getfree'**

Update prices using the following information

Apply	Get cheapest product for free
Discount amount *	3
Maximum Qty Discount is Applied to	0
Discount Qty Step (Buy X)	4
Apply to Shipping Amount	No
Free shipping	No
Stop further rules processing	No

Use 'Discount amount' field to indicate maximum amount of free items a customer can get in one order. If you leave '0' (zero), there will be no limitation.

Apply the rule only to cart items matching the following conditions (leave blank for all items)

If **ALL** of these conditions are **TRUE** :
