Attribute Images

Use images for selection of configurable product options

Delete Attribute Save Attribute Save and Continue Edit

Update Images

Tick this checkbox before pressing 'Update Images' button to enable image-based selection of options of this attribute for configurable products.

After you install the extension, a new tab called 'Attribute Images' will appear for attributes that are used for creation of configurable products. At this tab you can upload an image for each attribute option.

Please press 'Update Images' button once you have chosen the images (otherwise they will not get uploaded).

Status Label	Upload image		
12	<input type="text"/> <input type="button" value="Browse..."/>	12	<input type="checkbox"/>
11	<input type="text"/> <input type="button" value="Browse..."/>	11	<input type="checkbox"/>
10	<input type="text"/> <input type="button" value="Browse..."/>	10	<input type="checkbox"/>

You can find the extension settings in admin panel -> System -> Configuration -> Image-Based Dynamic Configurable Products.

If you would like to use only images for selection of configurable product options, set 'Hide Configuration Drop-Downs' option to 'Yes'.

With 'Reload Product Images' set to 'Yes', default images of configurable products will be replaced with the images of the particular simple product configured by a customer.

Image-Based Dynamic Configurable Products

Save Config

General Settings	
Enabled	Yes [STORE VIEW]
Hide Configuration Drop-Downs	No [STORE VIEW]
Reload Product Images	Yes [STORE VIEW] ▲ If set to 'Yes', default product images will be replaced with images of the specific simple product, configured by customer
Replacement Image If No Product Image Found	<input type="text"/> Browse... [STORE VIEW] <input type="checkbox"/> Delete Image ▲ This image will be used if no product image uploaded for the current selection. Do not upload any image if you do not need this functionality.

Image-Based Dynamic Configurable Products

Save Config

General Settings	
Enabled	Yes [STORE VIEW]
Hide Configuration Drop-Downs	No [STORE VIEW]
Reload Product Images	Yes [STORE VIEW] ▲ If set to "Yes", default product images will be replaced with images of the specific simple product, configured by customer
Replacement Image If No Product Image Found	<input type="text"/> Browse... [STORE VIEW] <input type="checkbox"/> Delete Image ▲ This image will be used if no product image uploaded for the current selection. Do not upload any image if you do not need this functionality.
Reload Product Name	Yes [STORE VIEW] ▲ If set to "Yes", default configurable product name will be replaced with the name of the specific simple product
Show "Reset Configuration" option	Yes [STORE VIEW]
Reload Product Information When The First Attribute Selected	No [STORE VIEW] ▲ If set to "Yes", product images and descriptions will get reloaded after the first attribute is selected (first values of the other attributes will be used).

If you haven't uploaded images for some options of configurable products and would like to use a default image for such options, please upload the default image here.

If 'Reload Product Name' is set to 'Yes', product name will be replaced with the name of simple product chosen by customer.

By default the extension displays 'Reset Configuration' link on front end for each configurable product. By clicking it, a customer can reset his attribute selections. If you would like to disable this feature, turn this setting to 'No'

Here's an example of extension usage. These are two screenshots of the same product. The extension enables you to show images and descriptions of the simple products configured by customers.

Dropdown fields can be used for selection either together with images of can be disabled.

By default image selections are highlighted by yellow frame, you can modify the frame look by editing the following css file: `skin/frontend/default/default/css/amasty/amconf.css`

Thank you!
