Lightbox and Zoom

Lightbox and Zoom Save Config

General Settings

Enable "Click-Zoom" feature [STORE VIEW]
▲ Set to "No" to keep default Magento zoom

Enable "Lightbox" feature [STORE VIEW]
▲ Set to "No" to replace main image pre-view with the clicked one (with zoom feature available)

Image Size Settings

Size of the thumbnail image (px) [STORE VIEW]
▲ 56 pixels by default. Do not modify this value until you really need to.

Size of the preview image (px) [STORE VIEW]
▲ 265 pixels by default. Do not modify this value until you really need to.

Extension settings can be found in admin panel -> System -> Configuration -> Lightbox and Zoom.

Also you can modify the size of thumbnails and preview image for product images block. We recommend to use this feature only when necessary, for example when you need to adjust the size of thumbnails and preview image for design template. Otherwise you may corrupt design of your product page.

2. Lightbox usage example

The screenshot shows a lightbox for an orange. The lightbox contains a large image of an orange and a slice, with a 'NEXT' button in the top right and a 'CLOSE X' button in the bottom right. Below the image, the text 'Juicy' and 'Image 3 of 6' is visible. The background shows a shopping cart with 20 items, a subtotal of \$28,499.80, and a 'Checkout' button. There is also a 'RECENTLY VIEWED PRODUCTS' section.

Extension settings can be found in admin panel -> System -> Configuration -> Lightbox and Zoom.

3. Zoom usage example

Click on above image to zoom it. Move your mouse.

MORE VIEWS

Then click the preview image and move the cursor above the preview image to view the zoomed picture.

To use zoom feature, click on the thumbnail that you would like to zoom.

Click on above image to zoom it. Move your mouse.

MORE VIEWS

IMPORTANT. Please be aware that only the base image can be zoomed when lightbox is activated.

Thank you!
