Configuration

To specify the minimal percent discount please use 'Minimal discount percentage' setting.

Design

AMASTY EXTENSIONS

General

Product Labels

Product Labels

At the configuration page you can specify the minimal discount amount for display of labels, which use 'On Sale' condition. Please be aware this is a flat amount, not percent.

'On Sale' Condition

Minimal discount amount	<input type="text" value="0"/>	[STORE VIEW]
Minimal discount percentage	<input type="text" value="0"/>	[STORE VIEW]
Rounding of discount percentage	<input type="text" value="By rules of mathematical rounding"/>	[STORE VIEW]

'Is New' Condition

Use 'New from Date' and 'New to Date'	<input type="text" value="Yes"/>	[STORE VIEW]
Use 'Creation Date'	<input type="text" value="No"/> <small>▲ It will not be used if previous setting set to 'Yes' and product have 'New from Date' or 'New to Date' attributes</small>	[STORE VIEW]
Product is new threshold	<input type="text" value="0"/> <small>▲ In days</small>	[STORE VIEW]

Extension setting can be found in admin panel -> System -> Configuration -> Product Labels.

Product Labels

Save Config

In some cases discounts can be decimal, so the extension lets you round them to a whole number. You can use three algorithms:

- 1.To next lowest integer. With this algorithm 20.3 will be rounded to 20
- 2.Mathematical rounding. 20.4 will be rounded to 20 and 20.6 will be rounded to 21.
- 3.To next highest integer. 20.3 will be rounded to 21.

'On Sale' Condition		
Minimal discount amount	<input type="text" value="0"/>	[STORE VIEW]
Minimal discount percentage	<input type="text" value="0"/>	[STORE VIEW]
Rounding of discount percentage	<input type="text" value="By rules of mathematical rounding"/>	[STORE VIEW]
	<ul style="list-style-type: none">The next lowest integer valueBy rules of mathematical roundingThe next highest integer value	
'Is New' Condition		
Use 'New from Date' and 'New to Date'	<input type="text" value="Yes"/>	[STORE VIEW]
Use 'Creation Date'	<input type="text" value="No"/>	[STORE VIEW]
	<p>▲ It will not be used if previous setting set to 'Yes' and product have 'New from Date' or 'New to Date' attributes</p>	
Product is new threshold	<input type="text" value="0"/>	[STORE VIEW]
	<p>▲ In days</p>	

Product Labels

Save Config

'On Sale' Condition

Minimal discount amount	<input type="text" value="0"/>	[STORE VIEW]
Minimal discount percentage	<input type="text" value="0"/>	[STORE VIEW]
Rounding of discount percentage	<input type="text" value="By rules of mathematical rounding"/>	[STORE VIEW]

'Is New' Condition

Use 'New from Date' and 'New to Date'	<input type="text" value="Yes"/>	[STORE VIEW]
Use 'Creation Date'	<input type="text" value="No"/>	[STORE VIEW]
	<small>▲ It will not be used if previous setting set to 'Yes' and product have 'New from Date' or 'New to Date' attributes</small>	
Product is new threshold	<input type="text" value="0"/>	[STORE VIEW]
	<small>▲ In days</small>	

You can choose options for the 'Is New' condition. If you set this option to 'Yes', the extension will consider products as new between 'New from Date' and 'New to Date'.

Alternatively you can choose the products to be new a certain amount of days after creation date. For please set 'Use Creation Date' to yes and specify the desired number of days in the 'Product is new threshold'.

2. Creation of product labels

To add a new label press 'Add Label' button.

The screenshot displays the Amasty admin interface. The top navigation bar includes 'Dashboard', 'Sales', 'Catalog', 'Mobile', 'Customers', 'Promotions', 'Newsletter', 'CMS', 'Reports', and 'System'. The 'Catalog' menu is expanded, showing options like 'Manage Products', 'Manage Categories', 'Attributes', 'URL Rewrite Management', 'Search Terms', 'Reviews and Ratings', 'Tags', 'Google Sitemap', and 'Product Labels'. The 'Product Labels' section is active, showing a table with one record. The table has columns for 'Label', 'Product Page Text', 'Category Page', and 'Category Page Text'. The first record shows a yellow starburst label and a green starburst label. The 'Add Label' button is highlighted in orange. A callout box points to the 'Add Label' button, and another callout box points to the 'Product Labels' menu item.

To create labels please go to admin panel -> Catalog -> Product Labels.

ID	Name	Label	Product Page Text	Category Page	Category Page Text
1	On sale		Save {SAVE_PERCENT}!		Save {SAVE_PERCENT}!

Text Style

At the images tab you can indicate the text that should be displayed on the label. It is not mandatory to specify the text.

You can utilize following variables in the label texts:

- **{ATTR:code}** - with this variable you can display value of any attribute in the label text. Please replace 'code' with the code of the actual attribute. For example, {ATTR:manufacturer} would display the product manufacturer.
- **{SAVE_PERCENT}**. Saving percentage, it's the percentage margin between regular price and special price. If you specify in admin panel '**Sale! {SAVE_PERCENT} OFF!**', on front end it will be '**Sale! X% OFF!**', X stands for the percent number.
- **{SAVE_AMOUNT}**. Flat savings amount, represents flat difference between regular price and special price. So '**Save {SAVE_AMOUNT}!**' results into '**Save \$X!**'. X is the amount, '\$' sign will be automatically replaced with the symbol of your currency.
- **{PRICE}** displays regular price.
- **{SPECIAL_PRICE}** displays special price.
- **{NEW_FOR}** shows how many days ago a product was added. '**NEW! Arrived just {NEW_FOR} days ago!**' will be shown as '**NEW! Arrived just X days ago!**', where X is the amount of days.
- **{SKU}** displays product SKU.
- **{BR}** - new line. The extension automatically breaks messages into several lines if they are too long. If you need to display some word or phrase in a separate line, please use **{BR}** variable.

4. Text and images for labels

Text	<input type="text" value="\$10 discount"/> ▲ Variables: {ATTR:code} - attribute value, {SAVE_PERCENT} - save percents, {SAVE_AMOUNT} - save amount, {PRICE} - price, {SPECIAL_PRICE} special price, {BR} - new line, {NEW_FOR} - how may days ago the product was added, {SKU} - product SKU
Image	<input type="button" value="Browse..."/> No file selected.  <input type="checkbox"/> Remove
Position	<input type="text" value="Bottom Right"/>
Styles	<input type="text"/>
Text Style	<input type="text"/> ▲ Example: color:red;font-size:12px;
Label Width	<input type="text" value="30"/> ▲ Percent of the product image; This property is applicable only for automatic label adding
Label Height	<input type="text" value="30"/> ▲ Percent of the product image; This property is applicable only for automatic label adding

In case if you use auto labels adding, you need to add label width and label height percentage of the original image.

This action is required for correct label view on the Product and Category pages.

Also at the 'Images' tab you can upload images for labels. Either use your own images or the ones provided with the extension.

NOTE: Please click [here](#) to download the pack of predefined images.

You can use different images for category and product pages (e.g smaller image for category page and a bigger one for product page).

It is possible to choose label position both for product and for category pages.

Conditions

At the 'Conditions' tab you can specify to which products to apply the label:

1. If you select option 'All matching products and SKUs listed below', the label will be applied to all products which meet the conditions specified at this tab and also to the products, SKUs of which are indicated in 'SKUs' field.

2. If you select option 'All matching products except SKUs listed below', the label will be applied to all products which meet the conditions specified at this tab, however will not be applied to the products, SKUs of which are indicated in 'SKUs' field.

3. If you select option 'SKUs listed below only', the label will be applied only to the the products, SKUs of which are indicated in 'SKUs' field.

5. Conditions for label display

For 'Is New' option you can select:

1. 'Does not matter'. In this case the option will be ignored.
2. 'Yes'. The label will be applied only to products that are set as new.
3. 'No'. The label will be applied only to products that are NOT set as new.

For 'Is on Sale' option you can select:

1. 'Does not matter'. In this case the option will be ignored.
2. 'Yes'. The label will be applied only to products that have special price and the discount amount is higher than specified at the configuration page.
3. 'No'. The label will be applied only to products that do not have a special price.

You can choose to products of which category the label should be applied

State

6. Assign labels to individual products

It is possible to assign labels to individual products when editing products in admin panel.

The screenshot displays the Magento admin panel interface for editing a product. The top navigation bar includes links for Dashboard, Home, Customers, Promotions, Newsletter, CMS, Reports, and System. The product title is 'Logitech diNovo Edge Keyboard (Default)'. A 'Back' button is located in the top right corner. On the left, there is a 'Choose Store View' dropdown set to 'Default Values' and a 'Product Information' sidebar with tabs for General, Prices, Meta Information, Images, Description, Design, Recurring Profile, Gift Options, Inventory, and Websites. The main content area is titled 'Associated Labels' and contains two rows: 'New Products' with an unchecked checkbox and a yellow starburst label image, and 'On Sale' with an unchecked checkbox and an orange starburst label image.

Here's an example of labels on category page.

 	 	
<u>HTC Touch Diamond</u> Regular Price: \$750.00 Special Price: \$500.00	<u>Samsung MM-A900M Ace</u>  5 Review(s) Regular Price: \$150.00 Special Price: \$120.00	<u>AT&T 8525 PDA</u>  3 Review(s) \$199.99
