Grid Attribute Columns

Allow different attribute columns for different admin users Yes

Enable zoom for thumbnail image Yes

This setting allows adding different attribute columns to the grid for different admin users. It is very convenient if you have several product admins – each of them can add the columns that are necessary for him or her.

1. Extended Product Greed with Editor: General Settings

Additional Grid Columns

Qty Sold To	<input type="text" value="2016-03-01"/>	[GLOBAL]
Qty Sold From	<input type="text" value="2016-03-15"/>	
Enable category filter	<input type="text" value="No"/>	
<small>▲ Allow to filter by category on the product grid, but increases server load. "Show category information" option should be set to "Yes" in order to make this setting work.</small>		
Products Qty	<input type="text" value="5"/>	[STORE VIEW]
<small>▲ Related to: related product, up-sells, cross-sells</small>		
Share attribute templates between users	<input type="text" value="Yes"/>	[GLOBAL]

Conditional Modifications

Quantity Based Availability	<input type="text" value="No"/>
<small>▲ When set to yes, availability will automatically change to 'In stock' when quantity is positive and to 'Out of stock' when quantity is zero or negative. When set to 'No', availability status will not be updated automatically.</small>	

Specify how many related products, up-sells, cross-sells will be displayed on the grid.

It is possible to show product categories on the grid and enable category filter. Please be aware that enabled category filter increases server load.

When 'Quantity Based Availability' option is set to 'Yes', availability will automatically change to 'In stock' when quantity is positive and to 'Out of stock' when quantity is zero or negative. Please set to 'No' if you prefer to indicate availability status manually.

2. Extended Product Greed with Editor: Products sold for specific period

Additional Grid Columns

Qty Sold To

2016-03-01

Qty Sold From

2016-03-15

To see product quantity sold during the certain time period on the product grid you need to specify the required calendar scale.

Append Text Position: After Attribute Text ▼

You can use two rounding algorithms for 'Update Price' and 'Update Special Price' actions. If you indicate 'by rules of mathematical rounding' in this field, updated prices will be rounded to n.00, for example 3.57 and 8.32 will be rounded to 4.00 and 8.00 respectively. If you specify a value here, e.g. 0.5, prices will be rounded to n.50, so 3.57 and 8.32 would become 3.50 and 8.50.

In this field you can specify the attribute you want to copy for a certain product (for instance, description).

7. Mass Product Actions: General Settings

There are also settings for 'Relate', 'Up-sell' and 'Cross-sell' actions, which allow you to choose linking algorithms for these actions. There are three possible algorithms: Default, 2 Way and Multi Way:

1. 'Default' means, that relations between products will be built by the standard magento functionality (that is when you have to manually indicate related, up-sell and cross-sell items for each product).

2. '2 Way' algorithm. For example you have 'product 1', 'product 2' and 'product 3'. If you add 'product 2' and 'product 3' as up-sells (or related/cross-sells) for 'product 1', only 'product 1' will become an up-sell (or related/cross-sell) for 'product 2' and 'product 3'. 'product 3' will not become an up-sell (or related/cross-sell) for 'product 2' and 'product 2' will not become an up-sell (or related/cross-sell) for 'product 3'.

3. 'Multi Way' algorithm. Let's say you have soap, shampoo and toothpaste. If you add shampoo and toothpaste as related (or up-sells/cross-sells) to soap, all these products will become related to each other – soap and shampoo will become related (or up-sells/cross sells) to toothpaste; toothpaste and soap will become related (or up-sells/cross sells) to shampoo.

'Relate' action enables you to make products related. You also can easily remove relations via a mass action.

- Relate
- Up-sell
- Cross-sell
- Remove Relations
- Remove Up-sells
- Remove Cross-Sells
- Copy Custom Options
- Copy Attributes
- Copy Images
- Remove Images
- Change Attribute Set
- Fast Delete
- Append Text
- Replace Text

'Up-sell' and 'Cross-sell' actions work on analogy. They enable to you quickly assign up-sell and cross-sell blocks. You can choose linking algorithms for these actions at the configuration page.

13. Mass Product Actions: Copy Custom Options & Attributes

Use 'From Product ID' field to specify id of the product, from which the information should be copied to the products you've selected. Then click 'Submit'.

Pick the necessary products, select the action, then choose the attribute set, which should replace the current one and press 'Submit'.

VERY IMPROTANT. Please be very careful with changing attribute sets for configurable products. If the replacement set does not have an attribute on which the configurable product is based, there will be issues with display of the configurable product on the front end (the product page wouldn't open properly).

15. Mass Product Actions: Fast Delete

'Fast Delete' action will let you delete any number of products very fast. In comparison with standard Magento 'Delete' action it works a lot faster and also allows to delete a much larger number of products in one operation.
