Price ★★★☆☆

It's the most stunning idea, isn't it? This top of the line MacBook Pro is the fastest Mac Notebook ever, and probably one of the fastest Macs period.

Product Review (submitted on August 26, 2007):

It's the most stunning idea, isn't it? This top of the line MacBook Pro is the fastest Mac Notebook ever, and probably one of the fastest Macs period.

When Steve Jobs announced the new Macs, with Intel Core Duo processors I was almost certain I wanted to buy one. Why? Macs are well known for ease of use and capabilities, but they have managed all that for years, with processors that are not always top-notch. That all changed in January 2006.

Quick Overview

You've seen improvements in notebook performance before - but never on this scale. The Intel Core Duo powering MacBook Pro is actually two processors built into a single chip.
