Configuration

- CUSTOMERS
 - Newsletter
 - Customer Configuration
 - Wishlist
- Checkout
- Shipping Settings
- Shipping Methods
- Google API
- Payment Methods

You can specify the priority in which the extension should search the product attributes. So if you specify 'Name' as 'Attribute #1' and 'Description' as 'Attribute #2' like here, the module will first search in names, then in descriptions and after that in all other attributes.

Please be aware that the module searches all product attributes, not only the ones specified here. Please use this section to specify the most important attributes and define search priority for them.

	CPU Speed [v]	[GLOBAL]
	Custom Design [v]	[GLOBAL]
	Active From [v]	[GLOBAL]
	Active To [v]	[GLOBAL]
	Custom Layout Update [v]	[GLOBAL]
	Description [v]	[GLOBAL]
	Dimensions [v]	[GLOBAL]
	Is Product Available for Purchase with Google Checkout [v]	[GLOBAL]
	Finish [v]	[GLOBAL]
	Image Gallery [v]	[GLOBAL]
	Gender [v]	[GLOBAL]
	Allow Gift Message [v]	[GLOBAL]

3. Search Autocomplete Window on Front End

4. Manage Content of Autocomplete Window

Search Pro

Save Config

Search			▼
Attributes			▼
Autocomplete Layout			▲
Popup width (px)	<input type="text" value="355"/>	[GLOBAL]	
Min characters	<input type="text" value="3"/>	[GLOBAL]	
Products Limit	<input type="text" value="4"/>	[GLOBAL]	
Name Length	<input type="text" value="50"/>	[GLOBAL]	
Description Length	<input type="text" value="100"/>	[GLOBAL]	
Show reviews	<input type="text" value="Yes"/>	[GLOBAL]	
Enable "Add to Cart" button	<input type="text" value="Yes"/>	[GLOBAL]	
Theme			▼

For the autocomplete window you can specify the following parameters:

1. Width of the window.
2. The minimal number of characters a customer should type in the search field for the autocomplete to start working.
3. Maximal number of products to be shown in the window.
4. Max number of product name characters shown (if some product has a longer name, it will be reduced to the number you specify here).
5. Max number of product description characters shown
6. Whether to show info about reviews or not.
7. Enable add to cart button.

5. Setup Appearance of Autocomplete Window

Autocomplete Layout			▼
Theme			▲
Border Color	<input type="text" value="64C961"/>		[GLOBAL]
Font Color	<input type="text" value="202020"/>		[GLOBAL]
Highlight Color	<input type="text" value="EEEEEE"/>		[GLOBAL]
Background Hover Color	<input type="text" value="EB8A0E"/>		[GLOBAL]
Font Hover Color	<input type="text" value="FFFFFF"/>		[GLOBAL]

Also you can choose colors used for design elements of the autocomplete window, such as:

1. Window border color
2. Font color
3. Highlight color for search terms in the product description
4. Background color for the product which is hovered with mouse
5. Font for the product which is hovered with mouse
