Table of contents:

<u>1. How to setup the new shipping method</u>	<u>3</u>
<u>2. How to specify shipping rate for each product</u>	<u>5</u>
<u>3. New shipping method on checkout</u>	<u>6</u>

1. How to setup the new shipping method

To configure a shipping method, please open:
System > Configuration > Shipping Methods

Shipping Methods

Save Config

Shipping Per Product

Enabled	<input type="text" value="Yes"/>	
Show Only if Individual Rate is used for at least one Product	<input type="text" value="Yes"/>	[STORE VIEW]
Title	<input type="text" value="Shipping Per Item"/>	[STORE VIEW]
Method Name	<input type="text" value="New Shipping Method"/>	
Default Rate Per Item	<input type="text" value="10"/>	[STORE VIEW]
Use Default Value	<input type="text" value="Yes"/> <small>▲ If set to "Yes", the default rate will be used for all products with no specific shipping information.</small>	
Base Rate	<input type="text" value="10"/> <small>▲ Starting rate. Each item will add it's individual fee (if any) to this rate.</small>	[STORE VIEW]
Calculate each item separately	<input type="text" value="No"/> <small>▲ When set to "No" the extension ignores qty in the cart.</small>	
Use highest product rate for the whole order	<input type="text" value="No"/>	

Before you set 'Enabled' to 'Yes', please make sure that you have indicated the shipping rates appropriately.

You can specify default shipping rate.

Set 'Use Default Value' to 'Yes' to use the default rate for all products, for which individual rate wasn't specified.

If you switch 'Calculate each item separately' to 'No', customers will pay the same amount for shipping of a product without regard to the product quantity - shipping rate will be the same for 1 or 5 or 10 or etc items of a product.

1. How to setup the new shipping method

To configure a shipping method, please open:
System > Configuration > Shipping Methods

Minimal Value	<input type="text" value="15"/>	[WEBSITE]
	▲ Set 0 to allow any value.	
Maximal Value	<input type="text" value="300"/>	[WEBSITE]
	▲ Set 0 to allow any value.	
Sort order	<input type="text" value="100"/>	
Ship to applicable countries	<input type="text" value="Specific Countries"/>	[WEBSITE]
Ship to Specific countries	<input type="text" value="Svalbard and Jan Mayen
Swaziland
Sweden
Switzerland
Syria
Taiwan
Tajikistan
Tanzania
Thailand
Timor-Leste"/>	[WEBSITE]
Show method if not applicable	<input type="text" value="No"/>	
Displayed Error Message	<input type="text" value="This shipping method is currently unavailable. If you would like to ship using this shipping method, please contact us."/>	

You can indicate minimal and maximal shipping rates. Please be aware that the minimum and maximum apply to the whole order, not to each individual item. Let's say you have 2 products in the cart. Shipping for one is \$5 and for the other \$7. If minimal value is set to 15 – the shipping rate for the whole order will be \$15, not \$12. Maximal value works on analogy.

If you want to select some specific countries for your shipping method, please set 'Specific Countries' in this field.

If you set this option to 'Yes', customers will see the whole list of shipping methods. But if they choose the restricted one they will see an Error Message.

2. How to specify shipping rate for each product

Choose Store View:
Default Values

Product Information

- General
- Prices
- Meta Information
- Descriptions
- Images
- Cell Phone Attributes
- Design
