7. Specify rates for shipping price update

Rule Configuration

General	
Stores & Customer Groups	
Days and Time	
Coupons	
Products	
Rates	
Address Conditions	

At the 'Rates' tab you can select the rate modification action – surcharge, discount or replace. And specify the modification rates.

IMPORTANT. All rates are specified in base currency. If you have several currencies at your store, the rates will be converted from base currency to other currencies according to the conversion rates.

Edit Rule `Special: Shirts`

Rates

Calculation	Discount
Base Rate for the Order	5.00
Fixed Rate per Product	3.00
Rate per unit of weight	1.50 <small>▲ Enter the surcharge or discount. The value will be automatically multiplied by the weight to create a shipping rate.</small>
Percentage per Product	1 <small>▲ Percentage of original product cart price is taken, without discounts.</small>
Handling Percentage	10 <small>▲ The percentage will be added or deducted from the shipping rate. If it is 10% and UPS Ground is \$25, the total shipping cost will be \$27.5</small>
Minimal rate change	1.00 <small>▲ This is the minimal amount, which will be added or deducted by this rule.</small>
Maximal rate change	100.00 <small>▲ This is the maximum amount, which will be added or deducted by this rule.</small>
Minimal rate	30.00 <small>▲ Minimal total rate after the rule is applied.</small>
Maximal total rate	200.00 <small>▲ Maximal total rate after the rule is applied.</small>

Fixed rate will be applied to the shipping price once per each matching product. In this case if there 10 matching products, the discount will be equal to 30.

Address Conditions

Percentage rate is based on the product price in cart, without discounts. In this example, it's one percent of the price of all matching products. If the matching products cost 500, the shipping discount will be 5 – one percent of 500.

IMPORTANT. Based, Fixed and Percentage rates are added up to each other. So with this rule shipping will be discounted:

- One time by 5 for all matching items
- Plus discount of 3 for each matching product
- Plus discount equal to one percent of the price of all matching products.

Edit Rule `Special: Shirts`

Address Conditions

Handling Percentage will add or deduct the total shipping rate depending on the Calculation method you choose. Replace calculation doesn't influence on handling percentage.

E.g. Shipping costs \$30 and 'Discount' calculation is chosen. In this particular case handling percentage is 10. So the shipping cost will become \$27 (\$30 minus 10 percent).

Edit Rule 'Special: Shirts'

Maximal total rate change is the maximal amount which can be added to or deducted from the shipping price of the order by this rule. Let's say the discount calculated for shipping of matching products is 150. If you specify 100 in this field, the maximum shipping discount for matching products will be 100.

Minimal total rate change is the minimal amount which can be added to or deducted from the shipping price.

Edit Rule `Special: Shirts`

Rates

Calculation	Discount ▼
Base Rate for the Order	5.00
Fixed Rate per Product	3.00
Rate per unit of weight	1.50 <small>▲ Enter the surcharge or discount amount that'll be automatically multiplied by the product's weight to create a shipping rate.</small>

11. Summary of the sample shipping rule

So we've created a shipping rule, which apply only on English store view and only for customers, who are members of Wholesalers group.

The rule will give one discount of '5' for the whole order plus discount of '3' for each matching product plus discount of one percent of the price of all matching items.

Please see the next page for example of the rule application.

12. Example of shipping rule application

Proceed to Checkout

Product	Unit Price	Qty	Subtotal	
	\$150.00	10	\$1,500.00	

View Shopping Cart **Update Shopping Cart**

Subtotal	\$1,500.00
Shipping & Handling (United Parcel Service - 2nd Day Air)	\$83.16
Grand Total	\$1,583.16

Proceed to Checkout

[Checkout with Multiple Addresses](#)

Here's shipping price without discount.

Here the shipping price is discounted by our rule.

The total discount is 50, it consists of the following discounts:

- 5 base rate once per order
- All ten items match the rule, so the fixed rate discount is 3 for each product, 30 for all ten products.
- The price of all matching items is 1500, so percentage discount of one percent is equal to 15.

$$5 + 30 + 15 = 50$$

13. Shipping rules for bundled products

Please be aware that for shipping rules a bundled product is a set of products and each component of a bundled product is treated like a separate product. So discounts and surcharges are applied separately to each component.

For example, you have a rule, which applies surcharge of 5 to each product. If you add a bundled product, consisting of 5 components to cart, the surcharge will be 25.

14. How to combine Amasty shipping extensions

Read [the article](#) to learn how to combine Amasty shipping extensions for advanced tasks.

- [1. Shipping Discount for your own methods](#)
- [2. Free shipping for the chosen products](#)
- [3. Block a certain shipping method for shoppers using a promotion](#)
- [4. A special shipping method for those who have a coupon](#)
- [5. Different shipping options for various customer groups](#)
- [6. A promotion, which blocks one method and gives the discount for the other one](#)
