

Amasty

For more details see the [Store Locator](#) extension page.

Store Locator

Help customers to find the nearest offline store location to purchase your products. Display all stores on the handy map using Google Maps technology and provide valuable additional information.

- Add the unlimited number of store locations
- Equip stores with images and extra information on the map
- Easily import Geo IP Data
- Customize Google Mark templates to your needs
- Provide user-friendly URL to the store locator page

Extension Configuration

To configure general extension settings please go to **System → Configuration → Store Locator** and expand the **Main Settings** section.

Main settings		
Enabled	<input type="text" value="Yes"/>	[GLOBAL]
Distance Units	<input type="text" value="Allow User To Choose"/>	[STORE VIEW]
Responsive Template	<input type="text" value="Yes"/>	[STORE VIEW]
Page Title	<input type="text" value="Store Locator"/>	[STORE VIEW]
Google Mark Template	<pre><div class="popup" > <h2>{{name}}</h2> {{photo}} City: {{city}}
 Zip: {{zip}}
 Address: {{address}}
 {{ifstate}}State: {{state}}
{{/ifstate}} Description: {{description}}
 </div></pre>	[STORE VIEW]
Frontend product URL text	<input type="text" value="Available in Stores"/>	[STORE VIEW]
Frontend URL	<input type="text" value="locator"/>	[GLOBAL]
Open frontend url on new page	<input type="text" value="Yes"/>	[STORE VIEW]
Google API Key	<input type="text"/>	[GLOBAL]
Show additional attributes	<input type="text" value="Yes"/>	[STORE VIEW]

Enabled — enable or disable the module;

Distance Units — specify the distance units in kilometers, miles or let customers choose the units;

Responsive Template — enable or disable the usage of the responsive template;

Page Title — specify the Store Locator page title that will be displayed above the store locations list;

Google Mark Template — specify the template for the Google mark that will be displayed for each store location on the map;

Frontend product URL text — specify the text for URLs that will be displayed on product pages. The links will redirect customers to the map with offline stores that sell corresponding products;

Frontend URL — specify the part of the URL for the store locator page or use the default one;

Open frontend URL on new page — enable this option to open the store locator page on the new tab or page;

Google API Key — fill in the Google API key. You can learn more about this key [here](#);

Show Additional Attributes — enable this option to display extra attributes like phone number and email on the store list.

You can specify different main settings for each store view if needed. Please switch to the appropriate store view using the **Current Configuration Scope** dropdown.

Importing Geo IP Data

To import the Geo IP Database please expand the **Geolocation** section.

Geolocation		
Use Geo IP	<input type="text" value="No"/>	[WEBSITE]
Use Browser Location	<input type="text" value="Yes"/>	[WEBSITE]

Use Geo IP — this option allows using Geo IP data for the cases when customer’s browser doesn’t provide location data;

To enable the Geo IP option and the **Import** button you need to import the following files:

- GeoLiteCity-Blocks.csv;
- GeoLiteCity-Location.csv.

You can download the files [here](#).

For more information please [check this article](#).

Use Browser Location — set this option to **Yes** to use customers’ browser location data.

Importing Store Data

With the extension, you can instantly create or update numerous store locations by gathering all store info and upload it as a .CSV file.

Import
<input type="button" value="Add Stores"/> [STORE VIEW]
▲ Required files: Amlocator-locations.csv CSV file format example: http://amasty.com/examples/stores.csv

You can follow this step by step guide to learn how to modify the CSV file:

1. Connect to the server via FTP or some other connection;

2. Navigate to Magento root folder and proceed to `/var/amasty/amlocator/`;
3. Here you will see the file: `Amlocator-locations.csv`;
4. Edit the file according to your needs and save it;
5. Go to the Magento admin panel and navigate to **System** → **Configuration** → **Store Locator** → **Import** and click the **Add Stores** button.

Creating New Store Locations

To create a new location or edit already existing ones please go to **CMS** → **Store Locator**.

The screenshot shows the Magento Admin Panel interface for 'Location Management'. At the top, there's a navigation bar with 'CMS' and 'System' tabs, and a 'Get help for this page' link. Below the navigation bar, the 'Location Management' section is active, with an 'Add Location' button. The main area displays a table with 10 records. The table has columns for Location, Store View, Country, City, Zip, Address, Position, and Status. The records include 'Best Apparel Store', 'San Fran Apparel Store', 'Apparel Boutique', 'California Men Apparel Store', 'MyStore', 'Georgia Store', 'Atlanta Apparel Store', 'MyStore2', 'MyStore1', and another 'MyStore2' entry. Each row has a checkbox for selection and a status indicator (Enabled or Disabled).

Hit the **Add Location** button to create a new store location.

The screenshot shows the 'Edit Location Item' form for 'Best Apparel Store'. The form is titled 'Edit Location Item 'Best Apparel Store'' and has buttons for 'Back', 'Reset', 'Delete', and 'Save'. The form is divided into two sections: 'General Information' and 'Location on Map'. The 'General Information' section contains the following fields: 'Location name' (Best Apparel Store), 'Store View' (Main Website, Madison Island, English, French, German), 'Country' (United States), 'State/Province' (California), 'City' (San Francisco), and 'Description' (We work 24/7). There is a 'Show / Hide Editor' button next to the description field.

Location Name — fill in the store location name;

Store View — define the store views for which you want to display this store location.

Then, specify the required store location details that you want to provide your customers with.

Zip *	<input type="text" value="CA 94116"/>
Address *	<input type="text" value="505 29th Ave"/>
Phone Number	<input type="text"/>
E-mail Address	<input type="text"/>
Website URL	<input type="text"/>
Status *	<input type="text" value="Enabled"/>
Position	<input type="text" value="0"/>
Location photo	<input type="button" value="Choose File"/> no file selected <input type="checkbox"/> Delete Image

Status — enable or disable this location;

Position — define the location's position in the list;

Location Photo — add location photo by choosing the appropriate photo or image on your computer.

Next, switch to the **Location on Map** tab and specify the latitude and longitude manually or hit the **Auto fill** button to detect coordinates based on the address specified above.

General Information

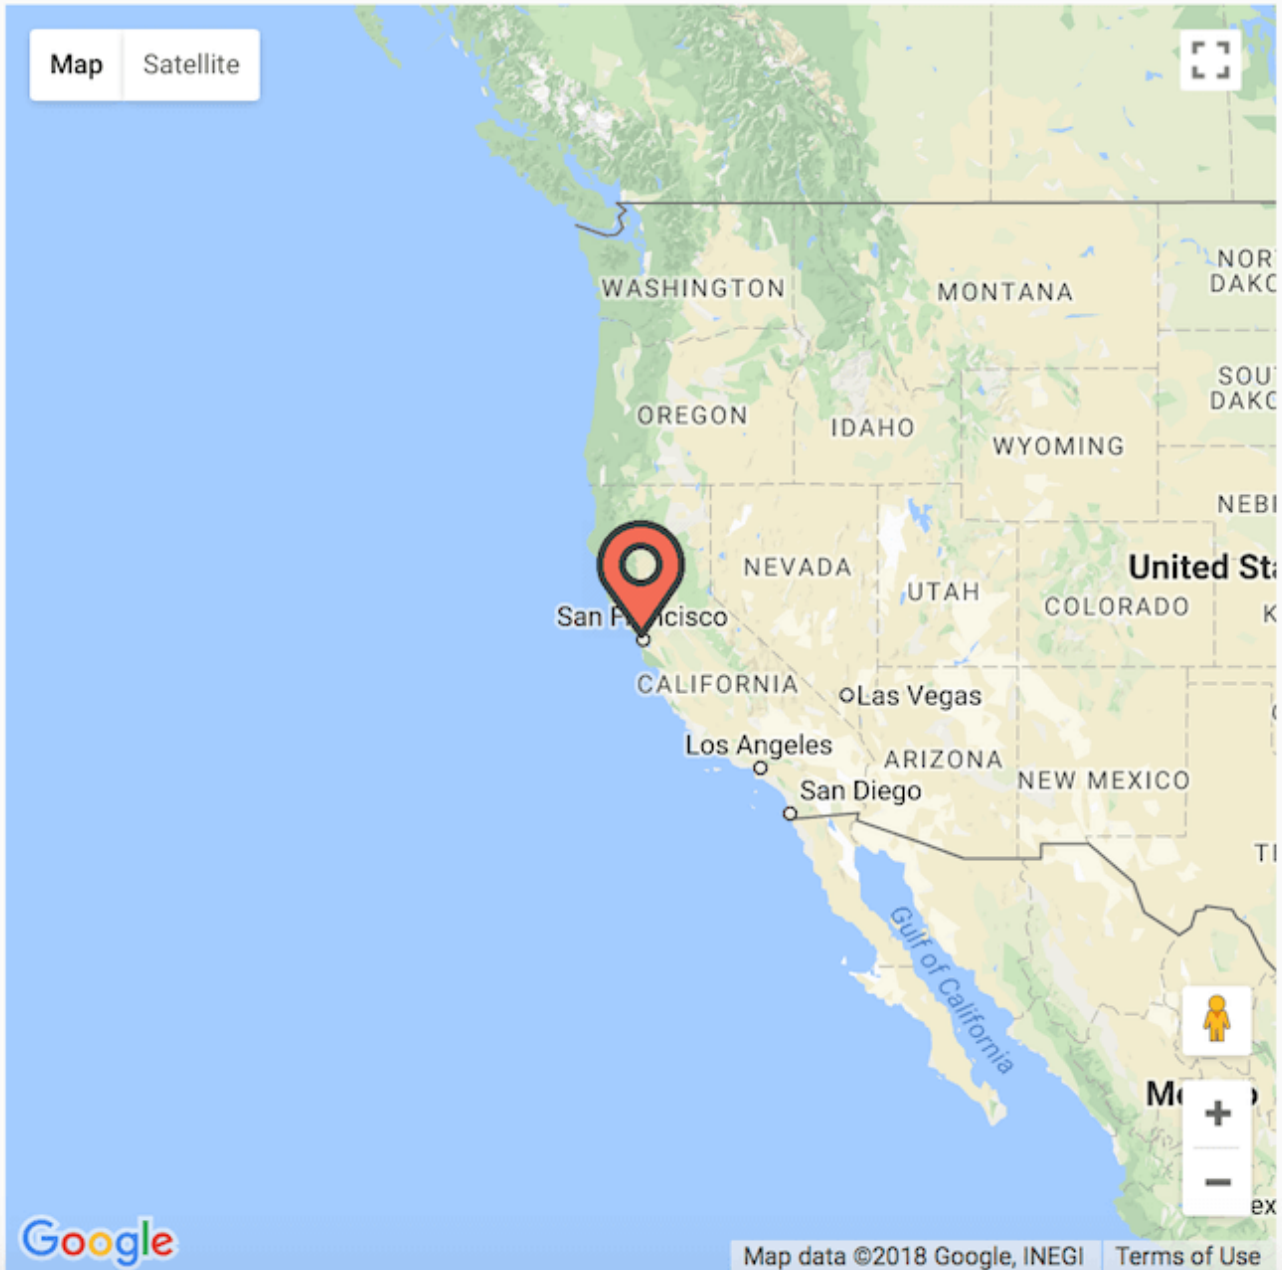

Latitude *

Longitude *

Auto Fill

Custom marker

 no file selected
 Delete Image

Also, you can upload custom marker that will be displayed on the map.

You can view the location marked on the map and easily zoom it in and out.

Then, switch to the **Available Products** tab. In case some offline stores sell only specific products you can assign these products to store location.

390	Fragrance Diffuser Reeds	hdd005	\$75.00

Choose the **Selected Products** option from the **Products Available in Store** dropdown to assign specific items to a particular offline store.

Offline stores selling only particular products, will not be displayed in the locations list on the Store Locator page. You can see these locations only after clicking the link on the corresponding product pages.

Switch to the **Available Categories** tab where you can assign a category to a particular store view. It means that this online store sells only products from this category.

Location Information

- General Information
- Location on Map
- Available Products
- Available Categories**

Edit Location item "Best Apparel Store" [Back] [Reset] [Delete] [Save]

Categories

Products From Selected Categories [Selected Categories]

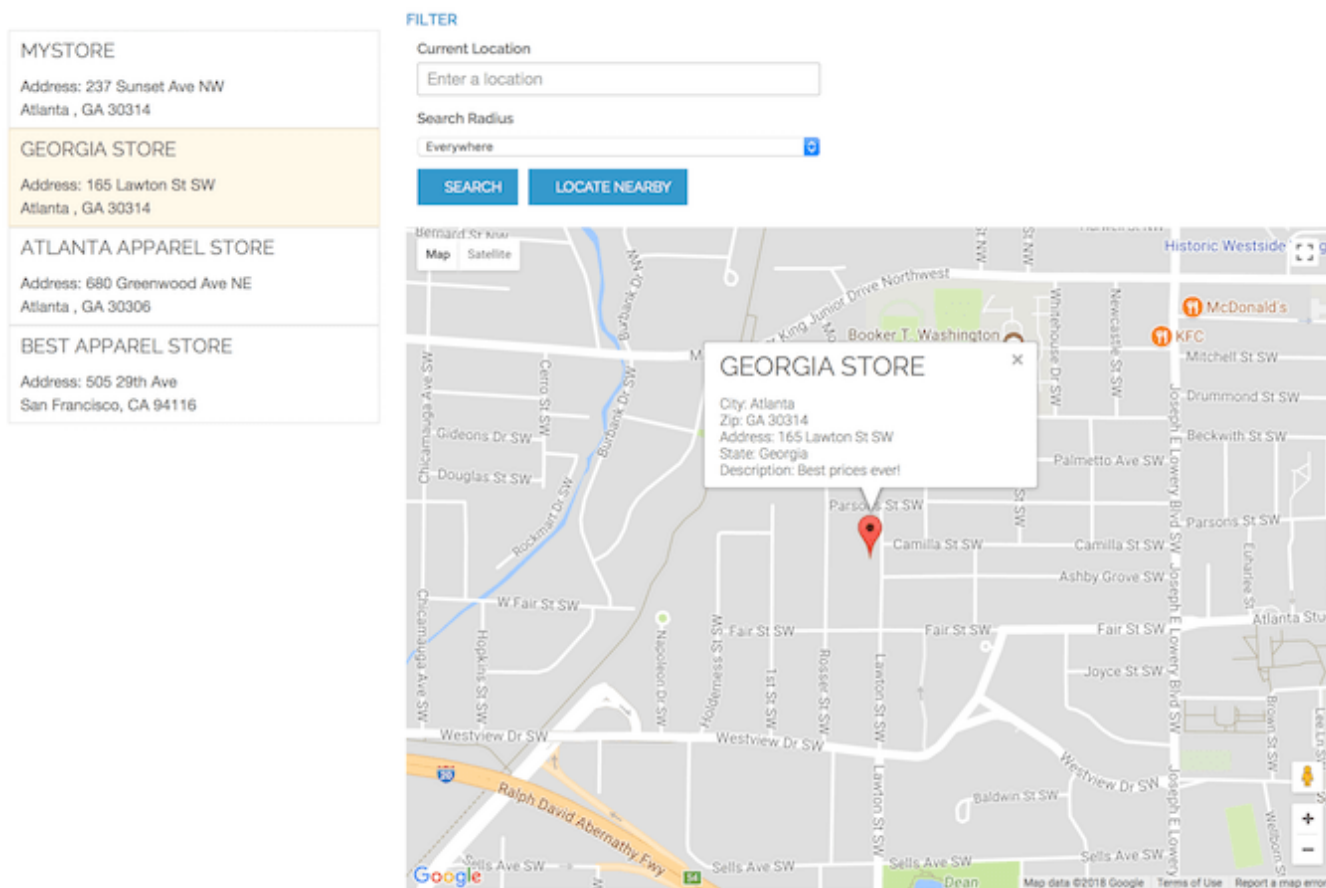

- Default Category (1)
- Women (52)
- Men (70)**
 - New Arrivals (9)
 - Shirts (12)
 - Tees, Knits and Polos (21)
 - Pants & Denim (19)
 - Blazers (18)
- Accessories (58)
- Home & Decor (40)
- Sale (9)
- VIP (6)

Choose the **Selected Categories** option from the **Products from Selected Categories** dropdown to assign specific categories to a particular offline store.

Offline stores selling products only from particular categories will not be displayed in the locations list on the Store Locator page. You can see these locations only after clicking the link on the corresponding product pages.

Fronend View

Store locations are added to the locations list and displayed on the map. Customers can specify the exact location to search the nearby stores. Also, it's possible to specify exact radius if needed. You can enable customers to select search radius measurement (see this section for details).

On the map you can display any additional info for each store. Store locations are added to the locations list and displayed on the map. Single stores are marked with a Google mark while the areas with multiple stores are shown in the clusters.

Notice, the more stores are there in the area, the brighter cluster mark will be.

The above link automatically appears on product pages when you assign products to particular store locations. After clicking the link, a customer will be redirected to the page with the offline stores that sell this product.
