Tier Price

Enhance default Magento tier price functionality by setting up quantity based discounts as a percentage of product's base price instead of manual editing of fixed prices again and again. It greatly saves your time and increases the number of loyal customers.

- Fixed tier price
- Discount percent of base price
- Discount amount of base price
- Bulk tier prices update
- Choose regular or final price as a base

With the extension, you'll be able to specify tier prices for each customer group. You can also configure different tier prices on each website. This is convenient if you have different pricing for each location you work with.

1. General Settings

To get the access to the 'Tier Price' settings please go to:
